## **Education Fever Society Politics And The Pursuit Of Schooling In South Korea:**

Education Fever Michael J. Seth, 2002-09-30 In the half century after 1945 South Korea went from an impoverished largely rural nation ruled by a succession of authoritarian regimes to a prosperous democratic industrial society No less impressive was the country's transformation from a nation where a majority of the population had no formal education to one with some of the world's highest rates of literacy high school graduates and university students Drawing on their premodern and colonial heritages as well as American education concepts South Koreans have been largely successful in creating a schooling system that is comprehensive uniform in standard and universal The key to understanding this educational transformation is South Korean society's striking nearly universal preoccupation with schooling what Koreans themselves call their education fever This volume explains how Koreans concern for achieving as much formal education as possible appeared immediately before 1945 and quickly embraced every sector of society Through interviews with teachers officials parents and students and an examination of a wide range of written materials in both Korean and English Michael Seth explores the reasons for this social demand for education and how it has shaped nearly every aspect of South Korean society He also looks at the many problems of the Korean educational system the focus on entrance examinations which has tended to reduce education to test preparation the overheated competition to enter prestige schools the enormous financial burden placed on families for costly private tutoring the inflexibility created by an emphasis on uniformity of standards and the misuse of education by successive governments for political purposes

Understanding PISA's Attractiveness Florian Waldow, Gita Steiner-Khamsi, 2019-05-02 Understanding PISA's Attractiveness examines how policy makers and the media interpret the results of PISA league leaders losers and slippers in ways that suit their own reform agendas As a result a myriad of explanations exist as to why an educational system is high or low performing The chapters written by leading scholars from Australia Austria Denmark Finland Germany Norway Singapore South Korea Spain Sweden Taiwan the UK and the USA provide a fascinating account of why results from PISA and other international large scale assessments are interpreted and translated differently in the various countries The analyses in this book bring to light the wide array of idiosyncratic projections into these international tests In some countries these tests are also used to scandalise one's own educational system and to generate quasi external reform pressure Compiled by two leading scholars in comparative education Florian Waldow and Gita Steiner Khamsi this book offers a truly global perspective on the uses and abuses of PISA and will be of great interest to students and academics working in educational policy comparative education and political science and those working on large scale data sets

**Korean Families Yesterday and Today** Hyunjoon Park,Hyeyoung Woo,2020-02-12 Korean families have changed significantly during the last few decades in their composition structure attitudes and function Delayed and forgone marriage fertility decline and rising divorce rates are just a few examples of changes that Korean families have experienced at a rapid pace more dramatic than in many other contemporary societies Moreover the increase of marriages between Korean men and foreign women has further diversified Korean families Yet traditional norms and attitudes toward gender and family continue to shape Korean men and women s family behaviors Korean Families Yesterday and Today portrays diverse aspects of the contemporary Korean families and by explicitly or implicitly situating contemporary families within a comparative historical perspective reveal how the past of Korean families evolved into their current shapes While the study of families can be approached in many different angles our lens focuses on families with children or young adults who are about to forge family through

marriage and other means This focus reflects that delayed marriage and declined fertility are two sweeping demographic trends in Korea affecting family formation Moreover intensive parenting has characterized Korean young parents and therefore examining change and persistence in parenting provides important clues for family change in Korea This volume should be of interest not only to readers who are interested in Korea but also to those who want to understand broad family changes in East Asia in comparative perspective

**Social and Emotional Learning as Foundation for Future Readiness** Chong Myung Park, Lea Ferrari, Andreea-Diana Scoda, Nurten Karacan Ozdemir, Gloria Marsay, V. Scott H. **Qualities of Education in a Globalised World** Diane Brook Napier, 2014-09-11 In a growing revisionist tradition comparative educational scholars challenge conventional assumptions about quality education as a singular undertaking dominated by standardised assessments and globalisation influences The contributors to this volume illustrate the complexities and global dimensions of educational quality that emerged in their research Several chapters critique educational reforms employing assessments aligned to global standards and large scale assessments revealing how considerations of contextual factors internal needs and local traditions are essential for developing a quality curriculum or for overhauling a national education system Most chapters interrogate the uses and misuses of standardised assessment results The contributors reveal the importance of asking critical questions about quality education how to access it and for what purposes what contextual and cultural factors are important what implementation issues and local level realities must be considered for true understanding of standardized assessment results what content skills and values are necessary and desirable ingredients what roles teachers and administrators play and what benefits accrue in terms of outcomes for employment and labor market needs or for achieving autonomy and stakeholder participation Critiques of narrow interpretations of standardised assessment data contrast with research based evidence that participation in large scale assessments such as PISA TIMSS and PIRLS can indeed be beneficial to identify needed reform refinements and implementation shortcomings Specific country cases include Brazil

Canada the United States Spain Portugal Ukraine Kyrgyzstan and the Philippines Other chapters provide insights on quality education issues worldwide The volume offers readers a panorama of views on the diversity of paths to quality education

**South Korea's Demographic Dividend** Elizabeth Hervey Stephen, 2019-01-14 South Korea's Demographic Dividend Echoes of the Past or Prologue to the Future weaves together the compelling story of social and demographic effects of the economic miracle in South Korea This exploration of social change examines the demographic dividend a window of time when a large percentage of a country's population is in the working ages as a result of low fertility and declining mortality The working age population benefits from a relatively small dependent population as the size of the elderly cohort is small and the percentage of children is decreasing This allows the working age cohort to amass savings and increase productivity But what happens when that demographic dividend comes to a close and the working age population must support a large elderly population For centuries South Koreans relied on the intergenerational Confucian contract whereby parents supported children with the reciprocal expectation that children would support their parents in their older years In South Korea's Demographic Dividend Dr Stephen examines what happens to families and the larger society when this contract is broken The book concludes with proposed policies that address the maintenance of social cohesion in light of structural changes in the personal and public spheres as a result of Korea's unprecedented economic growth *What Matters? **The Risk of Compressed Modernity** Chang Kyung-Sup,2025-07-11 In many Asian societies the process of modernization often took place in a rapid and highly compressed fashion not over centuries as had happened in most Western societies but in several decades This enabled Asian societies to achieve high levels of economic growth very quickly but it also harbored unexpected risks and costs that

threatened further development. The very mechanisms and strategies that made their explosive modernization possible tended to produce existentially hazardous consequences in virtually all areas of public and private life and seemingly insurmountable obstacles to sustained advances in the future. Focusing on South Korea and other Asian countries, this book presents a critical account of compressed modernity and its key structural risks. These include endemic political crises, distorted industrial governance, widespread labor displacement, worsening intellectual and cultural dependency, rampant environmental and physical hazards, and even abrupt demographic meltdown. However, these risks and contradictions have also stimulated structural reforms and adaptations, opening up the possibility for the kind of radical change that Ulrich Beck described as the metamorphosis of the world. **IJER Vol 19-N3** International Journal of Educational Reform, 2010-11-16

The mission of the International Journal of Educational Reform (IJER) is to keep readers up to date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities. As the only peer-reviewed scholarly publication that combines authors' voices without regard for the political affiliations, perspectives, or research methodologies, IJER provides readers with a balanced view of all sides of the political and educational mainstream. To this end, IJER includes but is not limited to inquiry-based and opinion pieces on developments in such areas as policy, administration, curriculum, instruction, law, and research. IJER should thus be of interest to professional educators with decision-making roles and policymakers at all levels, since it provides a broad-based conversation between and among policymakers, practitioners, and academicians about reform goals, objectives, and methods for success throughout the world. Readers can call on IJER to learn from an international group of reform implementers by discovering what they can do that has actually worked. IJER can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes. Finally, it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U.S. and the world.

Scientific Methods in Educational Technology Dr. Anita Sharma, 2022-01-16

Scientific Methods in Educational Technology Technology provides tools to try out different designs so that instead of theories of education we may begin to develop a science of education. But it cannot be an analytic science like physics or psychology; rather, it must be a design science more like aeronautics or artificial intelligence. For example, in aeronautics the goal is to elucidate how different designs contribute to lift, drag, maneuverability, etc. Similarly, a design science of education must determine how different designs of learning environments contribute to learning, cooperation, motivation, etc. Educational technologists would not therefore consider the computer as just another piece of equipment. If educational technology is concerned with thinking carefully about teaching and learning, then a computer has a contribution to make irrespective of its use as a means of implementation. For the design of computer-based learning environments gives us a new perspective on the nature of teaching and learning and indeed on general educational objectives. Even from a pure engineering perspective, it doesn't make much

sense to talk about Educational Technology just in terms of Instructional design models or instructional design methods An instructional designer also feels concerned by more fundamental disciplines like general learning theory or pedagogical theory These theories provide interesting insights on issues like the relation between learning type or learning level and appropriate pedagogic strategy how effect and motivation may influence the learning process what multimedia design can learn from theories on human information processing or cognitive load why metacognition and collaborative learning is important etc The book will be of use to the students researchers and general readers of this subject Contents Education International Education Teacher Education and School Counselor Role of Self Activity Educational Projects Practices and Global Partnerships A Comparative Studies Perspective Hypermedia Development Methodology The Technology in Education On line Technology Integration Challenges and Opportunities Test Development      **The Impact of Self-Concept on Language Learning** Kata Csizér,Michael Magid,2014-08-27 This edited volume seeks to highlight the effects of self concept on L2 learning and teaching by considering a wide range of theories as well as their practical application The book is divided into four sections and includes chapters discussing various approaches related to self concept empirical studies related to the selves of the learners research from teachers perspectives on students self concept and L2 motivational intervention studies associated with the development of self concept of language learners The volume contains a collection of studies from around the world Central Europe Canada Asia and Australia which were carried out using a variety of research methods and have a range of foci including adult and young learners public and private education foreign and second language settings and teacher and learner motivation      **Handbook of Research in the Social Foundations of Education** Steven Tozer,Bernardo P. Gallegos,Annette Henry,Mary Bushnell Greiner,Paula Groves Price,2011-07-05 This groundbreaking volume helps readers understand the history evolution and significance of this wide ranging often misunderstood and increasingly important field of study
