Mathematical Knowledge and the Interplay of Practices José Ferreirós, 2015-12-22 This book presents a new approach to the epistemology of mathematics by viewing mathematics as a human activity whose knowledge is intimately linked with practice Charting an exciting new direction in the philosophy of mathematics Jos Ferreir s uses the crucial idea of a continuum to provide an account of the development of mathematical knowledge that reflects the actual experience of doing math and makes sense of the perceived objectivity of mathematical results Describing a historically oriented agent based philosophy of mathematics Ferreir s shows how the mathematical tradition evolved from Euclidean geometry to the real numbers and set theoretic structures He argues for the need to take into account a whole web of mathematical and other practices that are learned and linked by agents and whose interplay acts as a constraint Ferreir s demonstrates how advanced mathematics far from being a priori is based on hypotheses in contrast to elementary math which has strong cognitive and practical roots and therefore enjoys certainty Offering a wealth of philosophical and historical insights Mathematical Knowledge and the Interplay of Practices challenges us to rethink some of our most basic assumptions about mathematics its objectivity and its relationship to culture and science

Networks and Practices of Connoisseurship

in the Global Eighteenth Century Valérie Kobi, Kristel Smentek, Chonja Lee, 2023-12-31 The 18th century was the age of the connoisseur. It was also an era of an expanding global consciousness born of accelerating trade and imperial conquest. This volume puts into dialogue the consolidation of connoisseurship as an empirical mode of artistic analysis in Europe and Asia and the increasing exposure to different modes of artmaking facilitated by local and global networks over the course of the long 18th century. Focusing on exchanges between India, Japan, China, and Europe, the contributors to this volume examine the complex and nuanced impacts on connoisseurial practice of encounters with artworks from different regions of the globe, the international networks that made those encounters possible, and the intricate transactions through which connoisseurial knowledge of art was generated. Expansive focus on practices and networks in India, Japan, and Europe in the 18th century. Complexities and asymmetries of connoisseurship in an expanding world.
