*Models and Development Planning* Charles R. Blitzer, Peter B. Clark, Lance, 1975 **Theoretical foundations of development planning** Shri Bhagwan Dahiya, 1991 **Development Strategy and Management of the Market**

**Economy** Edmond Malinvaud, 1997 These companion volumes examine the highly topical issue of the adequacy of markets as an instrument of economic and social development In this era of transition and experimentation in economic management by governments a group of prominent international economists was brought together to distill their thinking on the changing role of government in the development process The first volume discusses the broad questions the second volume breaks down the analysis into more detailed topics **Planning with the semi-input-output method** A. Kuyenhoven, 2012-12-06

The semi input output method was introduced by Professor Jan Tinbergen in the early 1960 s in fairly obscure places in the economic literature The basic idea of the method is a very simple one and does not require lengthy and sophisticated exposition to be understood This fact together perhaps with Tinbergen s dislike for very formalized and technical analysis probably explains why he himself has never given a full exposition and elaboration of this method Nevertheless the concept did not remain unnoticed and authors such as B Hansen and some of Tinbergen s collaborators in particular P A Cor nelisse and J Versluis have contributed to the elaboration of the method The present work by Dr A Kuyvenhoven also a long time collaborator of Tinbergen has provided us with the first full and in my opinion definite exposition of the nature technique and use of the semi input output method now more than 15 years after the launching of the concept *Economic Structure and Performance* Hollis B. Chenery, 2014-05-10 *Economic Structure and Performance* Essays in Honor of Hollis B Chenery briefly reviews the work of Hollis Chenery in the field of economics This book discusses the underlying themes in Chenery s work including structure strategy adjustment and models Organized into four parts encompassing 26 chapters this book begins with an overview of the patterns of structural change and their relation to growth This text then examines the objectives measures and implementation of policy as well as administrative capabilities and cultural characteristics Other chapters compare Chenery s econometric analysis of development patterns with the historical analyses and suggest that the two approaches complement each other This book discusses as well the persistence of disequilibrium in segments of the economy The final chapter deals with simple criteria for detecting critical interdependencies and a formula for measuring their welfare

consequences This book is a valuable resource for economists industrialists foreign capitalists and social scientists

**Under Rational Expectations** Michael Malakellis, 2012-12-06 This monograph is concerned with the formulation and implementation of ORANI INT an intertemporal Computable General Equilibrium CGE model of the Australian economy The aim is to bring together in a balanced approach theory and data for the purpose of developing a practical state of the art tool for policy analysis The modelling approach adopted is motivated by the recent trend in economy wide modelling to combine the respective strengths of traditional CGE models and modern macroeconomic models Traditional CGE models typically provide a disaggregate representation of the economy at a single point in time Such models are useful for analysing issues involving the allocation of resources among the various agents identified at a particular point in time Modern macroeconomic models on the other hand usually provide an aggregate representation of the economy over many points in time Such models are useful for analysing issues involving the allocation of resources across time A model that combines the strengths of static CGE models and modern macro dynamic models is amenable to addressing a wide range of policy issues To demonstrate this point ORANI INT is used to analyse tariff reform      What Drives Third World City Growth? Allen C. Kelley, Nancy

**Information and Efficiency in Economic Decision** Jati Sengupta, 2012-12-06 Use of information is basic to economic theory in two ways As a basis for optimization it is central to all normative hypotheses used in economics but in decision making situations it has stochastic and evolutionary aspects that are more dynamic and hence more fundamental This book provides an illustrative survey of the use of information in economics and other decision sciences Since this area is one of the most active fields of research in modern times it is not possible to be definitive on all aspects of the issues involved However questions that appear to be most important in this author's view are emphasized in many cases without drawing any definite conclusions It is hoped that these questions would provoke new interest for those beginning researchers in the field who are currently most active Various classifications of information structures and their relevance for optimal decision making in a stochastic environment are analyzed in some detail Specifically the following areas are illustrated in its analytic aspects 1 Stochastic optimization in linear economic models 2 Stochastic models in dynamic economics with problems of time inconsistency causality and estimation 3 Optimal output inventory decisions in stochastic markets 4 Minimax policies in

portfolio theory 5 Methods of stochastic control and differential games and 6 Adaptive information structures in decision models in economics and the theory of economic policy      Equilibrium Models in an Applied Framework Ronny Norén,2013-02-26 This book gives the historical development explanations of technical specifications and a basic understanding of how to use different equilibrium models in an applied framework It contains an accessible analytical survey of economic equilibrium models including multi sector programming models linear and quadratic and the computable general equilibrium CGE model The book introduces the importance of disinvestment and hence a model of economic transformation is developed Finally the globalisation process of the production system is examined The equilibrium models in this book are presented in an easy way Although the book is primarily written for advanced undergraduates and beginning graduates the reading of the book will appeal to anyone interested in economic theory and applied modelling in the field of economics
