Cooper, 1991 Economic Stabilization for Developing Countries Anthony Clunies Ross, 1991 An introduction to macroeconomics in developing countries this book presents the main elements of macroeconomics and shows how the models produced for industrialized societies need to be modified for various groups of less developed countries It is designed for those with little or no knowledge of economics but who wish to understand the issues involved in the stabilizing of national income and the price level and in keeping a sustainable balance of payments It focuses on a number of measures designed to create stability including fiscal policy the exchange rate wages and interest rates There are several case studies of policy experiments conducted since the mid 1970s

Economic Stabilization and Debt in Developing Countries Richard N. Cooper, 1992 Drawing on preliminary results from a massive study conducted by the World Bank to probe the links between stabilization and growth Cooper examines the experience of developing countries faced by the oil shocks of the 1970s and the debt crisis of the 1980s He points out that a global slowdown in growth has shifted the main economic concern in developing countries from long term growth to stabilization and adjustment Cooper takes into account the cross country variables that influence the degree to which a country is affected negatively or positively by external shocks and covers such topics as political organization and external debt resolution The first chapter focuses on countries that experienced adverse shocks from the sharp increase in oil prices beginning in 1974 It also addresses countries that should have benefited from the oil price increase and from a comparable increase in coffee prices for which events turned out to be less favorable than they seemed The second chapter analyzes the disabsorption a country faces when it can no longer rely on foreign lending or advantageous terms of trade it also looks at inflationary pressures and at the role of the International Monetary Fund in designing stabilization programs for its member countries The third chapter discusses the main influences on a country's economic performance and also discusses the lessons offered for successful stabilization and long term growth Moving from individual developing nations to the world economic system the final two chapters examine the question of external debt and why it has proved to be such an international stumbling block offering suggestions on how it might be resolved
