Flight Into Fantasy:

Flight Into Fantasy Charles Goldstein, 1984 **The Recovery of Self** Kevin Fauteux, 1994 Sigmund Freud believed that regression to primitive behavior was a pathological escape from reality. However, all religions in some manner or another have urged their adherents to return to a simple way of being. Some have declared child-like behavior to be a high form of holiness. So is religion pathological or not? Or better yet, how and when does religious regression support psychological growth and when does it not? *The Recovery of Self* is a pioneering study of regression in religious experience. It maintains that certain kinds of regression offer opportunities to confront unresolved childhood processes and repair them. Just as an artist may be put in touch with his or her primal self during the creative process, so a religious seeker can journey backward into primitive modes of being and recover there a sense of original unity which, when carried into the present, can be redemptive and transforming. **BOOK JACKET** Title Summary field provided by Blackwell North America Inc. The most comprehensive up-to-date reference of its kind, the *Dictionary* also maintains a user-friendliness throughout. This combination ensures that it will serve as the definitive work for years to come. With a clear and functional design and highly readable style, the *Dictionary* offers over 30,000 entries, including interdisciplinary terms and contemporary slang, more than 125 illustrations, as well as extensive cross-referencing of entries. Ten supportive appendices, such as the Greek Alphabet, Medical Prescription Terms, and biographies of more than 1,000 deceased contributors to psychology, further augment the *Dictionary*'s usefulness. Over 100 psychologists, as well as numerous physicians, participated as consulting editors, and a dozen specialist consulting editors reviewed the material. Dr. Alan Auerbach, the American Psychological Association's de facto dictionary expert, served as the senior consulting editor. As a final check for comprehensiveness and accuracy, independent review editors were employed to re-examine, re-review, and re-approve every entry. **Alternative Worlds in Fantasy Fiction** Peter Hunt, Millicent Lenz, 2005-08-15 Edited by Morag Styles and written by an international team of acknowledged experts, this series provides jargon-free critical discussion and a comprehensive guide to literary and popular texts for children. Each book introduces the reader to a major genre of children's literature, covering the key authors, major works, and contexts in which those texts are published, read, and studied. This book provides an illuminating guide to literature that creates alternative worlds for young readers. Focusing on the work of Ursula Le Guin, Terry Pratchett, and Philip Pullman, the book considers both the genre of alternative worlds and the distinctiveness of these authors' texts, including Philip Pullman's *The Amber Spyglass*. **Queering Faith in Fantasy Literature** Taylor

A Dark Trace Herman Westerink, 2009 Figures of the Unconscious No 8 Sigmund Freud in his search for the origins of the sense of guilt in individual life and culture regularly speaks of reading a dark trace thus referring to the Oedipus myth as a myth about the problem of human guilt In Freud s view this sense of guilt is a trace a path that leads deep into the individual s mental state into childhood memories and into the prehistory of culture and religion Herman Westerink follows this trace and analyzes Freud s thought on the sense of guilt as a central issue in his work from the earliest studies on the moral and guilty characters of the hysterics via later complex differentiations within the concept of the sense of guilt and finally to Freud s conception of civilization s discontents and Jewish sense of guilt The sense of guilt is a key issue in Freudian psychoanalysis not only in relation to other key concepts in psychoanalytic theory but also in relation to Freud s debates with other psychoanalysts including Carl Jung and Melanie Klein

Reading Alcoholisms J. Lilienfeld, 2016-04-30 With Reading Alcoholisms Jane Lilienfeld has produced a ground breaking cross disciplinary study using the social psychological and scientific literature on alcoholism and family alcoholism to examine the novels of Hardy Joyce and Woolf Each of these authors was directly affected by the alcoholism of a family member or mentor and Lilienfeld shows how the effects of alcoholism organized their texts through the portrayal of a protagonist in The Mayor of Casterbridge through the denial of parental alcoholism and its silent presence in A Portrait of the Artist as a Young Man and through codependent reactive patterns of Mrs and Mr Ramsay in To the Lighthouse With the remarkable empathy Lilienfeld has for human dimensions of alcoholism she demonstrates that the narrative strategies in each of these novels at times mimic the behaviors and feeling states often arising from alcoholism Without an understanding of the multidimensional nature of alcoholism and the transmission of its effects across generations any analysis of the work of these three literary giants is incomplete

Conceptual Issues in Psychoanalysis John E. Gedo, 2013-05-13 In Conceptual Issues in Psychoanalysis John Gedo's mastery of Freudian theory and broad historical consciousness subserve a new goal an understanding of dissidence in psychoanalysis Gedo launches his inquiry by reflecting expansively on recent assessments of Freud's character His acute remarks on the intellectual and personal agendas that inform the portraits of Freud offered by Frank Sulloway Jeffrey Masson and Peter Swales pave the way for his own definition of psychoanalysis in historical context Then in topical studies on Sandor Ferenczi Melanie Klein and Heinz Kohut he explicates the commonalities that bind together three generations of dissidents each of whom undertook to supplant the edifice of hypotheses erected by Freud with alternative theories Interspersed with these essays are quite insightful studies of Lou Andreas Salome and David Rapaport whom Gedo sees as epistemological referees attempting to reconcile viewpoints unique to their generations In the second part of the book Gedo argues that analysis now has the opportunity to move beyond this pattern of dissidence followed by mediation by drawing on observational research about infancy and early childhood to validate or refute its clinical hypotheses In these chapters Gedo offers critical commentary on recent efforts to extrapolate from infant research to the

psychoanalytic theory of development Only then does he offer his own measured estimation of the legacy of infancy and the technique of psychoanalysis This review of the challenge of scientific method as it bears on analysis culminates in concluding chapters that probe the status of analysis as a hermeneutic discipline and the contribution of analysis to vocabularies of moral deliberation
