**Extremist Groups** John Murray, Richard H. Ward, 1996 *Terror from the Extreme Right* Tore Bjørge, 1995 In many countries terrorism and political violence at the late 1980s and early 1990s have increasingly gravitated towards the extreme right in the direction of racism and extreme nationalism In most cases violence and harassment are directed against ethnic or social minorities such as immigrants left wing activists or homosexuals but sometimes even the political establishment is defined as an enemy and a legitimate target of violence What characterizes the ideologies and world views of right wing extremist groups Whom do they see as their main enemies and what kinds of threats are these enemies perceived to represent How do militant activists relate to the state the established power structures and wider political movements How and under what circumstances do aggressive ideology and rhetoric translate into actual violence and terrorism In this first general and comparative volume with a focus on right wing terrorism across the world ten leading experts address these questions Case studies focus on militant groups in North America South Africa Japan Italy Germany and the Scandinavian countries The findings throw a fascinating light on the international dimensions at right wing extremism and how racist ideologies travel and combine with other conceptions The authors have also made important observations on the relationship between ideological organizations and the less unorganized groups which often carry out most of the actual violence Other findings relate to the relationship between criminal behaviour and political violence and to the social background of the perpetrators The book gives new insight into the radicalization processes which produce right wing extremist violence Equally important however is the emphasis on factors and circumstances which might serve to restrain militant groups from following their extremist ideas to their ultimate violent conclusions

Terrorism in Asymmetrical Conflict Ekaterina A. Stepanova, 2008 This volume combines qualitative research with the analysis of available data on trends in modern terrorism and the use of primary sources and writings It puts forward an original typology of

**Violent Extremists** Thomas R. Mockaitis, Written for the general reader as well as the professional this succinct but comprehensive work examines the hybrid nature of the two violent extremist movements threatening the United States Islamist extremism and white nationalism Scholarship as well as popular discourse on terrorism often focuses disproportionately on specific groups without paying sufficient attention to the ideology that motivates them This book emphasizes understanding and countering the ideology that fuels extremism over preoccupation with specific organizations such as Al Qaeda or ISIS It sets contemporary terrorist threats in perspective avoiding fear mongering and political rhetoric The book examines the nature of violent extremism today in all its forms including lone wolves and cyber threats Focusing on the threats posed by both international and domestic terrorism it analyzes each in depth as a multidimensional hybrid phenomenon each threat exists as an ideology as distinct groups espousing that ideology and as a network of followers Short easy to read chapters take readers through the subject matter in a clear methodical manner Written in an accessible style by an author who has studied terrorism for more than 30 years and provided extensive media coverage on the subject the work is a valuable addition to the literature on violent extremism
