**Silent Moments in Education** Colette A. Granger, 2011-01-01 Silent Moments in Education combines autoethnography with psychoanalytic theory and critical discourse analysis in a unique consideration of the relations teachers and learners forge with knowledge with ideas and with one another

**Shaping the Future**, 2007-01-01 World wide the production of teachers has become a sharp political issue during the early years of the twenty first century Current systems for ensuring a supply of capable and knowledgeable teachers have come sustained under attack from politicians economists parents organisations and social critics alike There is less agreement now about teacher education than in any time over the pass fifty years Much of the debate in the public and political arenas has been driven by narrow and expedient consideration and too much of it demonstrates a poor grasp of the deep and complex issues which teacher education in a democracy must confront At the same time there has been a serious educational debate which has focused on what a well trained teacher ought to be able to do and what methods of training and education can produce competent teachers The chapters of this book address these issues in a critical way asking what should the objectives of teacher education be The authors demonstrate the international reach of the debate over teacher education and they ground their discussions within the national contexts of their own experience All the authors share the view that teacher education involves much more than acquiring a set of skills and techniques Important as these are the well trained teacher needs for example to have an understanding of the contexts of teaching of the reasons why we teach of the role of schools as institutions within political environments as well as a coherent perspective on curriculum and the relevant bodies of theory which give overall point to what is being done What teacher education entails will probably never be beyond contestation at least not so long as it takes place within capitalist democracies These democracies with their tensions running between liberal ideals and economic imperative push and pull teacher education in contradictory directions At present educational ideals seems too quickly and too dogmatically to be traded for immediate fiscal policy The authors of these chapters articulate the reasons why such short term thinking will be detrimental to any approach to teacher education which commits itself to producing well rounded and comprehensively professional teachers

**Teacher Education in Transition** John Furlong,2000 The 1990s were a period of quite dramatic change for initial teacher education in England and Wales with wave after wave of Government sponsored reforms The changes introduced were highly controversial as those in higher education who were traditionally responsible for teacher education felt marginalized many believed that what was at stake in these reforms was the nature of teacher professionalism itself It was against this background of policy change and political ferment that the Economic and Social Research Council funded two successive research projects to evaluate the consequences of the reforms The projects known as MOTE Modes of Teacher Education included two national surveys as well as more detailed case studies of particular courses In this volume the authors draw upon these two major studies as well as more recent policy analysis to give a fascinating overview of the impact of policy change throughout the 1990s In doing so they also consider whether a new form of professionalism was indeed created BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved      **Proceedings**
