Coming of Political Age Rebecca M. Callahan,Chandra Muller,2013-03-07 As one of the fastest growing segments of the American population the children of immigrants are poised to reshape the country s political future The massive rallies for immigration rights in 2006 and the recent push for the DREAM Act both heavily supported by immigrant youth signal the growing political potential of this crucial group While many studies have explored the political participation of immigrant adults we know comparatively little about what influences civic participation among the children of immigrants *Coming of Political Age* persuasively argues that schools play a central role in integrating immigrant youth into the political system The volume shows that the choices we make now in our educational system will have major consequences for the country s civic health as the children of immigrants grow and mature as citizens *Coming of Political Age* draws from an impressive range of data including two large surveys of adolescents in high schools and interviews with teachers and students to provide an insightful analysis of trends in youth participation in politics Although the children of both immigrant and native born parents register and vote at similar rates the factors associated with this likelihood are very different While parental educational levels largely explain voting behavior among children of native born parents this volume demonstrates that immigrant children s own education in particular their exposure to social studies strongly predicts their future political participation Learning more about civic society and putting effort into these classes may encourage an interest in politics suggesting that the high school civics curriculum remains highly relevant in an increasingly disconnected society

Interestingly although their schooling predicts whether children of immigrants will vote how they identify politically depends more on family and community influences As budget cuts force school administrators to realign academic priorities this volume argues that any cutback to social science programs may effectively curtail the political and civic engagement of the next generation of voters While much of the literature on immigrant assimilation focuses on family and community Coming of Political Age argues that schools and social science courses in particular may be central to preparing the leaders of tomorrow The insights and conclusions presented in this volume are essential to understand how we can encourage more participation in civic action and improve the functioning of our political system The Public Schools Susan Fuhrman, Marvin

Elareshi,2014-09-18 This book aims to understand the relationship between Libyan students consumption of satellite TV news services and their perceptions of news issues This involves examining students news consumption habits and their motives for the choices they make In the face of competition from well resourced broadcasters such as Al Jazeera TV what can Libyan news services do to retain audience interest and loyalty Do they need to do anything different Is there room for local and international news in Libya The book also explores whether Al Jazeera and Al Arabiya have affected students use of local TV news services Have local channels been displaced by newer channels and is the use of different channels driven by the same or different news consumption motives The book reveals that there are distinct variations in news consumption defined in part by news platform TV versus radio versus newspaper and in part by type of news providers local versus international TV Students seek out news sources they believe to be credible and that local TV news provision does not reach the students standards of credibility In content there may be room in the evolving news landscape for local TV services to occupy a niche market that still has value for the Libyan public To retain this market however quality of delivery will also be crucial **IJER**

Lin,2023-08-29 Winner 2024 Robert E Park Book Award Section on Community and Urban Sociology American Sociological Association Environmental organizing in Beijing emerged in an unlikely place in the 2000s new gated residential communities After rapid population growth and housing construction led to a ballooning trash problem and overflowing landfills many first time homeowners found their new neighborhoods facing an unappetizing prospect waste incinerator projects slated for their backyards Delving into the online and offline conversations of communities affected by the proposed incinerators *A Spark in the Smokestacks* demonstrates how a rising middle class acquires the capacity for organizing in an

authoritarian context Jean Yen chun Lin examines how urban residents create civic life through everyday associational activities learning to defend property rights fostering participation and mobilizing to address housing related grievances She shows that homeowners cultivated petitioning skills informational networks and community leadership which they would later deploy against incinerator projects To interact with government agencies they developed citizen science based tactics a middle class alternative to disruptive protests Homeowners drew on their professional connections expertise and fundraising capabilities to produce reports that boosted their legitimacy in city level dialogue Although only one of the three incinerator projects Lin follows was ultimately canceled some communities established durable organizations that went on to tackle other environmental problems Drawing on interviews participant observation and ethnography *A Spark in the Smokestacks* casts urban Chinese communities as schools of democracy in which residents learn civic skills and build capacity for collective organizing Through compelling case studies of local activism this book sheds new light on the formation of civil society and social movements more broadly

Handbook of Research on Solutions for Equity and Social Justice in Education Etim, James, Etim, Alice, 2023-03-02. Education's role should further social justice: prepare students to compete for higher social positions, train workers and engage students so that they become active participants in a democratic society. However, as with many global systems, education has long ago fallen victim to the institutional ailments of systematic oppression and discrimination. In order to promote equity and social justice in education, it is paramount that educators and administrators acknowledge systematic challenges in education and the solutions. *The Handbook of Research on Solutions for Equity and Social Justice in Education* discusses how teachers and school administrators practice equity and inclusion in their schools. It provides examples of social justice and how it affects society as well as specific case studies that aim at engendering equity and inclusion for minorities. It further discusses these issues in a global context. Covering topics such as agentic empowerment, social justice in dialogue and teacher social justice advocacy, this major reference work is a critical resource for faculty and administrators of both K-12 and higher education: preservice teachers, teacher educators, school social workers and counselors, librarians, government officials, researchers and academicians.
