Statistical Abstract of the United States ,1984 **Manpower Research Monograph** ,1971 *Investment in Learning* Howard R. Bowen, 1997-03-26 Publisher Description **Investment in Learning** Howard Bowen, 2018-01-16 The value of higher education has been under attack as seldom before in American history We are told of the overeducated American of the case against college and of the failure of education to contribute significantly to the reduction of inequality In this environment republication of an exceptionally comprehensive and judicious analysis of all that has been learned and not learned about the consequences of American higher education comes at a most appropriate time Investment in Learning more fully covers the various aspects of this subject than any yet to appear Howard Bowen is optimistic about higher education but his viewpoint is based on profound knowledge of both the economic and social aspects of education Unlike some economists who insist on a strict cost benefit analysis of expenditures on higher education in relation to outcomes Bowen argues that the non monetary benefits are far greater to the point that individual and social decisions should be made primarily on those broader indicators Cameron Fincher in his new opening for the book notes that Publication of Howard Bowen s *Investment in Learning* was like a break in a long summer drought It was a comprehensive rebuttal to return on investment studies with negativistic findings And in the foreword to the book Clark Kerr simply says Howard Bowen is better prepared to survey the overall consequences of higher education in the United States than anyone else *Higher Education Finance* Edward R. Higher Education and Economic Growth William E. Becker Jr., D.R. Lewis, 2013-03-09 After decades of effortless growth and prosperity America's postsecondary institutions of education have come under increasing financial stress and waning public support In part this stress reflects a slowdown in the real rate of national economic growth and the loss of federal and state revenues for education generally It also reflects a trend of state legislatures simply giving higher education an ever lower ranking on the list of funding priorities Postsecondary educational institutions in the United States will continue to face increasing financial stress and waning public support as critics question the contribution of higher education to economic growth which historically has been a major rationale for funding Unless the trends in education financing can be changed higher education can be expected to stagnate What if anything can be done As a starting point advocates of higher education need to more fully recognize the important ways in which higher education influences technological change and also is influenced by that change As demonstrated by the chapters in this book higher education is not a neutral or passive player in economic growth This volume addresses topics related to the role of postsecondary education in national economic development within the United States
