

THE THREATS OF EXTINCTION OF HUMANITY COMING FROM OUTER SPACE, HOW TO DEAL WITH THEM AND HOW TO AVOID THEM

Fernando Alcaforado*

This article aims to present what needs to be done to contribute to the adoption of scientific and technological solutions to prevent the extinction of humanity from threats that exist in outer space and that could reach planet Earth. The threats to the survival of humanity were analyzed in our books *A humanidade ameaçada e as estratégias para sua sobrevivência* (*A threatened humanity and strategies for its survival*) with the subtitle *Como salvar a humanidade das ameaças à sua existência* (*How to save humanity from threats to its existence*) published by Editora Dialética de São Paulo in 2021 [1] and "How to protect human beings from threats to their existence and avoid the extinction of humanity" published by Genovis Publishing of Europe (Chiginda, Republic of Moldova) in 2023 [2].

There are countless threats to humanity's survival coming from outer space today and in the short, medium and long term future. The threats that exist in outer space concern: 1) collision on planet Earth of asteroids, comets or pieces of comets; 2) collision on planet Earth of planets of the solar system; 3) collision on planet Earth of orphan planets wandering in outer space; 4) emission of cosmic rays, especially gamma rays emitted by supernova stars; 5) catastrophic consequences on the Earth's environment resulting from the continued distancing of the Moon from the Earth; 6) death of the Sun; 7) collision of the Andromeda and Milky Way galaxies where the Earth is located; and, 8) end of the Universe. All these catastrophic events, which could occur in the short, medium and long term, could contribute to humanity being driven to extinction as a species if nothing is done to protect humanity.

The collision of asteroids and comets or pieces of comets on planet Earth

The collision on planet Earth of asteroids and comets or pieces of comets, which threaten to collide with Earth, requires the adoption of strategies to avoid their collisions with Earth (Figure 1).

Extinction Or Survival The Dilemmas Of Our Technological Existence:

Extinction Or Survival? Margaret Janice Turner,1996 *The Study of English Language* M. J. Turner,1998 *The Northwest Technocrat* ,1996 *Humanity's Environmental Future* Ross McCluney,2004 McCluney comprehensively examines the wide variety of difficult environmental and socio economic problems facing humanity as it struggles toward a sustainable future Environmental Studies *Dilemmas of Life and Death* S. Cromwell Crawford,1995-01-01 This is a breakthrough work expanding the debate of the dilemmas of life and death in contemporary American society by carrying it beyond the insights of Western religious and philosophic thought to include ethical perspectives of the Hindu tradition The topics covered are the timely ethical issues that concern both Americans and all people of the world abortion suicide euthanasia and the environment A lively East West dialogue probes the roots of each issue in its native setting and the fruit of this historical approach is a clear cut analysis of up to date cases giving their current status in terms of ethics religion philosophy medicine and law Unlike traditional textbooks that concentrate on a theoretical analysis to the exclusion of practical issues this book does justice to both theoretical and practical ethics *Canadian Books in Print* ,1997 **Titans of the Forests** Gregory V. Short,2020-10-06 Instead of dwelling on the biological physiological or even the genetic aspects of our evolution Titans of the Forests takes a completely different approach which could be referred to as the uncharted and neglected field of macroevolution Uniquely captivating controversial and very readable it is the author's contention that we as a species were continuously forced to change our way of obtaining nourishment or rather our various economies in order to adapt to the ever changing world And as a result of this economic adaptation our species would then and only then begin to slowly change into the modern humans of today For much too long the world's scientific community has directed the discussion of our incredible evolution As a matter of fact our species biological physiological psychological and cultural evolution has been instigated propelled and shaped by our economic adaptation to a fluctuating environment In a very real sense the scientists are so far into the trees that they have actually ignored the forest Consequently we teach human evolution as a hodgepodge of different theories within the realm of microevolution thus failing to understand or even to recognize the economic thread that binds them altogether By integrating the timeline of our prehistoric past with that of our earliest known economies food gathering scavenging and nomadism the author was able to synthesize a sequence of events that illustrates the economic basis of our remarkable ascension and the beginnings of our present day institutions He not only reveals the genesis behind the cultural forces that exist within every human society but for the first time he has created a systematic and holistic approach in explaining the how and the why we have economically physiologically and then culturally evolved For unlike the rest of the animal kingdom we have possessed the extraordinary ability to change our economy which has made us an extremely adaptable species *Technocracy Digest* ,1995 *Bulletin of the Atomic Scientists* ,1979-03 **Rethinking Human Security** Moufida Goucha,John Crowley,2009-04-22 This book provides seven

studies that address major issues such as the human rights and human security nexus gender aspects of human security ethical and environmental challenges human security as a basic element for a policy framework the human security agenda developed by the Human Security Network and debates on human security within the United Nations Building on its variety of themes the book takes account of the complexity and scope of the concept of human security and proposes thereby to refresh and enrich discussion Contributors are internationally renowned experts in the different subfields of human security Offers an overview of current trends and insights on what is at stake if the international community is to maintain the momentum created a few years ago when the concept of human security emerged Designed to help both newcomers and experts in the field of human security Readers will find inspiration in the new developments of a concept that aims to shape practical action to meet the needs of the most vulnerable

The Rough Guide to Surviving the End of the World Rough Guides, 2012-08-16 The Rough Guide to Surviving the End of the World is a light hearted yet well informed look at threats to the very existence of life on Earth how we might be able to deal with them and if things go truly horribly wrong how we might just be able to survive Written by scientist and sci fan Paul Parsons this gripping book examines scenarios ranging from megafloods to space radiation supervolcanoes to bioengineering and what you should do when the sh t hits the fan Along the way we meet some of the lesser trodden paths to oblivion including the possibility that the human race will be gripped by mass stupidity and the outrageous idea that life on Earth could all be one giant Matrix style computer simulation that its creators might one day decide to switch off All are placed under the scientific spotlight and presented with clarity and humor To survive Armageddon you need the best advice and information available which is here presented in ample detail and capturing every plausible catastrophic scenario Now available in ePub format **From Human to Posthuman**
