The Faber Guide to Victorian Churches Peter Howell, Ian Sutton, 1989-01-01 Buildings, Faith, and Worship Nigel Yates, 2000 This is the first major study for over forty years of the liturgical arrangement of Anglican churches in the period between the Reformation and the Oxford Movement The study is based both on surviving buildings and on a wide range of archival sources such as seating plans which are used to document internal changes and to suggest reasons behind them In the course of the book Nigel Yates challenges many widely held assumptions about the liturgical outlook of the Pre Tractarian period and about the impact of ecclesiology on the Church of England In particular he emphasizes the existence hitherto disregarded of a Church of England movement for liturgical renewal between 1780 and 1840 which to a degree anticipated some of the ideas previously attributed solely to the ecclesiologists The discussion is firmly set within the context of European Protestantism and comparisons are drawn with the liturgical practices both of Calvinists and Lutherans

Victorian Chester Roger Swift, 1996-01-01 While the Victorian period marked a significant phase in the development of the ancient cathedral city of Chester references to Victorian Chester have been notable for their absence from recent scholarship Based on extensive local research this volume of essays breaks new ground by examining some important aspects of the social history of Chester between 1830 and 1900 By combining detailed case studies of specific themes with wider discussion these essays explore the ways in which Cestrian society reacted to the changing circumstances of the Victorian period and analyse local perceptions of and responses to a range of contemporary social problems As such this original study not only illuminates the social and cultural history of the period but also illustrates both the complexity and diversity of Victorian cities It includes the most comprehensive bibliography of Victorian Chester to date **Liturgical Space** Nigel Yates, 2017-05-15 This is the first comprehensive and up to date account of the internal arrangement of church buildings in Western Europe between 1500 and 2000 showing how these arrangements have met the liturgical needs of their respective denominations Catholic and Protestant over this period In addition to a chapter looking at the general impact of the Reformation on church buildings there are separate chapters on the churches of the Lutheran Reformed Anglican and Roman Catholic traditions between the mid sixteenth and mid nineteenth centuries and on the ecclesiological movement of the nineteenth century and the liturgical movement of the twentieth century both of which have impacted on all the churches of Western Europe over the past 150 years The book is extensively illustrated with figures in the text and a series of plates and also contains comprehensive guides to both further reading and buildings to visit throughout Western Europe The **Rogue Goths** Edmund Harris, 2024-11-05 Part of a generation that came to prominence in the 1860s the rogue architects are a byword for Victorian Gothic at its most wayward and flamboyant Their work ranges from town halls to country houses and

from hotels to churches It has drawn much attention both from contemporary observers and 20th century commentators such as Harry Goodhart Rendel who coined the term Ian Nairn and John Summerson But much about the rogues architecture its inspiration their aims why they built where and how they did and why it caused such a stir has been poorly understood until now Based on extensive primary research and presenting a lot of material never published before this book presents comprehensive studies of three of roque architecture s most important exponents Robert Lewis Roumieu Joseph Peacock and Bassett Keeling Their careers although all very different provide valuable insights into a rich and complex episode in British architectural history These studies are prefaced by an introductory chapter which places them in context and looks at the numerous other architects who stand comparison with them not only throughout Britain but also in France and America It is handsomely illustrated with new photographs and archive material including drawings from the RIBA Collection The Pugins and the Catholic Midlands Roderick O'Donnell, 2002 Francis Bedford, Landscape Photography and Nineteenth-century British Culture Stephanie Spencer, 2011 Focusing on one representative figure Francis Bedford this study emphasizes how photographs operated to form and transmit cultural ideas and values The first writing on Bedford since the 1970s the book examines this premier photographer who was also commercially successful Major themes include the intersection of nature and culture the practice of nineteenth century tourism attitudes toward historical identity and the formation of a national identity in England and Wales Theology in Stone Richard Kieckhefer, 2004-04-08 Thinking about church architecture has come to an impasse Reformers and traditionalists are talking past each other In Theology in Stone Richard Kieckhefer seeks to help both sides move beyond the standoff toward a fruitful conversation about houses of worship Drawing on a wide range of historical examples with an eye to their contemporary relevance he offers refreshing new ideas about the meanings and uses of church architecture Waterstone's Guide to Books Waterstone & Co., Ltd,1989

Victorian Architecture James Stevens Curl, 2007 Although more than a century has passed since the end of the Victorian era the great achievements of the period 1837 1901 are grossly undervalued Phrases such as Victorian monstrosity are bandied about by many who ought to know better Professor Curl s robustly argued and beautifully illustrated book shows that the Victorians produced confident colourful rumbustiously eclectic architecture and that they went further than anyone since Roman times to potty train Urban Man He deals with the palette of styles available to the Victorians unprecedented building types new materials ecclesiastical buildings that arguably were superior to mediaeval exemplars the responses of a vital society to contemporary challenges and puts the built fabric firmly within the context of the intellectual complexities of the age Wearing his learning lightly he presents his case with grace gusto and elegance bringing the Victorian period to new life in a work which will give readers much to ponder savour and enjoy Waterstone's Guide to Books Waterstone & Co,1989
