Decamp,2016-06-15 Through its rich foray into popular literary culture and medical history this book investigates representations of regular and irregular medical practice in early modern England Focusing on the prolific figures of the barber surgeon and barber surgeon the author explores what it meant to the early modern population for a group of practitioners to be associated with both the trade guilds and an emerging professional medical world The book uncovers the differences and cross pollinations between barbers and surgeons practices which play out across the literature we learn not only about their cultural civic medical and occupational histories but also about how we should interpret patterns in language name choice performance materiality acoustics and semiology in the period The investigations prompt new readings of Shakespeare Jonson Middleton and Beaumont among others And with chapters delving into early modern representations of medical instruments hairiness bloodletting procedures waxy or

**Forensic Media** Greg Siegel,2014-11-05 In Forensic Media Greg Siegel considers how photographic electronic and digital media have been used to record and reconstruct accidents particularly high speed crashes and catastrophes Focusing in turn on the birth of the field of forensic engineering Charles Babbage s invention of a self registering apparatus for railroad trains flight data and cockpit voice recorders black boxes the science of automobile crash testing and various accident reconstruction techniques and technologies Siegel shows how forensic media work to transmute disruptive chance occurrences into reassuring narratives of causal succession Through historical and philosophical analyses he demonstrates that forensic media are as much technologies of cultural imagination as they are instruments of scientific inscription as imbued with ideological fantasies as they are compelled by institutional rationales By rethinking the historical links and cultural relays between accidents and forensics Siegel sheds new light on the corresponding connections between media technology and modernity     The Unwanted Sound of Everything We Want Garret Keizer,2010-05-04 Noise is usually defined as unwanted sound loud music from a neighbor the honk of a taxicab the roar of a supersonic jet But as Garret Keizer illustrates in this probing examination noise is as much about what we want as about what we seek to avoid It has been a byproduct of human striving since ancient times even as it has become a significant cause of disease in our own At heart noise provides a key for understanding some of our most pressing issues from social inequality to climate change In a journey that leads us from the Tanzanian veldt to the streets of New York Keizer deftly explores the political ramifications of noise America s central role in a loud world and the environmental sustainability of a quieter one The result is a deeply satisfying book one guaranteed to change how we hear the world and how we measure our own personal volume within it     *Music News* ,1916     NBS Handbook United States. National Bureau of Standards,1973     **Apocalypse Then** Mike Bogue,2017-09-14 The United States the only country to have dropped the bomb and Japan the only one to have suffered its devastation understandably portray the nuclear threat differently on film American science fiction movies of the 1950s and 1960s generally proclaim that it is possible to put the nuclear genie back in the bottle Japanese films of the same period assert that once freed the nuclear genie can never again be imprisoned This book examines genre films from the two countries released between 1951 and 1967 including Godzilla 1954 The Mysterians 1957 The Incredible Shrinking Man 1957 On the Beach 1959 The Last War 1961 and Dr Strangelove 1964 to show the view from both sides of the Pacific
