Goodbye To Excellence A Critical Look At Minimum Competency Testing:

Goodbye To Excellence Mitchell Lazarus, 2019-03-13 In recent years concern over high school graduates who could not balance checkbooks or read directions has led many states to require students to pass minimum competency tests before receiving their diplomas This legislators believe will again make diplomas meaningful as well as promote better education Dr Lazarus points out that any testing scheme creates inequities and that these tests are of special concern due to the emphasis society places on high school graduation a just society cannot accept their potential to mark a student for life The problem he believes is that society cannot agree on the goals of education making relevant testing difficult He also questions whether such testing will produce better curricula and notes that while more emphasis on the basics may be needed undue stress on them may weaken other parts of the curricula He concludes that the goals of minimum competency testing are laudable but that implementation may do long term damage to education *Concise Encyclopedia of Special Education* Cecil R.

describes the main characteristics of the competence based approach as it has emerged in the UK and traces its origins in American experimental programmes of the 1970s The arguments for the approach are discussed in detail Many of these arguments derive from the demonstrable limitations of more conventional assessment especially in predicting work performance She then analyses the theoretical assumptions which competence based assessment shares with the criterion referenced movement as a whole distinguishing clearly between those claims which can be sustained and those which cannot She also synthesizes the growing body of evidence on implementation Many lessons have now been learned about whether and how one can establish a workable robust and reliable competence based system It has become evident both that the preconditions for success are often missing and that if they are ignored competence based reforms may have largely negative consequences The final chapter reviews the prospects for competence based awards and offers some conclusions on what is essential to a competence based approach

Test Policy and Test Performance: Education, Language, and Culture Bernard R. Gifford, 2012-12-06 Bernard R Gifford In the United States the standardized test has become one of the major sources of information for reducing uncertainty in the determination of individual merit and in the allocation of merit based educational training and employment opportunities Most major institutions of higher education require applicants to supplement their records of academic achievements with scores on standardized tests Similarly in the workplace as a condition of employment or assignment to training programs more and more employers are requiring prospective employees to sit for standardized tests In short with increasing frequency and intensity individual members of the political economy are required to transmit to the opportunity marketplace scores on standardized examinations that purport to be objective measures of their abilities talents and potential In many instances these test scores are the only signals about their skills that job applicants are permitted to send to prospective employers THE NATIONAL COMMISSION ON TESTING AND PUBLIC POLICY In view of the importance of these issues to our current national agenda it was proposed that the Human Rights and Governance and the Education and Culture Programs of the Ford Foundation support the establishment of a blue ribbon National Commission on Testing and Public Policy to investigate some of the major problems as well as the untapped opportunities created by recent trends in the use of standardized tests particularly in the workplace and in schools

Education Paul M. Nachtigal, Paul Nachtigal Director, 2019-06-26 The close knit personal nature of small rural communities results in school and community operating as a single integrated social structure Useful rural school improvement strategies must therefore address needs that are recognized by both the local school and the community and must operate in a style congruent with the local setting Although outside ideas and resources may contribute greatly to successful plans to improve rural schools a high level of local involvement is essential in determining the specifics of those plans This is clearly demonstrated by the thirteen case studies presented in this book in which the strategies that have been effective over time in resolving rural school problems are distinguished by a high degree of local participation The cases chosen to provide good examples of particular strategies and also to represent the diversity that characterizes rural America cover centrally designed heavily funded programs as well as small scale locally initiated efforts in such areas as teacher training the introduction of new curricula and community participation in education decision making and political action The final chapters analyze the case studies in practical terms and recommend policy and practice for future rural school improvement

Rural Education In Urbanized Nations Jonathan P Sher, 2019-06-26 A reversal in rural to urban migration patterns is creating increasing interest in the quality of education in rural areas and in techniques for meeting educational needs in sparsely populated regions Wholesale urbanization of rural schools generally is rejected as a potential solution it is logistically inefficient centralization and standardization are met with growing resistance and conventional solutions to educational problems produce uneven results when applied to rural areas This book addresses the broad spectrum of rural education issues within OECD member countries The authors identify innovative programs policies and strategies and point toward the more promising paths for rural school improvement They also issue warnings about some of the blind alleys and dead ends that can be encountered The major topics covered include delivery systems in school innovations support mechanisms and community school linkages **School and College Competency Testing Programs** Rodney J. Reed, 1987
