Re-centering the Critical Potential of Nordic School Leadership Research Lejf Moos, Elisabet Nihlfors, Jan Merok Paulsen, 2020-10-19 This volume contributes significantly to the ongoing international and Nordic paradigm shift in educational leadership research It advocates for going from a contemporary mainstream functionalist paradigm to a reflexive paradigm based on educational values and knowledge The volume is built on the shared basis that the purpose of education is and must be fundamental for school leadership practice However that is often forgotten in educational governance and policy The basis of the argument is that educational leadership needs to change from focusing on effectiveness and narrowly defined accountability towards focusing on leadership that is contributing to the general education of students That entails that leadership research need to focus on complex perspectives like context relations trust sense making and social and human values and less on control outcomes accountability and testing The volume reminds readers about the need to raise awareness of the contexts of education and research be they political cultural economic or ideological Chapters analyze discuss and compare research from Nordic educational leadership research systems Denmark Finland Iceland Norway and Sweden The cross system insights clarify the fundamental relations between policy governance and research practice are and discuss forgotten dependencies and opportunities

Second International Handbook of Educational Leadership and Administration Kenneth A. Leithwood, P. Hallinger, 2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and quickly became something of a best seller for reference works within education Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools

launched in the mid 1980s combined with a widespread belief in leadership as the single most powerful contribution to such improvement. The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well. During the two year period during which this current handbook was being written activity in the realms of school leadership, school improvement and leadership development gained further momentum. The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection, preparation and development.

Leading Schools in a Global Era Philip Hallinger, Kenneth Leithwood, 2013-12-16 This special issue looks at the constantly changing face of education in the world today. Topics covered include educational values, cross cultural studies, leadership, social impacts and the role of technology in education.

Multiculturalism and Multilingualism at the Crossroads of School Leadership Jon C. Veenis, Sylvia Robertson, Jami Royal Berry, 2020-10-01 This volume builds upon emergent understandings about educational leadership and policy in hopes of continuing to refine our understanding of what effective leadership means in linguistically and culturally diverse school contexts. The volume seeks to entrench a deeper understanding of the broader leadership policies and practices that promote the success of linguistically and culturally diverse students while also recognizing that effective leadership can be highly dependent on context. It offers original empirical research that enhances an understanding of the interdependencies between leadership, culture, language and policy, i.e. the mechanisms that engender or hinder successful stewardship of linguistic and cultural plurality. The confluence of school leadership, linguistic diversity and multiculturalism makes this volume unique, especially considering the pace at which global migration continues to accelerate, coupled with the need to accommodate an array of diverse learning needs in today's schools.

Political Philosophy, Educational Administration and Educative Leadership Reynold Macpherson, 2013-10-01 In this book Reynold Macpherson initiates a politically critical theory of educative leadership as a fresh line of inquiry in the practice, research and theory of educational administration and educational leadership. Divided into four parts, the book introduces the sub discipline of political philosophy to the field of educational administration, management and leadership. It does this by clarifying the knowledge domain of each and identifying how four political ideologies, specifically pragmatism, communitarianism, communicative rationalism and egalitarian liberalism, have primarily informed and surreptitiously provided contestable justifications for power in the development of practice, research and theory in the field of study. The book goes on to offer three case studies illustrating how political philosophy can be used to interpret how people become leaders and administrators of educational institutions and systems. Additional case studies then demonstrate how crises in governance in educational institutions and systems can be analyzed and improvements made using the tools of political philosophy. The final part uses the sub discipline to critique the author's decades of research into educative leadership and concludes the book by both establishing the relativity of politically critical critique and the ideology

it favours neo pragmatism Political Philosophy Educational Administration and Educative Leadership will provide practitioners researchers and theorists in educational administration management and leadership with a deeper appreciation of power by formally introducing them to the assumptions limits and tools of political philosophy The Superintendent as CEO John R. Hoyle, Lars G. Bjork, Virginia Collier, Thomas Glass, 2004-08-07 John Hoyle and his co authors have done the impossible they have produced a textbook on the superintendency that is both research based and readable They have also bridged the gap between the world of those who believe everything is measurable and those who see leadership as spiritual and learning as a work in progress This is a major addition to the field of educating school system leaders Paul Houston Executive Director American Association of School Administrators Paul Houston Executive Director American Association of School Administrators Professors workshop facilitators school administration students and superintendents will find the content and authors insights to be highly relevant and enlightening Theodore J Kowalski Kuntz Family Chair in Educational Administration University of Dayton Theodore J Kowalski Kuntz Family Chair in Educational Administration University of Dayton This book represents an important contemporary effort to provide direction to the construction of a text anchored curriculum for the preparation of superintendents Michelle Young Executive Director University Council for Educational Administration Michelle Young Executive Director University Council for Educational Administration Transform the role of superintendent into the district s Chief Executive Officer Executive CEOs need the management and executive skills to meet complex issues of budgets personnel information technologies product accountability and competition Superintendents require many of the same skills to effectively manage their districts The Superintendent as CEO identifies the knowledge and skill base needed by current and aspiring school district administrators to become high performing CEOs of their districts and schools The authors blend selected elements of the ISLLC and NCATE standards into the benchmark AASA Professional Standards for the Superintendency to outline the multiple ways of knowing and acting in the complex role of the CEO superintendent This scholarly and friendly research and field based curricula for district CEOs workshop planners and doctoral preparation programs thoroughly examines District vision and school culture Politics and school governance Internal and external communication Organizing for high performance Curriculum design and delivery Human resource management for student learning Intended for both practicing and aspiring superintendents this book will provide the foundation for developing and cultivating the CEO leadership values and skills that superintendents will find helpful in moving from simply knowing to becoming the CEO **Beyond Leadership** Scott Eacott, 2017-11-06 This book systematically elaborates Scott Eacott s relational approach to organizational theory in education Contributing to the relational trend in the social sciences it first surveys relational scholarship across disciplines before providing a nuanced articulation of the relational research program and key concepts such as organizing activity auctors and spatio temporal conditions It also includes critical commentaries on the program from key figures such as Tony Bush Megan Crawford

Fenwick English Helen Gunter Izhar Oplatka Augusto Riveros and Dawn Wallin As such the text models an approach to or social epistemology for building knowledge claims in relation rather than through parallel monologues Eacott s relational approach provides a distinctive post Bourdieusian variant of the relational sociological project Shifting the focus of inquiry from entities e g leaders organizations to organizing activity and recognizing how auctors generate simultaneously emerging from and constitutive of spatio temporal conditions unsettles the orthodoxy of organizational theory in educational administration and leadership By presenting its claims in the context of other approaches the book stimulates intellectual debate among both relational sociologists and opponents of relational approaches Beyond Leadership provides significant insights into the organizing of education As it does not fit neatly into any one field but instead blends educational administration and leadership organizational studies and relational sociology among others it charts new territory and promotes important dialogue and debate
