The Economics of Research and Technology Keith Norris,John Vaizey,2018-04-09 Originally published in 1973 this book applies economic analysis to scientific research and to industrial research and development and analyses the interactions between these activities and economic activities in general The book begins by looking at the relationships between science and technology and then Analyses research and development in manufacturing industry Explains the different levels of expenditure in research and development in different industries and the role of such expenditure in the growth of firms Looks at the distribution of science and technology expenditure Discusses the international transfer of technology The book draws on evidence from several fields of study and imposes a theme upon the variety of evidence **The dynamics of technology-based economic development state science and technology indicators : second edition : October 2001.**

, **Science and Technology Policy** F. Tisdell,2012-12-06 I was asked recently to prepare an independent background report on the subject of priority assessment in science and technology policy for the Australian Science and Technology Council The Council while not necessarily endorsing this book suggested that a wider audience could be interested in the type of material contained in my report and kindly gave me permission to publish the material in my own right The present book contains this and other material some of which was presented at a seminar on National Science Policy Implications for Government Departments arranged by the Department of Science and the Environment Additional ideas were developed in response to comments on the manuscript by referees as a result of discussions with Professor John Metcalfe and Dr Peter Stubbs of Manchester University a conversation with Dr Keith Hartley of the University of York and in the wake of a communication from Dr Ken Tucker Assistant Director Bureau of Industry Economics Australia Science and technology policy affects and concerns everyone of us if for no other reason than we cannot escape in this interdependent world from the economic social and environmental overs pills generated by science and technology We must face the problems and promises inherent in new and existing science and technology whether we like it or not Not surprisingly this book finds that all industrialized countries seem to be facing similar economic and social problems **Science and Technology Parks and Regional Economic Development** Sara Amoroso,Albert N. Link,Mike Wright,2019-12-11 This book is the first collection of

scholarly writings on science and technology parks STPs that has an international perspective It explores concrete ways to systematically collect information on public and private organizations related to their support of and activities in STPs including incubation to start up and scale up and collaborations with centers of knowledge creation Rather than perpetuate the qualitative assessment of successful practices the focus of this book is to present quantitative and qualitative evidence of the impact of STPs on regional development and to raise awareness on the importance of systematic data collection and analysis Only through a systematic collection of data on fiscal identification numbers of companies universities and university spin offs will it be possible to conduct current and especially future analyses on the impact of STPs on entrepreneurship effectiveness of technology transfer and regional economic development To this extent the synergistic views of academics representatives from STPs and policy experts are crucial

The Dynamics of Science and Technology W. Krohn, E.T. Layton Jr., P. Weingart, 1978-05-31 The interrelations of science and technology as an object of study seem to have drawn the attention of a number of disciplines the history of both science and technology sociology economics and economic history and even the philosophy of science The question that comes to mind is whether the phenomenon itself is new or if advances in the disciplines involved account for this novel interest or in fact if both are interconnected When the editors set out to plan this volume their more or less explicit conviction was that the relationship of science and technology did reveal a new configuration and that the disciplines concerned with ITS analysis failed at least in part to deal with the change because of conceptual and methodological preconceptions To say this does not imply a verdict on the insufficiency of one and the superiority of any other one disciplinary approach Rather the situation is much more complex In economics for example the interest in the relationship between science and technology is deeply influenced by the theoretical problem of accounting for the factors of economic growth The primary concern is with technology and the problem is whether the market induces technological advances or whether they induce new demands that explain the subsequent diffusion of new technologies Science is generally considered to be an exogenous factor not directly subject to market forces and therefore appears to be of no interest
