Going Global Us Government Policy And The Defense Aerospace Industry:

Going Global? Mark A. Lorell, Julia F. Lowell, Richard M. Moore, Victoria A. Greenfield, Katia Vlachos, 2002-12-24 The increasing consolidation of the defense aerospace industry brought about by post Cold War reductions in defense authorizations has led to the proliferation of cross border relationships between U S and European firms This report examines aerospace industry globalization trends with a view toward determining how the U S Air Force can best exploit such trends while minimizing their risks It concludes that further research must be done to ascertain how the advantages of globalization such as increased competition and interoperability can best be achieved without compromising security concerns *Going Global?*, 2002 *Going Global? U.S. Government Policy and the Defense Aerospace Industry*, 2002 In fiscal year 2001 the U S Air Force tasked RAND with providing an analysis to help it respond to the potential new opportunities and problems arising from an increasingly globalized and consolidated aerospace industrial base Between 1990 and 1998 a horizontal and vertical integration took place across all segments of the U S aerospace industry The number of credible U S prime contractors for integrating fighters and bombers fell from seven to two the number of U S missile manufacturers from fourteen to four and the number of space launch vehicle producers from six to two By the end of the 1990s the European defense aerospace industry had also begun to experience a dramatic cross border consolidation and restructuring This growing consolidation of defense prime integrators and subsystem suppliers has resulted in increased numbers of strategic and product specific alliances international teaming and joint ventures and cross border mergers and acquisitions M As among defense firms together with heightened interest in foreign exports and foreign lower tier suppliers

The DISAM Journal of International Security Assistance Management, 2004 *American Technology Policy* J. D. Kenneth Boutin, 2013 Balancing the requirements of national security and economic competitiveness **Ethical Dilemmas in the Global Defense Industry** Daniel Schoeni, Tobias Vestner, 2023-03-17 The defense industry develops produces and sells weapons that cause great harm It operates at the intersection of the public and private sectors with increased reliance on technology companies This book brings together the diverse perspectives of scholars and practitioners from academia government service the military and the private sector to discuss the moral and legal challenges facing the global defense industry and to introduce solutions that are innovative effective and practical *The Rise of European Security Cooperation* Seth G. Jones, 2007-02 A systematic and comprehensive analysis of the significant increase in security cooperation among European states **Globalisation and Defence in the Asia-Pacific** Geoffrey Till, Emrys Chew, Joshua Ho, 2009

Through the Global Lens Michael Strada, 2021-04-14 Through the Global Lens uses a global perspective to analyze human affairs This text looks at each of the six social sciences sociology anthropology political science economics psychology and geography and uses case studies feature film analyses maps and photos to highlight important historical events and concepts throughout **Fortifying China** Tai Ming Cheung, 2013-04-15 Fortifying China explores the titanic struggle to

turn China into an aspiring world class military technological power The defense economy is leveraging the country s vibrant civilian economy and gaining access to foreign sources of technology and know how Drawing on extensive Chinese language sources Tai Ming Cheung explains that this transformation has two key dimensions The defense economy is being reengineered to break down bureaucratic barriers and reduce the role of the state fostering a more competitive and entrepreneurial culture to facilitate the rapid diffusion and absorption of technology and knowledge At the same time the civilian and defense economies are being integrated to form a dual use technological and industrial base In Cheung s view the Chinese authorities believe this strategy will play a key role in supporting long term defense modernization For China s neighbors and the United States understanding China s technological industrial and military capabilities is critical to the formulation of economic and security policies Fortifying China provides crucial insight into the impact of China s dual use technology strategy Cheung s systems of innovation framework considers the structure dynamics and performance of the defense economy from a systems level perspective

The Global Arms Trade Andrew T. H. Tan, 2014-05-22 The Global Arms Trade is a timely comprehensive and in depth study of this topic a phenomenon which has continued to flourish despite the end of the Cold War and the preoccupation with global terrorism after 11 September 2001 It provides a clear description and analysis of the demand for and supply of modern weapons systems and assess key issues of concern This book will be especially useful to scholars policy analysts those in the arms industry defence professionals students of international relations and security studies media professionals government officials and those generally interested in the arms trade

Critical Technology Accessibility National Research Council, Division on Engineering and Physical Sciences, Committee on Critical Technology Accessibility, 2006-06-15 In 2003 the Defense Intelligence Agency asked the NRC to form a standing committee to help develop study topics about technology warning One issue that was identified was the growing dependence on foreign suppliers of critical technology as a result of the increase in globalization of economic activity Two important questions emerged for study what is the risk of denial of critical products from foreign sources and what must the United States do to assure access to future critical products and technologies This report presents an assessment addressing those two questions It also provides an analysis of a strategic approach to manage the consequences of this trend towards increased globalization Finally the report offers a set of recommendations to implement this strategy and to increase assurance of access to critical technologies

War as Business Armin Krishnan, 2016-03-03 The privatization of defence assets and the outsourcing of military services from the armed forces to the private sector is an increasing trend This book approaches the issue of military privatization by linking it to the transformation of the defence industries since the early 1990s and shows the extent to which many military functions and activities ranging from military research to military consulting training to operational support services have already been outsourced in the US and in Europe This detailed study provides new and updated information on the ongoing privatization of the defence sector and offers an original theoretical

explanation as to why the most modern armed forces throughout the world have come increasingly to rely on private companies for nearly everything they do Contributing to a better understanding of military privatization and its close connection to technological change the book explains the complexity of the whole phenomenon and discusses its implications for national and international security

Designing and Managing Successful International Joint Development

Programs Gregory Sanders,Samantha Cohen,2017-02-20 International joint development programs are important because of their potential to reduce costs and increase partnership benefits such as interoperability economies of scale and technical advancement While all major development and acquisition programs are complex undertakings international joint development programs introduce additional layers of complexity in the requirement for coordination with more than one government customer supply chain and organizational complexities resulting from international industrial teaming and technology control issues The performance of international joint development programs varies greatly This study compares the best practices of international joint development and domestic development programs through case study analysis to identify the key variables that contribute to a program s eventual success or failure and to understand the elements that are crucial to managing these programs

Globalization and Security Relations across the Taiwan Strait

Ming-chin Monique Chu,Scott L. Kastner,2014-11-27 This book presents an interdisciplinary examination of cross Taiwan Strait relations and the complex dynamics at play in the region Since the election of Ma Ying jeou as Taiwan s president in 2008 the relationship across the Taiwan Strait long viewed as one of Asia s most volatile potential flashpoints has experienced a remarkable d tente Whether the relationship has been truly transformed however remains an open question and the Taiwan Strait remains a central regional and global security issue A return to turbulence in the Taiwan Strait could also add a new dimension of instability in the already tense maritime disputes in the East and South China Seas While the relationship across the Taiwan Strait remains critically important it is also changing rapidly and the chapters in this volume present new thinking to help make sense of complex cross Strait dynamics Specifically these essays explore different security and or globalization dimensions of China Taiwan ties as well as the globalization security linkages that have emerged As the balance of power in Asia shifts dramatically several chapters in this volume explore how traditional security forces are evolving At the same time there are new dynamics emerging as a consequence of globalization forces such as the tremendous economic and social integration across the Taiwan Strait and several chapters in this volume consider some of these new problems Finally several chapters consider the often under researched dynamics associated with the globalization security interface such as cyber threats transnational criminal networks and the security spill over impact of production globalization This book will of much interest to students of Chinese Politics Asian Security globalisation diplomacy and International Relations

The Air

Force Law Review ,2016 Is War Necessary for Economic Growth? Vernon W. Ruttan,2006-01-05 Military and defense related procurement has been an important source of technology development across a broad spectrum of industries that

account for an important share of United States industrial production In this book the author focuses on six general purpose technologies interchangeable parts and mass production military and commercial aircraft nuclear energy and electric power computers and semiconductors the INTERNET and the space industries In each of these industries technology development would have occurred more slowly and in some case much more slowly or not at all in the absence of military and defense related procurement The book addresses three questions that have significant implications for the future growth of the United States economy One is whether changes in the structure of the United States economy and of the defense industrial base preclude military and defense related procurement from playing the role in the development of advanced technology in the future comparable to the role it has played in the past A second question is whether public support for commercially oriented research and development will become an important source of new general purpose technologies A third and more disturbing question is whether a major war or the threat of major war will be necessary to mobilize the scientific technical and financial resources necessary to induce the development of new general purpose technologies When the history of United States technology development in the next half century is written it will focus on incremental rather than revolutionary changes in both military and commercial technology It will also be written within the context of slower productivity growth than of the relatively high rates that prevailed in the United States in the 1950s and 1960s or during the information technology bubble that began in the early 1990s These will impose severe constraints on the capacity of the United States to sustain a global class military posture and a position of leadership in the global economy

China and US Foreign Investment Laws and Practices Liu Ziyu, 2024-11-08 The book is a comparative study of the national security review of foreign investment laws in China and the US The author establishes a theoretical framework to explain the dominant role of ideas on national security and foreign investment rooted in China and the US as well as the oriented role of China US investment interaction She concludes that it is difficult for China and the US to reach a consensus on national security review due to their different internal ideas on national security and foreign investment By comparing the similarities and differences in the development of national security review in China and the US she also proposes a feasible approach to facilitate bilateral investment practices The book will attract scholars of international economic law investment law and Sino US relations

Canadian Defence Industry in the New Global Environment Alistair D. Edgar, David G. Haglund, 1995-05-01 Alistair Edgar and David Haglund examine changes in the international demand for defence products in the post Cold War era review the reorganization and rationalization of the supply side of the international defence market through various government policy initiatives and corporate strategies and discuss the ways in which the Canadian government and defence producers have attempted to cope with this new and uncertain international environment They also explore the international and domestic contexts military economic and political within which defence industries operate Edgar and Haglund s analysis draws on extensive interviews with political and industry leaders military personnel and government officials from Canada

the United States the United Kingdom France Belgium the Netherlands Norway Denmark Spain and Germany This timely study of the domestic American and other NATO defence markets will interest scholars and students of Canadian defence policy Canadian foreign policy and Canadian external relations and public servants politicians and personnel in the industry

Knowledge Management in Action Mark S. Ackerman, Rose Dieng, Carla Simone, Volker Wulf, 2008-07-09 International Federation for Information Processing The IFIP series publishes state of the art results in the sciences and technologies of information and communication The scope of the series includes foundations of computer science software theory and practice education computer applications in technology communication systems systems modeling and optimization information systems computers and society computer systems technology security and protection in information processing systems artificial intelligence and human computer interaction Proceedings and post proceedings of refereed international conferences in computer science and interdisciplinary fields are featured These results often precede journal publication and represent the most current research The principal aim of the IFIP series is to encourage education and the dissemination and exchange of information about all aspects of computing For more information about the 300 other books in the IFIP series please visit www.springer.com For more information about IFIP please visit www.ifip.org

This is likewise one of the factors by obtaining the soft documents of this **Going Global Us Government Policy And The Defense Aerospace Industry** by online. You might not require more epoch to spend to go to the book opening as capably as search for them. In some cases, you likewise get not discover the notice Going Global Us Government Policy And The Defense Aerospace Industry that you are looking for. It will very squander the time.

However below, when you visit this web page, it will be for that reason unquestionably easy to acquire as with ease as download lead Going Global Us Government Policy And The Defense Aerospace Industry

It will not put up with many epoch as we explain before. You can do it even though play a part something else at home and even in your workplace. suitably easy! So, are you question? Just exercise just what we provide below as skillfully as evaluation **Going Global Us Government Policy And The Defense Aerospace Industry** what you with to read!
