**Against Apocalypse** Fred Dallmayr, 2015-12-24 The book denounces the irresponsible recklessness of some geopolitical agendas which are pushing the world relentlessly toward a major global war and possibly toward nuclear destruction or apocalypse The Bulletin of Atomic Scientists has recently placed the Doomsday Clock at three minutes to midnight Signs pointing toward a possible grand disaster are multiple everywhere one looks in our world today one finds ethnic and religious conflicts bloody mayhem incipient genocide proxy wars and hybrid wars renewal of the Cold War Add to these ills global economic crises massive streams of refugees and the threats posed by global warming and the picture of a world in complete disorder is complete Thus it is high time for humankind to wake up Starting from the portrayal of global anomie the book issues a call to people everywhere to oppose the rush to destruction and to return to political sanity and the quest for peace This is a call to global public responsibility In ethical terms it says that people everywhere have an obligation to prevent apocalypse and to maintain our world or hold the world together in all its dimensions including the dimensions of human and social life natural ecology and human spiritual aspirations or openness to the divine Differently out in lieu of the prevailing disorder and brokenness the book urges us to search for a new wholeness and just peace The book is intercultural and also inter disciplinary Since the aim is holistic to hold the world together the book necessarily has to draw on many disciplines including philosophy theology social science history and literature In terms of Western philosophical and intellectual legacies it draws mainly on the teachings of Nietzsche Heidegger and Derrida It also offers a completely new interpretation of the work of Thomas Hobbes unearthing in this work an ethical demand to exit from the state of perpetual warfare in the direction of a shared commonwealth The text also relies on the teachings of Christian theology both Catholic and Protestant invoking at crucial junctures the works of Karl Barth Raimon Panikkar and others In terms of non Western intellectual and spiritual legacies the book offers new interpretations of leading texts in the Indian and Chinese traditions Thus emphasis is placed on the ideas of world maintenance loka samgraha in Hinduism and of All Under Heaven in classical Chinese thought Although a central thrust of the text is for a new wholeness the goal is not a uniform synthesis where everything would be swallowed up in a bland unity Rather the issue is how to preserve diversity of the world in its rightful integrity by linking all elements in a complex web of interconnections and relationality

**Anthropology in the Age of Technology** Paul van Dijk, 2022-05-16 This book is the first to discuss for an English speaking audience the ideas of the German Jewish man of letters thinker and activist G nther Anders Anders is one of few philosophers to deal intensely with the moral consequences of Auschwitz and Hiroshima He can rightly be called the philosopher of the atomic age and his thinking a philosophy of modern technology In biting manifestoes sharp aphorisms and penetrating essays in stirring diary notes and political fables Anders strikes out the age in which we live As a twentieth century visionary he exposes the absence of the moral and social imaginations that is necessary to prevent our

history from ending in a total catastrophe In the gap between our technical creations and our utter inability to imagine their destructive potential lies the basis for the unstoppable activity of this practical philosopher From every possible angle he attempts to comprehend this modern schizophrenia in its roots and consequences Anders is one of the most important thinkers of the twentieth century He tried to describe and analyze the variety of manifestations of the self destructive progress of our technical civilization which makes humanity into an anti quated sort He diagnosed countless important problems ranging from the world of media to the dictates of the world of machinery and he investigated their social political and philosophical meaning To read his writings is more than becoming acquainted with a rich and colorful philosopher It is more than an encounter with a moving and passionate individual It is ultimately a confrontation with oneself with our own guilt and responsibility with our personal hopes and fears with our lack of imagination and with our need to recover it

*Monsters, Mushroom Clouds, and the Cold War* M. Keith Booker, 2001-05-30 The 1950s are widely regarded as the golden age of American science fiction This book surveys a wide range of major science fiction novels and films from the long 1950s the period from 1946 to 1964 when the tensions of the Cold War were at their peak The American science fiction novels and films of this period clearly reflect Cold War anxieties and tensions through their focus on such themes as alien invasion and nuclear holocaust In this sense they resemble the observations of social and cultural critics during the same period Meanwhile American science fiction of the long 1950s also engages its historical and political contexts through an interrogation of phenomena such as alienation and routinization that can be seen as consequences of the development of American capitalism during this period This economic trend is part of the rise of the global phenomenon that Marxist theorists have called late capitalism Thus American science fiction during this period reflects the rise of late capitalism and participates in the beginnings of postmodernism described by Frederic Jameson as the cultural logic of late capitalism
