Multidisciplinary Economics Peter de Gijzel, Hans Schenk, 2006-07-02 Multidisciplinary economics deliberately uses the insights and approaches of other disciplines and examines what consequences their contributions have for existing economic methods theories and solutions to economic problems Multidisciplinary economists should be at home in their own discipline and meet the high international standards of economic teaching and research that the discipline has developed At the same time they should be able to recognise the limits of economics and be willing to open up new horizons by following new discipline transcending paths on which new insights into the analysis and solutions of economic problems can be found in collaboration with representatives of other disciplines As a result of this search economic methods and theories may have to be adjusted in such a way that they take insights from other disciplines into account They may even have to be replaced by methods and theories that have been developed by other disciplines Catalog of Copyright Entries. Studies in Taxation, Public Finance and Related Subjects, 1977 **Indexed Bibliography on the Economic Structure of the Wood-based Industry** Jay O'Laughlin, Paul V. Ellefson, 1980 **The Economics of Industrial Organization** William G. Shepherd, Joanna M. Shepherd, 2003-09-19 The study of industrial organization extends to the core of some of the most important questions of economics Who controls markets and profits from them Does competition or monopoly result in a more beneficial economy How can the economic playing field become fairer or more biased in either direction Throughout the fields history various clashing schools of thought have attempted to sort through these complex issues examining both abstract theory and real life cases The Fifth Edition of this widely used highly regarded

text includes coverage of dramatic changes in the field Shepherd and Shepherd provide broad balanced coverage of topics without showing preference to any single point of view encouraging readers to think independently This emphasis on independent judgment is evident throughout the book with discussion of structure placed before performance to assist the reader in thinking about causation Topics are organized for maximum flexibility with distinct chapters covering case studies antitrust and regulation policy and capital markets

The New Palgrave Dictionary of Economics and the Law Peter Newman, 2016-04-30 A great deal of economics is about law the functioning of markets property rights and their enforcement financial obligations and so forth yet these legal aspects are almost never addressed in the academic study of economics Conversely the study and practice of law entails a significant understanding of economics yet the drafting and administration of laws often ignore economic principle The New Palgrave Dictionary of Economics and the Law is uniquely placed by the quality breadth and depth of its coverage to address this need for building bridges Drawn from the ranks of academics professional lawyers and economists in eight countries the 340 contributors include world experts in their fields Among them are Nobel laureates in economics and eminent legal scholars First published in 1998 and now available in paperback for the first time The New Palgrave Dictionary of Economics and the Law has established itself as a classic reference work in this important field

Internationalization, Market Power and Consumer Welfare Yves Bourdet, 2024-10-01 In the years prior to this book being originally published in 1992 the study of industrial economics had been dominated by the USA While there was a fund of theoretical and empirical knowledge relating to the US experience this is not always relevant in the context of Europe With its considerable national market the USA developed competition policies that differ from those in the smaller economies of European countries This collection of essays looks at the market behaviour of an economy more open to international competition The industrial organization of Sweden provides the ideal representation of smaller economies that can be applied to the other economies of western Europe The contributors apply different analytical approaches to assess direct and indirect forms of market power Some papers draw on econometric cross sectional models exploring the scope of market power and the role of international competition Others look at specific markets investigating the formation of market power its costs to consumers and the role of lobbying groups and the political sphere case studies include the domestic car white goods pharmaceutical goods food textile and air transport markets The book also contains papers that examine the role of competition policy towards restrictive practices and mergers in curbing market power and promoting economic efficiency This book will be of interest to those studying industrial economics and international business and marketing
