Office of Geography,1965 **Population Circulation and the Transformation of Ancient Zuni Communities** Gregson Schachner,2012-04-01 Because nearly all aspects of culture depend on the movement of bodies objects and ideas mobility has been a primary topic during the past forty years of archaeological research on small scale societies Most studies have concentrated either on local moves related to subsistence within geographically bounded communities or on migrations between regions resulting from pan regional social and environmental changes Gregson Schachner however contends that a critical aspect of mobility is the transfer of people goods and information within regions This type of movement which geographers term population circulation is vitally important in defining how both regional social systems and local communities are constituted maintained and most important changed Schachner analyzes a population shift in the Zuni region of west central New Mexico during the thirteenth century AD that led to the inception of major demographic changes the founding of numerous settlements in frontier zones and the initiation of radical transformations of community organization Schachner argues that intraregional population circulation played a vital role in shaping social transformation in the region and that many notable changes during this period arose directly out of peoples attempts to create new social mechanisms for coping with frequent and geographically extensive residential mobility By examining multiple aspects of population circulation and comparing areas that were newly settled in

the thirteenth century to some that had been continuously occupied for hundreds of years Schachner illustrates the role of population circulation in the formation of social groups and the creation of contexts conducive to social change *100 Hikes in New Mexico* Craig Martin,2010-02-22 Offers hikes for all fitness levels and a Trails at a Glance feature to help select the right hike for you Hikes for all of New Mexico in this popular guidebook New Mexico offers a surprising variety of terrain to explore through its trails from the Chihuahuan Desert in the south to remarkable alpine lakes in the Sangre de Cristo Mountains to the north In this guidebook to New Mexico s impressive trails author Craig Martin includes easy 1 and 2 mile day hikes numerous 8 to 12 mile hikes and difficult 20 plus mile backpacking trails for the more ardent adventurers Interesting on the trail information such as the history of old mining camps homesteads and ghost towns is provided Most hikes are quickly accessible from the urban centers of Santa Fe and Albuquerque *Contemporary Archaeologies of the Southwest* William Walker,Kathryn R. Venzor,2011-06-02 Organized by the theme of place and place making in the Southwest *Contemporary Archaeologies of the Southwest* emphasizes the method and theory for the study of radical changes in religion settlement patterns and material culture associated with population migration colonialism and climate change during the last 1 000 years Chapters address place making in Chaco Canyon recent trends in landscape archaeology the formation of identities landscape boundaries and the movement associated with these aspects of place making They address how interaction of peoples with objects brings landscapes to life Representing a diverse cross section of Southwestern archaeologists the authors of this volume push the boundaries of archaeological method and theory building a strong foundation for future Southwest studies This book will be of interest to professional and academic archaeologists as well as students working in the American Southwest **The Protohistoric Pueblo World, A.D. 1275-1600** E. Charles Adams,Andrew I. Duff,2016-04 In the centuries before the arrival of Europeans the Pueblo world underwent nearly continuous reorganization Populations moved from Chaco Canyon and the great centers of the Mesa Verde region to areas along the Rio Grande the Little Colorado River and the Mogollon Rim where they began constructing larger and differently organized villages many with more than 500 rooms Villages also tended to occur in clusters that have been interpreted in a number of different ways This book describes and interprets this period of southwestern history immediately before and after initial European contact A D 1275 1600 a span of time during which Pueblo peoples and culture were dramatically transformed It summarizes one hundred years of research and archaeological data for the Pueblo IV period as it explores the nature of the organization of village clusters and what they meant in behavioral and political terms Twelve of the chapters individually examine the northern and eastern portions of the Southwest and the groups who settled there during the protohistoric period The authors develop histories for settlement clusters that offer insights into their unique development and the variety of ways that villages formed these clusters These analyses show the extent to which spatial clusters of large settlements may have formed regionally organized alliances and in some cases they reveal a connection between

protohistoric villages and indigenous or migratory groups from the preceding period This volume is distinct from other recent syntheses of Pueblo IV research in that it treats the settlement cluster as the analytic unit By analyzing how members of clusters of villages interacted with one another it offers a clearer understanding of the value of this level of analysis and suggests possibilities for future research In addition to offering new insights on the Pueblo IV world the volume serves as a compendium of information on more than 400 known villages larger than 50 rooms It will be of lasting interest not only to archaeologists but also to geographers land managers and general readers interested in Pueblo culture Hydrogeology of Cibola County, New Mexico Joe A.
