GOING INSIDE

"A brilliant entrée to the highs and lows of the current state of the art of neuroscience. Here, at last, is a book on the brain where sentences sparkle. A true joy to read." **The Times**

Going Inside A Tour Around A Single Moment Of Consciousness

Errol E. Harris

Going Inside A Tour Around A Single Moment Of Consciousness:

Going Inside John McCrone, 2001 extrapolates our current understanding of consciousness from something that happens in less than the blink of an eye a single moment of the mind's inner workings Jacket *Understanding Consciousness* Max Velmans, 2009-03-26 Building on the widely praised first edition this book provides a unique survey and evaluation of consciousness studies along with an original analysis of consciousness that combines scientific findings philosophy and common sense The Ascent of Affect Ruth Leys, 2017-11-10 In recent years emotions have become a major vibrant topic of research not merely in the biological and psychological sciences but throughout a wide swath of the humanities and social sciences as well Yet surprisingly there is still no consensus on their basic nature or workings Ruth Leys's brilliant much anticipated history therefore is a story of controversy and disagreement *The Ascent of Affect* focuses on the post World War II period when interest in emotions as an object of study began to revive Leys analyzes the ongoing debate over how to understand emotions paying particular attention to the continual conflict between camps that argue for the intentionality or meaning of emotions but have trouble explaining their presence in non human animals and those that argue for the universality of emotions but struggle when the question turns to meaning Addressing the work of key figures from across the spectrum considering the potentially misleading appeal of neuroscience for those working in the humanities and bringing her story fully up to date by taking in the latest debates Leys presents here the most thorough analysis available of how we have tried to think about how we feel *Exploring Consciousness* Rita Carter, 2002 Building on the foundation of her bestselling book *Mapping the Mind* Carter ponders the nature origins and purpose of consciousness and includes topical essays from leading scholars 110 illustrations most in color **Reflections on the Problem of Consciousness** Errol E. Harris, 2006-05-07 The relation between body and mind has presented philosophy with its perennial problem It exercised the minds of Plato and Aristotle and it was implicit in the thought if not always present to the minds of the Presocratics In modern philosophy it became explicit in Descartes's *Meditations* and remained central to the deliberations of every subsequent philosopher of any significance from Hobbes to Hume from Spinoza to Hegel and from Husserl and Heidegger to Russell and Whitehead From whatever angle one approaches philosophy one cannot avoid this problem Moral philosophy both ethical and political compels one to adopt some conception of human nature its origins and status within the world for one cannot decide on the best way to live without considering the impact of natural influences on the human condition and of human behaviour on nature including other humans and these considerations at once raise the question of the relation of the human mind to Nature and the natural body it enlightens A philosophy of Nature must include the place of humanity in the natural scheme not only the human body but also the knowing mind Metaphysics cannot be divorced from Epistemology nor can that neglect the part played in the acquisition of knowledge by the bodily senses And clearly a philosophy of mind must include some vision of the relation of the mind to the body it inhabits **Does Consciousness Cause Behavior?** Susan

Pockett, William P. Banks, Shaun Gallagher, 2009 Continuing the debate over whether consciousness causes behaviour or plays no functional role in it leading scholars discuss the question in terms of neuroscience philosophy law and public policy

The Teacher's Toolkit Paul Ginnis, 2001-07-30 The Teacher's Toolkit provides an overview of recent thinking innovations in teaching and presents over fifty learning techniques for all subjects and age groups with dozens of practical ideas for managing group work tackling behavioural issues and promoting personal responsibility It also presents tools for checking your teaching skills from lesson planning to performance management

Consciousness Jeffrey Alan Gray, 2004 How does consciousness arise out of the functioning of the human brain This work presents an analysis of our conscious lives with profound implications for human nature

Towards a History of Consciousness Vwadek P. Marciniak, 2006 Towards a History of Consciousness Space Time and Death offers a cogent and compelling discussion of the neglected topic of the history of consciousness An analysis of our postmodern ontology reveals deep but neglected roots What are those roots and how did they grow Is there a self without consciousness What is the relation of the self to the individual Does the recognition of death contribute to the growth of consciousness As a survey of western history this work pushes the boundaries of the understanding of consciousness in intriguing and sometimes provocative directions This integrative study is intended for the serious curious student and thinker

Consciousness Anthony Freeman, 2003-10-10 An exciting introduction to consciousness research and its applications to our waking and sleeping moments Once the domain of philosophers the study of consciousness is now an exciting branch of science Author Anthony Freeman managing editor of the Journal of Consciousness Studies opens Consciousness with a history of mind study from the ancient Greeks to the present and provides a multidisciplinary review of cognitive science Freeman untangles the conflicting theories on the working of the brain analyzing the techniques developed for its study over the years Seeing v believing mind body connections zombies and assembly line robots are just the beginning Even chaos theory and quantum physics are relevant with opposing approaches inciting disciplinary battles This illustrated and accessible volume introduces key researchers like Wilder Penfield who talked with his conscious sister while operating on her brain tumor

Consciousness Susan Blackmore, Emily T. Troscianko, 2024-04-19 Now in its fourth edition this highly popular text is the definitive introduction to consciousness exploring the key theories and evidence in consciousness studies ranging from neuroscience and psychology to quantum theories and philosophy Written by mother and daughter author team Susan Blackmore and Emily Troscianko the book examines why the term consciousness has no recognised definition It also provides an opportunity to delve into personal intuitions about the self mind and consciousness Featuring comprehensive coverage of all core topics in the field the book explains why the problem of consciousness is so hard Theories of attention and free will altered states of consciousness and the differences between conscious and unconscious are all explored Written with students of psychology neuroscience and philosophy in mind this edition has been thoroughly updated throughout and includes expanded coverage of panpsychism

illusionism predictive processing adversarial collaboration psychedelics and AI Complete with key concept boxes profiles of well known thinkers and questions and activities designed for both independent study and group work Consciousness provides a complete introduction to this fascinating field and is essential reading for students of psychology philosophy and neuroscience

The Great Mosaic Eye Robin Allott, 2012-03-09 This is a revised and extended version of the Great Mosaic Eye originally published in 2001 There have been major changes in neuroscience and in language research since then Apparently disparate segments of research have started to come together and it is necessary to recast both the structure and the content of the book The extended title of the book with the addition of the word Society reflects this Another important change is that the book as originally published fell into two halves part 1 being the text of the book and part 2 an inserted CD which included a great deal of additional material that made possible important graphical and video content not easily presented in text form This new edition attempts to integrate all the material contained in the earlier edition but relying on links to the Internet for material in place of that contained in the inserted CD This new book as indeed was the case for the earlier version was intended to bring together a mass of material which had been published separately over more than 40 years under the titles The Physical Foundation of Language first published 1973 and recently reprinted The Motor Theory of Language 1989 The Natural Origin of Language The Structural Inter relation of Language Vision and Action The Child and the World How the child acquires language How language mirrors the world 2005 All these are now in print so that it is not necessary to repeat in this book much of the extensive discussion in the earlier books all supplemented by other recent material readily accessible on the Internet at [New Perspectives in Indian Science and Civilization](#) Makarand R. Paranjape, 2019-08-12 This book examines key aspects of the history philosophy and culture of science in India especially as they may be comprehended in the larger idea of an Indian civilization The authors drawn from a range of disciplines discuss a wide array of issues scientism and religious dogma dialectics of faith and knowledge science under colonial conditions science and study of grammar western science and classical systems of logic metaphysics and methodology and science and spirituality in the Mahabharata This collection of essays aims to evolve a framework in which science culture and society in India may be studied fruitfully across disciplines and historical periods With its diverse themes and original approaches the book will be of interest to scholars and researchers in the fields of the history and philosophy of science science and religion cultural studies and colonial studies philosophy and history as well as India studies and South Asian studies

[The Theory & Practice of Teaching](#) Peter Jarvis, 2002 This text will introduce teachers to the approaches techniques theories and methods of teaching It looks in detail at the teaching techniques that can be called upon at different times and in different situations and how they can be used

Fictional Minds Alan Palmer, 2004-01-01 Readers create a continuing consciousness out of scattered references to a particular character and read this consciousness as an embedded narrative within the whole narrative of the novel The combination of these embedded narratives forms the plot This perspective on narrative enables us

to explore hitherto neglected aspects of fictional minds such as dispositions emotions and action It also highlights the social public and dialogic mind and the mind beyond the skin For example much of our thought is intermental or joint group or shared even our identity is to an extent socially distributed

Culpable Carelessness Findlay Stark,2016-10-20 A doctrinal and theoretical analysis of culpability for unjustified risk taking in Anglo American criminal law

The Mind Illuminated John Yates,Matthew Immergut,Jeremy Graves,2017-01-03 The Mind Illuminated is the first how to meditation guide from a neuroscientist who is also an acclaimed meditation master This innovative book offers a 10 stage program that is both deeply grounded in ancient spiritual teachings about mindfulness and holistic health and also draws from the latest brain science to provide a roadmap for anyone interested in achieving the benefits of mindfulness Dr John Yates offers a new and fascinating model of how the mind works including steps to overcome mind wandering and dullness extending your attention span while meditating and subduing subtle distractions This groundbreaking manual provides illustrations and charts to help you work through each stage of the process offering tools that work across all types of meditation practices

Buddhist Dictionary Nyanatiloka Thera,2004-12-01 Since its first publication in 1952 Buddhist Dictionary has been a trusted companion and helper in the study of Buddhist literature The author Nyanatiloka Thera was qualified as few others have ever been to serve as a reliable guide through the field of Theravada Buddhist terminology and doctrine In this book he offers authentic and lucid explanations of Pali Buddhist terms with cross references in English and source references as well Amidst the welter of modern works on Buddhism and translations differing one from the other this book will help in identifying the doctrinal terms and in correcting misleading renderings Not a mere word dictionary but an aid to the terminology of Theravada Buddhism Buddhist Dictionary will be as helpful to the serious lay student as to the professional scholar

Contemplative Science B. Alan Wallace,2007 B Alan Wallace renowned Buddhist scholar integrates the contemplative methodologies of Buddhism and Western science into a single discipline contemplative science The science of consciousness investigates the mind through Buddhist contemplative techniques such as shamatha an organized detailed system of training the attention Just as scientists make observations and conduct experiments with the aid of technology contemplatives have long tested their theories with the help of highly developed meditative skills of observation and experimentation Contemplative science allows for a deeper knowledge of

mental phenomena and its emphasis on strict mental discipline counteracts the effects of conative intention and desire attentional cognitive and affective imbalances Just as behaviorism psychology and neuroscience shed light on the cognitive processes enabling us to survive and flourish contemplative science offers a groundbreaking perspective for expanding our capacity to realize genuine well being It also forges a link between the material world and the realm of the subconscious transcending a traditional science based understanding of the self
