Industrial Restructuring in East Asia Seiichi Masuyama, Donna Vandenbrink, Chia Siow Yue, 2001-12-01 This book is about the restructuring of industry in ten East Asian economies at the start of the twenty first century It examines the dynamic aspects of the region s industrial structures the changes occurring with globalisation fuelled by liberalisation and by a paradigm shift from industrial technology to information technology The traditional flying geese concept is less relevant to explaining the economic and industrial development in the region as the pattern has become less predictable *Developing the Global South* Paulos Milkias, 2010 For four decades the UN has attempted to foster development in the countries of the global south The book provides a synopsis of these efforts from the Brandt Commission Report to Boutros Boutros Ghali s Agenda for Development Prof Milkias presents opposing arguments in allotting responsibility for the growing gap between the North and the South and details the Millennium Development Goals and assesses their successes and failures so far He provides suggestions for closing the gap for removing the debt burden that is currently crushing the nations of the South and for relieving the poverty ignorance and disease that plague so much of humanity **Towards a New Era** M. L. Sondhi, 2001

Enhancing Competitiveness in Small Developing States Robert A Stoddard, 2024-08-15 This book is designed to help students practitioners and policy makers gain an understanding of the existential challenges that confront small developing states that have resulted in several economic fallouts to the extent that some countries have experienced the demise of many of their traditional industries It also presents a compendium of approaches tools and policies that can assist in resolving some of the lingering challenges faced by these countries It is envisaged that these approaches will invariably increase their competitiveness and thereby contribute to economic growth The book also analyzed the policy and regulatory environment in several small developing states and has developed approaches that are critical to strengthening the institutional capacity in support of the SME sector This is an imperative in their quest to become more productive and competitive and thereby create opportunities for sustained economic growth Emanating from a regional study of the industrial status in the CARICOM Member States it proposes new and revised approaches to public policy on many development issues The book is replete with insights inspiring real life cases and offers alternative approaches to development [Global Technology Transfer](#) John Chumack, 2002 Governments the world over fret continuously about the low level of transfer of technology especially within their own countries The general problem is military to industry although the variations are numerous Problems of presentation offering and support complicate an already byzantine world Yet somewhere within this dilemma lie the seeds of tomorrow s economic uptick Besides the nontrivial problems involved here the reluctance of the people having the technology to share it with someone who can profit from it stands out This book presents the issues and offers a comprehensive bibliography for easy access **Liberalisation and Human Resource Management** Arun

Monappa, Mahrukh Engineer, 1999 Liberalisation and Human Resource Management examines current issues in economic policy related to the management of human resources now and in the future Arun Monappa and Marukh Engineer reflect on the implications of economic liberalisation in India organisational restructuring including privatisation alliances and mergers Indian labour policy different management strategies future changes projecting to the year 2020 such as diversity and technology Extention Education and Agriculture Development Bikram K.
