Educated In Romance:

Educated in Romance Dorothy C. Holland, 1990 Is romance more important to women in college than grades are Why do so many women enter college with strong academic backgrounds and firm career goals but leave with dramatically scaled down ambitions Dorothy C Holland and Margaret A Eisenhart expose a pervasive culture of romance on campus a high pressure peer system that propels women into a world where their attractiveness to men counts most Methods of Rhetorical Criticism Bernard L. Brock, Robert Lee Scott, James W. Chesebro, 1989 **Genders 19** Ann M. Kibbey, Kayann Short, Abouali Farmanfarmanian, 1994-09 Sexual Artifice marks the evolution of *Genders* from a triannual journal to a biannual anthology Henceforth each volume will have a focus on a particular gender related issue offering original essays on the specific theme This volume proposes that there is something more to the social construction of gender than what social science has been able to describe On the contested state of international politics public imagery and nationalist cinema the artifice of sexuality wields an enormous power to influence the interpretation of our social selves and the world we live in These essays collectively explore the art of constructing gender in symbolic media images in poetry photography and montage in dramatic identity politics and last but not least in contemporary feminism itself With original essays on Virginia Woolf's Orlando Anita Hill Clarence Thomas and the culture of romance Valerie Solanis the woman who shot Andy Warhol male hysteria and the U S invasion of Panama and representations of women in Northern Ireland Sexual Artifice offers up some of the most thought provoking and daring young scholarship in contemporary cultural and gender studies go to the *Genders* website **Women, Love and Learning** Alison Mackinnon, 2010 This book tells the story of a generation of American and Australian women who embodied and challenged the prescriptions of their times In the 1950s and early 60s they went to colleges and universities trained for professions and developed a life of the mind They were also urged to embrace their femininity to marry young to devote themselves to husbands children and communities Could they do both While they might be seen as a privileged group they led the way for a multitude in the years ahead They were quietly making the revolution that was to come Did they have the best of all possible worlds Or were they caught in a double bind Sylvia Plath's letters tell of her delighted sense of life opening before her as a college girl Her poetry however tells of anguish of reaching for distant goals Drawing on interviews surveys reunion books letters biographical and autobiographical writing from both American and Australian women this cultural history argues that the choices that faced educated women in that time led to the revolution of the late 1960s and 70s Something had to give There are lessons here for today's young women facing again conflicting expectations Is it possible they ask to have it all Leaders in Gender and Education Marcus B. Weaver-Hightower, Christine Skelton, 2013-09-04 Gender studies are a key lens through which education has been examined in the past forty years having become an accepted and popular subfield in educational foundations studies Moreover scholars in gender and education have made tremendous contributions well beyond education influencing humanities and social

sciences scholars across the academy Hearing the stories of these scholars their development education important works and thoughts on the future offers unique insights into the genesis and growth of the field and gives new scholars an overview of advances made Leaders in Gender and Education Intellectual Self Portraits does just that showing the history of gender and education through the eyes of 16 of its leaders By recounting their experiences and scholarly work they trace the development of feminist and profeminist research on girls on boys and on the issues shaping both gender and education issues like race sexuality neoliberalism globalization and more Importantly the volume has a global focus including scholars from the United States Canada the United Kingdom and Australia This diversity gives readers a broad sense of the progress of gender scholarship in education around the world Each essay provides students and researchers alike with not only background on the 16 scholars included but also the lists of major works chosen by contributors themselves direct readers to some of the most important scholarship on gender and education Taken together further the contributors thoughts on the future of the field provide glimpses of productive directions for studies of gender and education

Love in Africa Jennifer Cole, Lynn M. Thomas, 2009-08-01 In recent years scholarly interest in love has flourished Historians have addressed the rise of romantic love and marriage in Europe and the United States while anthropologists have explored the ways globalization has reshaped local ideas about those same topics Yet love in Africa has been peculiarly ignored resulting in a serious lack of understanding about this vital element of social life a glaring omission given the intense focus on sexuality in Africa in the wake of HIV AIDS Love in Africa seeks both to understand this failure to consider love and to begin to correct it In a substantive introduction and eight essays that examine a variety of countries and range in time from the 1930s to the present the contributors collectively argue for the importance of paying attention to the many different cultural and historical strands that constitute love in Africa Covering such diverse topics as the reception of Bollywood movies in 1950s Zanzibar the effects of a Mexican telenovela on young people's ideas about courtship in Niger the models of romance promoted by South African and Kenyan magazines and the complex relationship between love and money in Madagascar and South Africa Love in Africa is a vivid and compelling look at love's role in African society

Social Variation and the Latin Language J. N. Adams, 2013-05-23 Languages show variations according to the social class of speakers and Latin was no exception as readers of Petronius are aware The Romance languages have traditionally been regarded as developing out of a language of the common people Vulgar Latin but studies of modern languages demonstrate that linguistic change does not merely come in the social sense from below There is change from above as prestige usages work their way down the social scale and change may also occur across the social classes This book is a history of many of the developments undergone by the Latin language as it changed into Romance demonstrating the varying social levels at which change was initiated About thirty topics are dealt with many of them more systematically than ever before Discussions often start in the early Republic with Plautus and the book is as much about the literary language as about informal varieties
