Swaffield,Sally M Thomas,2019-07-23 This collection presents educational assessment research from Latin America adding to a relatively small but growing body of research considering educational assessment and evaluation issues in this large region The predominance of Chile reflects its early highly centralized education system and the fact that it adopted national testing before other Latin American countries It was also an early participant in international assessment programmes Other countries have followed the trend of implementing national testing and to a lesser extent participating in international surveys The complementary development of technical expertise in quantitative research methods has enabled extensive analysis of the large data sets generated by these testing and assessment programmes Taken together the evidence reported provides a means not only of reviewing educational quality issues in Latin America but also of facilitating comparisons that allow the context specificity of equivalent research conducted in western developed countries to be considered The chapters in this book were originally published as a special issue of *Assessment in Education Principles Policy and Practice*

Rebuilding Public Confidence in Educational Assessment Mary Richardson,2022-05-23 Educational assessment is important But in the twenty first century it is easy to feel that schooling and other phases of education are shaped entirely by certain assessments and that assessment is only about exam results The idea that test grades can accurately describe the aims and outcomes of education is unfair and reductive Yet it is a pervasive and persuasive discourse This book is about such discourses the stories we tell each other and how they impact public trust and confidence in educational assessment It explains the roots and nature of assessment discourses and proposes a restructuring of the debates in order to rebuild public confidence It aims to challenge dominant assessment discourses and demands a more nuanced informed debate about what happens in and beyond schools and how this influences public thinking Questioning the status quo needs buy in from policymakers teachers parents and students and from the broader public from journalists you me our friends and our children Using examples from international settings to explore the nature of trust in assessment discourses Rebuilding Public Confidence in Educational Assessment shows how these discourses can be reframed so that all aspects of the assessment system policymaking school planning home practice with students can be undertaken with confidence

Validity of Educational Assessments in Chile and Latin America Jorge Manzi, María Rosa García, Sandy Taut, 2021-09-11 This edited volume presents a systematic analysis of conceptual methodological and applied aspects related to the validation of educational tests used in Latin American countries Inspired by international standards on educational measurement and evaluation this book illustrates efforts that have been made in several countries to validate different types of educational assessments including student learning assessments measurements of non cognitive aspects in students teacher evaluations and tests for certification and selection It gathers the experience of validity studies from the main international assessments in Latin America PISA TIMSS ERCE and ICCS Additionally it shows the challenges that must be taken into account when evaluations are used to compare countries groups or trends of achievement over time The book builds on the premise that measurements in the educational

field should not be used if there are no studies that support the validity of the interpretation of their scores or the use made of such tests It shows that despite the recognition given to validity relatively few educational measurement assessments have accumulated enough evidence to support their interpretation and use In doing so this volume increases awareness about the relevance of validity especially when assessments are key component of educational policies *Educational Assessment*
