Nielson,William K. Sustainable Development movements for which UNESCO is the lead agency there has been an increasing emphasis on the power of education and schooling to help build more just and equitable societies Thus giving everyone the opportunity to develop their talents to the full regardless of characteristics such as gender socio economic status ethnicity religious persuasion or regional location As enshrined in the United Nations Declaration on Human Rights over five decades ago everyone has the right to receive a high quality and relevant education In order to try to achieve this ideal many countries are substantially re engineering their education systems with an increasing emphasis on promoting equity and fairness and on ensuring that everyone has access to a high quality and relevant education They are also moving away from the traditional outlook of almost exclusively stressing formal education in schools as the most valuable way in which people learn to accepting that important and valuable learning does not just occur in formal dedicated education institutions but also through informal and non formal means Thus learning is both lifelong and life wide This book brings together the experience and research of 40 recognised and experienced opinion leaders in education around the world The book investigates the most effective ways of ensuring the UNESCO aim of effective education for all people in the belief that not only should education be a right for all but also that education and schooling has the potential to transform individual lives and to contribute to the development of more just humane and equitable societies      **Education for All** Education International (Organization),2003

**Reach for Greatness** Yong Zhao,2018-02-08 How do you close the achievement gap Start by changing the question When we use the achievement gap to define success we shortchange our students It s time to recognize that the potential for greatness lies in a unique form within each child and that the goal of education should be to encourage and develop it This inspiring manifesto brings in research from different disciplines and demonstrates how to uncover individual greatness by giving students control of their learning You ll also find Strategies for implementing personalizable education Examples showing practices that have gone wrong and right Guidance for teaching disadvantaged students      *Education for Social Justice* Laura Chapman,John West-Burnham,2010-02-16 The disparity between excellence and equity is a key issue for education policy and practice This book is an argument for equity and inclusion in education based on a model of social justice which is grounded in relationships and learning rather than policies and structures Countries that combine excellence with equity where young people experience high levels of wellbeing tend to be societies with a commitment to social justice equity and inclusion There is an increasing recognition that long term educational and social reforms have to focus on issues around social justice if they are to be more than palliative responses Education for Social Justice looks at the role of relationships on many levels personal meaning group or team interaction the school structure and culture and cross agency and community involvement and development The aim of this book is to find a paradigm that can be used to achieve greater social fairness by finding individual local solutions still in line with national policies and strategies      *The Oxford Handbook of U.S. Education Law* Kristi L. Bowman,2021 The Oxford Handbook of U S Education Law includes more than three dozen
