WEINER,1990 A Monthly List of All New Books Published in Great Britain ,1844 The Historians' History of the World Vol.3 (of 25) (Illustrations) Henry Smith Williams, The history of Greek civilisation forms the centre of the history of antiquity In the East advanced civilisations with settled states had existed for thousands of years and as the populations of Western Asia and of Egypt gradually came into closer political relations these civilisations in spite of all local differences in customs religion and habits of thought gradually grew together into a uniform sphere of culture This development reached its culmination in the rise of the great Persian universal monarchy the kingdom of the lands i e of the world But from the very beginning these oriental civilisations are so completely dominated by the effort to maintain what has been won that all progress beyond this point is prevented And although we can distinguish an individual active and progressive intellectual movement among many nations as in Egypt among the Iranians and Indians while among the Babylonians and Phnicians nothing of the sort is thus far known nevertheless the forces that represent tradition are in the end everywhere victorious over it and force it to bow to their yoke Hence all oriental civilisations culminate in the creation of a theological system which governs all the relations and the whole field of thought of man and is everywhere recognised as having existed from all eternity and as being inviolable to all future time With the cessation of political life and the establishment of the universal monarchy the nationality and the distinctive civilisation of the separate districts are restricted to religion which has become theology The development of oriental civilisation then subsides in the competition of these religions and the unavoidable coalescence consequent thereupon This is true even of that nation which experienced the richest intellectual development and did the most important work of all oriental peoples the Israelites When the great political storms from which the

universal monarchy arose have spent their rage Israel the nation has developed into Judaism and under the Persian rule and with the help of the kingdom it organises itself as a church which seeks to put an end to all free individual movement upon which the greatness of ancient Israel rests It was just the same with the ruling nation the Persians however vigorous their entrance into history under Cyrus The Persian kingdom is indeed a civilised state but the civilisations that it includes lack the highest that a civilisation can offer an energetic independent life a combination of the firm institutions and permanent attainments of the past with the free progressive and creative movement of individuality So the East after the Persian period was unable of its own force to create anything new It stagnated and had it not received new elements from without had it been left permanently to itself would perhaps in the course of centuries have altered its external form again and again but would hardly have produced anything new or have progressed a step beyond what had already been attained But when Cyrus and Darius founded the Persian kingdom the East no longer stood alone The nations and kingdoms of the East came into communication with the coast of the Mediterranean very early not later than the beginning of the second millennium B C and under their influence about 1500 B C a civilisation arose among the Greeks bordering the gean We call it the Mycen an and in spite of its formal dependence upon the East it could in the field of art where alone we have an exact knowledge of it take an independent and equal place beside the great civilisations of the East
