Monsters in the Classroom: Noam Chomsky, Human Nature, and Education Philip G. Hill, 2023 In this lucid original and comprehensive work the articulated approaches to pedagogy are based on specific conceptions of human nature Drawing on a vast range of Chomsky's prodigious output in linguistics politics biology cognitive science and education Hill highlights two fundamental elements of Chomsky's understanding of human nature and uses these elements as the foundation of a highly creative approach to pedagogy The originality of the work is apparent in the way the author identifies how key ideas in Chomsky's linguistics and political discourse are rooted in a liberatory approach to education The value of the work lies in its practical nature Even though it makes reference to ideas in various academic disciplines the work's overall value is reflected in the way ideas relate to Hill's personal teaching experiences and how they apply in a concrete classroom setting The reader is offered a practical and highly creative way to apply Chomsky's understanding of human nature in a classroom setting

Education, Privatisation and Social Justice Ian Macpherson, Susan Robertson, Geoffrey Walford, 2014-05-12 The involvement of private actors in education is not new yet in the last decade critical issues have arisen that demand close scrutiny This volume explores emerging forms of the private through case studies from Africa South Asia and South East Asia and makes three related observations First what is new about these manifestations is their scale scope and penetration into almost all aspects of the education endeavour from the administrative apparatus to policymaking and from formal provision in education settings to out of school activities such as private tutoring Second what is particularly controversial about these developments is how education itself is being recast as a sector it is increasingly being opened up to profit making and trade and to agenda setting by private commercial interests Third the learner is increasingly conceptualised as a consumer and education a consumer good The case studies therefore enable us to see more clearly how different forms of the private in education alter what is at stake for whom and with what outcomes and the consequences for individuals and societies In turn these raise the very important question about what they mean for our conceptualisations of education learning and teaching

on the one hand and for education as a site and means for emancipation on the other These are profound social justice concerns and ones that make this volume distinctive This book sets out to address these hard but urgent questions and will be of interest to academics and students of education education researchers government personnel and policymakers
