The Media Economy Alan B. Albarran, 2010-07-02 The Media Economy analyzes the media industries and their activities from macro to micro levels using concepts and theories to demonstrate the role the media plays in the economy as a whole. Representing a rapidly changing and evolving environment, this text breaks new ground through its analysis from two unique perspectives: examining the media industries from a holistic perspective by analyzing how the media industries function across different levels of society (global, national, household, and individual), looking at the key forces (technology, globalization, regulation, and social aspects) constantly evolving and influencing the media industries. It includes examples from both developed and developing nations as well as data and trends from these countries offering a broad arena of study. Key features of this innovative text include topics new to media economics texts such as finance and investment, labor and social aspects, accessible discussion of complicated concepts and their application to media industries, new directions for both theoretical and methodological areas. With the media industries in an ongoing state of change and transformation, *The Media Economy* offers new reference points for the field to consider when defining and analyzing media markets. It is essential reading for students and practitioners in media management and economics who need to understand the role of media in the global economy.

International Marketing Daniel W. Baack, Eric G. Harris, Donald Baack, 2013 International Marketing presents an innovative integrated approach to the course in which marketing concepts are explored in depth within the international context. The authors identify five key factors that impact any international marketing venture: culture, language, political/legal systems, economic systems, and technological/operational differences, and discuss them in relation to the core marketing concepts of markets, products, pricing, distribution, place, and promotion. Uniquely, the book provides discussions of sustainability and bottom of the pyramid concepts within each chapter and is richly illustrated with examples from both multinational companies as well as smaller local concerns. Setting the path for the future direction of this course, the authors provide instructors and students with the first truly international marketing textbook.

out of the Great Crash of 2008 would all have been hard at any time. They are harder when changes in economic policy and structure coincide with stagnation in global trade and rising protectionist sentiment in developed countries, extraordinarily rapid demographic change and recognition of the urgency of easing the environmental damage from the old model. China's economy has slowed and there are worries that the authorities will not be able to contain the slowdown within preferred limits.
