Fn Fal Auto Rifles:

The FN FAL Battle Rifle Bob Cashner, 2013-08-20 Of all the infantry small arms developed during World War II one that generated the most interest was the German assault rifle the StG 44 Sturmgewehr This innovative weapon inspired the Soviet AK 47 in 7.62x39mm calibre In the West the NATO countries looked hard at new weapons to upgrade their own infantry arsenals and counter the AK 47 resulting in the design of the Fusil Automatique Leger or FAL It proved to be a successful battle rifle and was soon adopted by the military and police forces of no fewer than 93 nations The FAL dominated the militaries of the West to such a degree that its nickname became the Right Arm of the Free World The FAL fulfilled every role it was asked to perform and remains a viable and well respected weapon to this day Fn-Fal Auto Rifles Duncan Long, 1981

German Automatic Rifles 1941-45 Chris McNab, 2013-03-20 This book explores the origins development combat use and lasting influence of Nazi Germany's automatic rifles focusing on the Gew 41 W Gew 43 Kar 43 FG 42 and MP 43 StG 44 The Blitzkrieg campaigns of 1939-40 convinced many observers that most infantry combat took place at closer ranges than the 750-1000m From 1941 Germany's arms designers took note and produced a new series of infantry firearms This study not only provides a detailed technical description of each weapon but also explores how the firearms performed on the battlefields of World War II The combat takes us from the FG 42 in the hands of Fallschirmjäger at Monte Cassino through to StG 44s being used by Waffen SS soldiers on both the Eastern and Western Fronts Postwar service is also studied such as the Gew 43's adoption by the Czech Army and the StG 44's use by the Viet Cong in the Vietnam War Setting each firearm in its tactical and historical context and employing striking photographs and full colour artwork firearms expert Chris McNab sets out the absorbing story of this distinctive and influential series of weapons
