Nicolas de Condorcet Olivier Marty, Ray J. Amirault, 2020-03-11 This Springer brief explores the contribution of Nicolas de Condorcet in French higher education the historical development of his work and its influence on the history of the French education system Condorcet's educational proposals were first devised as five Memoires which were consolidated into the Rapport et Projet de Decret sur l'Organisation Generale de l'Instruction Publique This report has sparked debate on the subject of education in the past and lives on as a basis for ongoing iterations of plans for education by other writers In developing these ideas and especially how they apply to higher education this book bridges the gap between the 18th century French Enlightenment shift and the Revolution of higher education with the advent of the Grandes écoles such as école Normale Supérieure école Polytechnique and Conservatoire National des Arts et Métiers Each of these schools was represented by a specific institutionalized educational idea rooted in the works of the philosopher This book offers insights to a wider audience in the educational thought of Condorcet which at the time of his writing was overshadowed by Rousseau and shows how his ideas of liberty and equality flourish in the French educational system and remain an important part in today's French academic cultural and political culture

Education and State Formation A. Green, 2013-10-23 Education has always been a key instrument of nation building in new states National education systems have typically been used to assimilate immigrants to promote established religious doctrines to spread the standard form of national languages and to forge national identities and national cultures They helped construct the very subjectivities of citizenship justifying the ways of the state to the people and the duties of the people to the state In this second edition of his seminal and widely acclaimed book on the origins of public education in England France Prussia and the USA Andy Green shows how education has also been used as a tool of successful state formation in the developmental states of East Asia While human capital theories have focused on how schools and colleges supply the skills for economic growth

Green shows how the forming of citizens and national identities through education has often provided the necessary condition for both economic and social development **The French Revolution and Education** Caitlin Rebecca Manz, 2007
