Global Perspectives on Spirituality and Education Jacqueline Watson, Marian de Souza, Ann Trousdale, 2013-12-04 In recent decades and around the world much attention has been given to the role of spirituality in the education of children and young people While educationalists share many common goals and values in nurturing the spiritual lives of children and young people national and regional cultures religions and politics have impacted on the approaches scholars and practitioners have adopted in their investigations and practices The different contexts across nations and regions mean that educators face quite distinct conditions in which to frame their approaches to spiritual education and research and the nature and impact of these differences is not yet understood This book brings

together thinkers from around the globe and sets them the task of explaining how their research on children's spirituality and education has been shaped by the historical cultural religious and political contexts of the geographic region in which they work The book presents contributions in three sections Europe and Israel Australasia and The Americas and concludes with a chapter highlighting what is common and what is contextually unique about global approaches to spirituality and education

Perspective on Curriculum William E. Doll Jr., 1993 Doll draws relationships among the ideas advanced in chaos theory Piagetian epistemology cognitive theory and the work of Dewey and Whitehead In this book on the post modern perspective on the curriculum the author asserts that the post modern model of organic change is not necessarily linear uniform

measured and determined but is one of emergence and growth made possible by interaction transaction disequilibrium and consequent equilibrium Transformation not a set course the book argues should be the rule and open endedness is an essential feature of the post modern framework In the book the author envisages a curriculum in which the teacher s role is not causal but transformative The curriculum is not the race course but the journey itself metaphors can be more useful than logic in generating dialogue in the community and educative purpose planning and evaluation is flexible and focused on process not product Scholarly yet direct and to the point Doll s ideas make sense to front line educators in the real world of today s schools Kenneth Graham Seaford Union Free School District The Adventure of Education ,2009-01-01 This book on process relational philosophy of education suggests that the notion of Adventure is foundational for the advancement of knowledge Learning teaching and research are best conceived as rhythmic and relational processes involving curiosity imagination valuation creativity and self realization Thus construed contemporary educational practices can be revitalized from pedagogies of information retention and the current overemphasis on analytic precision **Transforming**

Bowers Audrey Dentith, David Flinders, John Lupinacci, Jennifer Thom, 2021-06-28 This edited volume extends ecological approaches to curriculum theory by recognizing and building on the contributions of the late Chet A Bowers to curriculum and ecological studies globally Chapters provide in depth explanation of Bowers' central contributions to the field including his identification of the linguistic roots of ecological degradation the need for school curricula to support sustainability and the principles of cultural commons eco justice and ecological intelligence Building on these ideas and emphasizing the links between curriculum studies social justice and environmental education the text illustrates how Bowers' ideas must now inform future approaches to schooling teacher education research and Indigenous communities to guard against the global ecological crises we now face This text will benefit researchers academics and educators with an interest in curriculum studies sustainability education and environmental studies in particular Those interested in the sociology of education educational change and school reform will also benefit from the book *Whitehead and Philosophy of Education* Malcolm D. Evans, 2021-10-25 That process philosophy can be the foundation of the theory and practice of educating human beings is the main argument of this book The process philosophy of Alfred North Whitehead 1861-1947 is

the particular thinking on which this book is based Readers are shown that Whitehead's process philosophy provides a frame a conceptual matrix that addresses their concerns about education and offers direction for their educative acts Whitehead theorized that all living entities are connected in some way Relatedness connectedness and holism are recurring themes in this exploration of Whitehead's implied philosophy of education Whitehead never wrote a philosophy of education but his writings over a period of nearly thirty years reveal a persistent interest and concern with education His work ranging from Introduction to Mathematics 1911 to Adventures of Ideas 1938 is drawn on here to construct not Whitehead's philosophy of education but a Whiteheadian philosophy of education Whitehead and Philosophy of Education brings to scholars and students of education an understanding of Whitehead as an important figure in philosophy particularly philosophy of education an acquaintance with process philosophy a brief treatment of Whitehead's life and an account of events and experiences that influenced his philosophizing and an exploration of the educationally salient concepts found in Whitehead's formal and informal philosophy with special attention to Whitehead's ideas about creativity process rhythm wisdom and knowledge Whitehead writes of phases of the rhythm of education romance precision and generalization The book is organized with attention to these three phases Part One Romance introduces readers to Whitehead the person and the change of context for educating from a mechanistic world view to an organismic one Part Two Precision examines Whitehead's writings as they relate to process philosophy and to educating Part Three Generalization is an application of the explorations of Parts One and Two yielding a construction of a Whiteheadian philosophy of education and suggestions for educational practice

The False Promises of Constructivist Theories of Learning C. A. Bowers, 2005 In The False Promises of Constructivist Theories of Learning A Global and Ecological Critique C A Bowers examines why constructivist based educational reforms fail to take into account these current critical issues the deepening ecological crisis globalization and undermining of the world's diverse cultural commons Special attention is given to the ethnocentrism and Social Darwinism that created the foundations for the ideas of Dewey Piaget and Freire Also considered is how the neo liberal promoters of economic globalization share their taken for granted assumptions Additionally Bowers explains how teachers in different cultures can contribute to the revitalization of their cultural and environmental commons without engaging in the cultural imperialism that characterizes constructivist approaches to educational reform

Teaching with the Wind Michael Dallaire, 2011-08-25 Teaching with the Wind tackles the question Can education for a Canadian civic spirituality bridge the sometimes incommensurable worldviews of faith based schools and secular public schools An affirmative answer is offered based on two foundations First that a national soul can be identified and thus serve as the content of spiritual education in Canada schools Second that a reconstructed approach to the contemplation in action method found in world religions and philosophy can provide an appropriate pedagogy for Canadian spiritual education This book argues that education for civic spirituality is of paramount importance as Canada continues its transition from a Judeo Christian and

bicultural nation to a multi faith and multicultural nation within a secular democracy It offers a direction that would enrich religious and secular education systems as well as Canada as a whole *Understanding Curriculum* William F. Pinar, 1995 Perhaps not since Ralph Tyler s 1949 Basic Principles of Curriculum and Instruction has a book communicated the field as completely as *Understanding Curriculum* From historical discourses to breaking developments in feminist poststructuralist and racial theory including chapters on political theory phenomenology aesthetics theology international developments and a lengthy chapter on institutional concerns the American curriculum field is here It will be an indispensable textbook for undergraduate and graduate courses alike
