These methodologies are increasingly popular and have been able to bring some relief to many. But in terms of permanent deep change these options are sorely limited because they work solely with the conscious mind rather than with the underlying subconscious beliefs that drive our behavior. Recent research on the brain has revealed that we are only aware of 5% of our brain activity while the other 95% is subconscious. So unless we work with both our conscious mind as well as our subconscious mind we may find some decrease in our pain but we will continue to struggle. Emotional Repatterning Healing Emotional Pain by Rewiring the Brain provides insights stories and examples from Lisa Samet's life and the lives of her patients as well as practical tools to uncover the subconscious beliefs that are holding us back.
