Kerckhoff, Ken R. Fogelman, David Crook, David A. Reeder, 2007 *Going Comprehensive in England and Wales* David Crook, Ken Fogelman, Alan C. Kerckhoff, David Reeder, 2017-09-25 The transition of British secondary schools from predominantly selective to predominantly comprehensive was meant to transform a highly stratified system into a more equal one However this study shows that the new system was in fact highly diverse and retained features of the selective system *Fee-paying Schools and Educational Change in Britain* Ted Tapper, 2020-11-25 Examining the history of access to private education this work sheds light on the interaction of state society and schooling Organized historically much of the analysis concentrates on contemporary political struggles and evaluates the possibility of a unified educational system **Religious Education in a Pluralist Society** John Edwards, Peter R. Hobson, 2019-07-12 Religious education in liberal pluralist societies such as the UK the USA and Australian underwent radical change in the 1980s and 1990s with a major shift towards multi faith educationally oriented programmes This has meant significant modifications to both the content and the methodology of religious education courses and to the way they are conceived of and taught in schools and universities One important implication of this change for the teaching and study of religion today is the need for a philosophical dimension that deals with issues such as the truth status of religious statements and the moral acceptability of religious claims This dimension is often insufficiently developed this lack is made more critical by the multiple competing truth claims of various religions giving rise to such contentious problems as the growth of fundamentalism increasing religious intolerance and conflict and differences of opinion on central moral problems such as birth control abortion and euthanasia This text attempts to provide the philosophical underpinning that the study and teaching of religion in modern societies requires *Her Majesty's Inspectorate of Schools Since 1944* John E. International Handbook of Urban Education will be the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region An important question to be answered for example is what it takes in terms of resources political will and policy actions to improve urban education The Middling Sorts Burton J. Hallinan, 2000-04-30 The aim of the Handbook of Sociology of Education is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions The study of how the context of schooling influences education processes is critical to an understanding of school outcomes Rather than being determined solely by ascribed and achieved characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded Communities families schools and social groups are critical elements in the educative process By viewing the school as a societal institution and highlighting the interaction between context and individual behavior the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society The second sociological insight that guides the research in the Handbook is that the school is a social system
