Gods In A Vortex:

Gods in a Vortex David Houston,1979 **Meaningless** Vetryvel,2025-05-30 MEANINGLESS The Two God Vortex Season 1 delves deep into the cosmic struggle of two all powerful gods Infinity God and Galaxy God whose clash threatens to rip apart the universe At the heart of this conflict lies a group of elemental warriors each driven by their own motivations facing trials that push them beyond their limits As they battle through dimensions and confront the gods overwhelming power the line between right and wrong blurs and the true nature of their existence is revealed Betrayals cut deep sacrifices are made and hidden truths about the origin of the gods emerge forcing these warriors to question their loyalties their pasts and the very meaning of their fight The gods may hold the power to destroy everything but it is the warriors inner strength their ego and their will to survive that will determine if the universe can be saved or if it will fall into eternal chaos **How God Created the Universe** Charles Matthews,2016-08-22 What is the universe What does that mean I will try to explain to those persons who want to know The universe is the large emptiness we see all around and parts we do not see yet It is easy for us to see through it and reach out and we touch nothing The universe does exist because there are things that we can touch and feel There is space around everything this empty space It did not exist before any parts or trees grass animals people so there was emptiness This is called es or ethrea and exists millions and billions of years ago There was a super intelligent being whom we call Jehovah and Jehovah looked all over this empty space and found no other being or no other part or thing in this emptiness that exists He called it ethrea he found nothing existed besides him So he thought and thought for quite some time and decided he would create a being called animal but there was nothing to be like him It does not need to look like me Nothing can be like me It must have a place to move and a part that helps it move It must have legs and feet to touch something to move on So Jehovah discovered that he could speak and lots of stuff would come into existence Now how can make this stuff form into balls or better Ill call it a planet or nebula If I make it go around like a whirlwind it will come to a center So he caused the stuff to go round and round and he discovered it got hot with friction When it cooled down it became a large ball and he called it the sun Some of the spinning stuff became smaller balls and he could call those the planets and the smaller ones as moons There were so many of these planets and moons What could he do with them He could make grass and trees and animals and people that could be companions It would take many years of experiments to do this and he had so many planets to cause to grow and many years to make the animals able to talk and they will need to be able to eat **Sedona Vortex Guide Book** Robert Shapiro,Janet McClure,1991-01-01 Only on rare occasions does a book come along that contains the potential to change the consciousness of our entire planetary culture Many have talked about the ascension process but very few really understand what it means Who is really out there Where are we going What are our choices What has to be done to prepare for this event Is everyone ascending to the same place What happened to the fourth dimension How can we understand the fifth dimension What are fifth dimensional beings like This book explains all of these

questions in a way that we can easily understand It explains what our relationships are to known extraterrestrial groups and what they are doing to help the Earth and her people in this crucial galactic moment in time It helps us to understand how we can raise our vibration now and begin the process of integrating higher dimensional energies into our third dimensional world The Arcturians have given us a crucial focus for the acceleration of world consci

The Chakra System with the Minor Chakras Harry Eilenstein,2022-11-03 Best known are the seven main chakras Root Chakra Hara Solar Plexus Heart Chakra Throat Chakra Third Eye and Crown Chakra But they are not the only chakras there are also for example the minor chakras in the arms and the legs Of particular interest are also the intermediate chakras between the main chakras which limit their lands like borders with gates that can pump the life force from one chakra to another and play an important role in the formation and resolution of trauma The chakras are the organs of the life force body Just as the physical body has a blood circulation the life force body also has a life force circulation the Kundalini which flows in the three central veins of the Sushumna and Ida and Pingala Furthermore there is a special form of secondary chakras that transform the images in the chakras into docking points for the outside world the kshetrams and the aura points They correspond to the sense organs and the hands of the physical body In order to be able to grasp this complex system which is nevertheless constructed in a very simple and coherent way in all its details and in its great elegance this book compares the knowledge of the chakras of different peoples the acupuncture points of Chinese Medicine the Marma points from Indian Ayurveda and the Rang Dr l points from Tibetan Medicine The result of these considerations is the description of the meaningful attitude in life after all the chakras are also the organs of the psyche and their healthy state therefore is also the healthy attitude of a person
