**Heart and Mind** Ruth Beechick, 2004-07-01 This book offers fresh insight on what the Bible says about learning. Teaching and learning are more effective when people are viewed with heart, with the image of God within them. This book contains the most complete research available about heart in the Bible. The Bible says the heart knows, considers, speaks, remembers, deceives, meditates, and other functions that modernists like to attribute to the brain. This book also reports physiological research that shows the Bible was right all along in the way it spoke about heart. A chart in the appendix summarizes almost 1000 Bible references to heart by meaning.

**Bernard Lonergan's Third Way of the Heart and Mind** John Raymaker, 2016-09-30 Today the world is confronted with many religious wars and the migrations of millions of persons due to these conflicts. There is a need for informed dialog as to the roots of the conflicts and ways of addressing these in ways that speak to peoples' minds and hearts. This is what this book attempts to do from the viewpoint of major religious and ethical thinkers. The book relies on Bernard Lonergan's foundational method to address problems systematically with a view to achieving breakthroughs in our openness to one another. The book appeals to the teachings of the Buddha, Jesus, and Mohammad, relying on the mystical and insights of these religious founders as well as those of dozens of their followers so as to find commonalities that can build bridges of mercy. A global secular ethics plays a leading role in this book's bridging efforts.

Thompson, 2022-11-18 This volume investigates the role of the arts in character education. Bringing together insights from esteemed philosophers and educationalists, it looks to the arts for insight into human character and explores the arts' relationship to human flourishing and the development of the virtues. Focusing on the moral value of art and considering questions of whether there can be educational value in imaginative and non-narrative art, the nine chapters herein critically examine whether poetry, music, literature, films, television series, videogames, and even gardening may improve our understanding of human character, sharpen our moral judgement, inculcate or refine certain skills required for virtue, or perhaps cultivate certain virtues or vices themselves. Bringing together research on aesthetics, ethics, moral and character education, this book will appeal to students, researchers, and academics of philosophy, arts, and education, as well as philosophers of education, morality, aesthetics, and teachers of the arts.

Educating with Purpose: The heart of what matters Stephen Tierney, 2020-08-04 If the last decade focused on what works, the decade ahead must focus on what matters. In his second book, Tierney argues that the purpose of education must move to the heart of the educational debate. Purpose will significantly influence what schools and the education system as a whole will do next. Why we educate is a question from which all other aspects evolve. A question for all times, it will resonate with those who have experienced the Great Pause. Using four main philosophies of education: personal empowerment, cultural transmission, preparation for work, and preparation for citizenship, he provides the underpinning theory and seminal works alongside a powerful critique. Using the impact of these different philosophies on a school's curriculum, he challenges the current orthodoxy, allowing the reader to consider alternative views and approaches. Proposing that the telos of education must be a life well lived, he argues for a re-purposing of education with a preferential option for the poor at its heart. Educative and challenging, this will be read by all those interested and involved in education.
