God In The Equation How Einstein Transformed Religion:

God in the Equation Corey Powell, 2003-08-12 Identifies the impact of Einstein's theories of relativity on the history of religion citing his self-rejected invention of Lambda to cite God's metaphysical role in the universe and considering such topics as dark energy and dark matter

My Einstein John Brockman, 2007-08-14 In this fascinating volume today's foremost scientists discuss their own versions and visions of Einstein how he has influenced their worldviews their ideas their science and their professional and personal lives These twenty-four essays are a testament to the power of scientific legacy and are essential reading for scientist and layperson alike Contributors include Roger Highfield on the Einstein myth John Archibald Wheeler on his meetings with Einstein Gino C Segrè Lee Smolin and Anton Zeilinger on Einstein's difficulties with quantum theory Leon M Lederman on the special theory of relativity Frank J Tipler on why Einstein should be seen as a scientific reactionary rather than a scientific revolutionary

Stargazing in the Atomic Age Anne Goldman, 2021-01-15 A Kirkus Best Book of the Year During World War II with apocalypse imminent a group of well-known Jewish scientists and artists sidestepped despair by challenging themselves to solve some of the most difficult questions posed by our age Many had just fled Europe Others were born in the United States to immigrants who had escaped Russia's pogroms Alternately celebrated as mavericks and dismissed as eccentrics they trespassed the boundaries of their own disciplines as the entrance to nations slammed shut behind them In *Stargazing in the Atomic Age* Anne Goldman interweaves personal and intellectual history in exuberant essays that cast new light on these figures and their virtuosic thinking In lyric-lucent sentences that dance between biography and memoir as they connect innovation in science with achievement in the arts Goldman yokes the central dramas of the modern age with the brilliant thinking of earlier eras Here Einstein plays Mozart to align mathematical principle with the music of the spheres and Rothko paints canvases whose tonalities echo the stark prose of Genesis Nearby Bellow evokes the dirt and dazzle of the Chicago streets while upon the heels of World War II Chagall illuminates stained glass no less buoyant than the effervescent notes of Gershwin's *Rhapsody in Blue* In these essays Goldman reminds readers that Jewish history offers as many illustrations of accomplishment as of affliction At the same time she gestures toward the ways in which experiments in science and art that defy partisanship can offer us inspiration during a newly divisive era

The Godless Delusion Joe Egan, 2009 In a recent work Richard Dawkins posed an immense challenge to theology by arguing on scientific grounds that the existence of God is so improbable that it can be safely dismissed as a delusion This work responds to the challenge by examining the arguments put forward by Dawkins and subjecting them to critique in the light of Christian faith The critique probes some of the assumptions underlying scientific endeavours about the nature of reality and it brings to the surface the question of how meaning truth and freedom are properly to be understood The work goes on to present a theological understanding of these realities in the light of Christian beliefs in God in Jesus Christ in creation and in redemption Far from denying the importance of scientific endeavours and discoveries this approach seeks to

Savage Peace Ann Hagedorn, 2007-04-10 Written with the sweep of an epic novel and grounded in extensive research into contemporary documents *Savage Peace* is a striking portrait of American democracy under stress It is the surprising story of America in the year 1919 In the aftermath of an unprecedented worldwide war and a flu pandemic Americans began the year full of hope expecting to reap the benefits of peace But instead the fear of terrorism filled their days Bolshevism was the new menace and the federal government utilizing a vast network of domestic spies began to watch anyone deemed suspicious A young lawyer named J Edgar Hoover headed a brand new intelligence division of the Bureau of Investigation later to become the FBI Bombs exploded on the doorstep of the attorney general's home in Washington D C and thirty six parcels containing bombs were discovered at post offices across the country Poet and journalist Carl Sandburg recently returned from abroad with a trunk full of Bolshevik literature was detained in New York his trunk seized A twenty one year old Russian girl living in New York was sentenced to fifteen years in prison for protesting U S intervention in Arctic Russia where thousands of American soldiers remained after the Armistice ostensibly to guard supplies but in reality to join a British force meant to be a warning to the new Bolshevik government In 1919 wartime legislation intended to curb criticism of the government was extended and even strengthened Labor strife was a daily occurrence And decorated African American soldiers returning home to claim the democracy for which they had risked their lives were badly disappointed Lynchings continued race riots would erupt in twenty six cities before the year ended and secret agents from the government's Negro Subversion unit routinely shadowed outspoken African Americans Adding a vivid human drama to the greater historical narrative *Savage Peace* brings 1919 alive through the people who played a major role in making the year so remarkable Among them are William Monroe Trotter who tried to put democracy for African Americans on the agenda at the Paris peace talks Supreme Court associate justice Oliver Wendell Holmes Jr who struggled to find a balance between free speech and legitimate government restrictions for reasons of national security producing a memorable decision for the future of free speech in America and journalist Ray Stannard Baker confidant of President Woodrow Wilson who watched carefully as Wilson's idealism crumbled and wrote the best accounts we have of the president's frustration and disappointment Weaving together the stories of a panoramic cast of characters from Albert Einstein to Helen Keller Ann Hagedorn brilliantly illuminates America at a pivotal moment
