Bodies on the Line Raphael Allison, 2014-12-01 *Bodies on the Line* offers the first sustained study of the poetry reading in its most formative period the 1960s Raphael Allison closely examines a vast archive of audio recordings of several key postwar American poets to explore the social and literary context of the sixties poetry reading which is characterized by contrasting differing styles of performance the humanist style and the skeptical strain The humanist style made mainstream by the Beats and their imitators is characterized by faith in the power of presence emotional communion and affect The skeptical strain emphasizes openness of interpretation and multivalent meaning a lack of stability or consistency and ironic detachment By comparing these two dominant styles of reading Allison argues that attention to sixties poetry readings reveals poets struggling between the kind of immediacy and presence that readings suggested and a private retreat from such performance based publicity one centered on the text itself Recordings of Robert Frost Charles Olson Gwendolyn Brooks Larry Eigner and William Carlos Williams all of whom emphasized voice breath and spoken language and who were inveterate professional readers in the sixties expose this struggle in often surprising ways In deconstructing assertions about the role and importance of the poetry reading during this period Allison reveals just how dramatic political and contentious poetry readings could be By discussing how to hear as well as read poetry *Bodies on the Line* offers startling new vantage points from which to understand American poetry since the 1960s as both performance and text *Audiobooks, Literature, and Sound Studies* Matthew Rubery, 2011-05-09 This is the first scholarly work to examine the cultural significance of the talking book since the invention of the phonograph in 1877 the earliest machine to enable the reproduction of the human voice Recent advances in sound technology make this an opportune moment to reflect on the evolution of our reading practices since this remarkable invention Some questions addressed by the collection include How does auditory literature adapt printed texts What skills in close listening are necessary for its reception What are the social consequences of new listening technologies In sum the essays gathered together by this collection explore the extent to which the audiobook enables us not just to hear literature but to hear it in new ways Bringing together a set of reflections on the enrichments and impoverishments of the reading experience brought about by developments in sound technology this collection spans the earliest adaptations of printed texts into sound by Charles Dickens Thomas Hardy and other novelists from the late nineteenth century to recordings by contemporary figures such as Toni Morrison and Barack Obama at the turn of the twenty first century As the voices gathered here suggest it is time to give a hearing to one of the most talked about new media of the past century *Audio*, 1972 *Approaches to Teaching Pound's Poetry and Prose* Demetres P.
