In this book, author Ewa Nowak presents her own research findings to account for the experimental nature of ethics. Nowak questions a popular conviction that declaring values and following norms is a sufficient condition to be moral. She applies Georg Lind's dual aspect theory of morality to all sorts of spectacular contexts. Series: Development in Humanities Vol 6 **Bulletin of the International Bureau of Education** International Bureau of Education, 1967 **Philosophical Foundations of Education** Winston C. Thompson, 2023-03-23

This volume introduces philosophy as a foundational discipline of education. Taking a broadly inclusive approach to the branches of philosophy, it offers an accessible yet duly rigorous orientation to the field. Revealing the values, premises, arguments, and conclusions that inform contemporary philosophical discussions of education, this book equips its readers with the conceptual and analytical resources necessary to engage with and make meaningful contributions to that grand discourse for years to come. About the Educational Foundations series: Education as an academic field taught at universities around the world emerged from a range of older foundational disciplines. The Educational Foundations series comprises six volumes, each covering one of the foundational disciplines of philosophy, history, sociology, policy studies, economics, and law. This is the first reference work to provide an authoritative and up-to-date account of all six disciplines, showing how each field's ideas, methods, theories, and approaches can contribute to research and practice in education today. The six volumes cover the same set of key topics within education, which also form the chapter titles: Mapping the Field, Purposes of Education, Curriculum, Schools and Education Systems, Learning and Human Development, Teaching and Teacher Education, Assessment and Evaluation. This structure allows readers to study the volumes in isolation by discipline or laterally by topic and facilitates a comparative thematic reading of chapters across the volumes. Throughout the series, attention is paid to how the disciplines comprising the educational foundations speak to social justice concerns such as gender and racial equality. **Introduction to Experimental Education** Robert Robertson Rusk, 1915 **Hearings Before the Subcommittee on Elementary, Secondary, and Vocational Education of the Committee on Education and Labor, House of Representatives, Ninety-fifth Congress, First [and Second] Session, on H.R. 15, to Extend for Five Years Certain Elementary, Secondary, and Other Education Programs, Hearings Held in Washington, D.C. ...: ESEA consolidated programs** United States.
