Wheeler,2011-11-01 In this ambitious book Kenneth Wheeler revises our understanding of the nineteenth century American Midwest by reconsidering an institution that was pivotal in its making the small college During the antebellum decades Americans built a remarkable number of colleges in the Midwest that would help cultivate their regional identity Through higher education the values of people living north and west of the Ohio River formed the basis of a new Midwestern culture *Cultivating Regionalism* shows how college founders built robust institutions of higher learning in this socially and ethnically diverse milieu Contrary to conventional wisdom these colleges were much different than their counterparts in the East and South not derivative of them as many historians suggest Manual labor programs for instance nurtured a Midwestern zeal for connecting mind and body And the coeducation of men and women at these schools exploded gender norms throughout the region Students emerging from these colleges would ultimately shape the ethos of the Progressive era and in large numbers take up scientific investigation as an expression of their egalitarian production oriented training More than a history of these antebellum schools this elegantly conceived work exposes the interplay in regionalism between thought and action who antebellum Midwesterners imagined they were and how they built their colleges in distinct ways     **Gender and Higher Education** Barbara J. the education of African American students at Oberlin College Following the Reconstruction era Oberlin College mirrored the rest of society as it reduced its commitment to black students by treating them as less than equals of their white counterparts By the middle of the twentieth century black and white student activists partially reclaimed the Oberlin legacy by refusing to be defined by race Generations of Oberlin students plus a minority of faculty and staff rekindled the college's commitment to racial equality by 1970 In time black separatism in its many forms replaced the integrationist ethic on campus as African Americans sought to chart their own destiny and advance curricular change Oberlin's is not a story of unbroken progress but rather of irony of contradictions and integrity of myth and reality and of imperfections Baumann takes readers directly to the original sources by including thirty complete documents from the Oberlin College Archives This richly illustrated volume is an important contribution to the college's 175th anniversary celebration of its distinguished history for it convincingly documents how Oberlin wrestled over the meaning of race and the destiny of black people in American society
