Knowledge Creation in Education Seng Chee Tan,Hyo Jeong So,Jennifer Yeo,2014-06-12 This book arises from research conducted through Singapore s National Institute of Education on such topics as integrating knowledge building pedagogies into Singaporean classrooms with both students and teachers across school levels from primary schools to high schools Additionally international scholars contribute research on theories of knowledge creation methodological foundations of research on knowledge creation knowledge creation pedagogies in classrooms and knowledge creation work involving educators The book is organized in two sections Section A focuses on theoretical technological and methodological issues where sources of justification for claims are predominantly theories and extant literature although empirical evidence is used extensively in one chapter Section B reports knowledge creation practices in schools with teachers students or both the key sources of justification for claims are predominantly empirical evidence and narratives of experience The editor asserts that schools should focus on developing students capacity and disposition in knowledge creation work at the same time leaders and teachers alike should continue to develop their professional knowledge as a community In the knowledge building vernacular the chapters are knowledge artifacts artifacts that not only document the findings of the editors and authors but that also mediate future advancement in this area of

research work The ultimate aim of the book is to inspire new ideas and to illuminate the path for researchers of similar interest in knowledge creation in education *Knowledge Building and Regulation in Computer-Supported Collaborative Learning* Lanqin Zheng, 2016-10-14 This book proposes and validates an information flow approach to analyzing knowledge co construction and predicting group performance in the context of collaborative learning In addition it highlights the importance of socially shared regulation in collaborative learning and illustrates in detail how it can be analyzed and promoted The book investigates several innovative examples including Methodological approaches to studying and analyzing knowledge building and regulation in collaborative learning Social software tools for capturing the dynamics of knowledge building and regulation in collaborative learning Collective regulatory mechanisms to scaffold socially shared regulation in real life collaborative learning and Scripts and interventions to facilitate effective and productive collaborative learning on the basis of several case studies The original methodological contributions to the analysis of knowledge building and scaffolding socially shared regulation make this an essential read for anyone interested in collaborative learning This book will also be of interest to a wide audience of researchers teachers and students in the field of collaborative learning as well as the rapidly growing community of people investigating how collaborative learning can be effectively used in education

Engineering Education for a Smart Society Michael E. Auer, Kwang-Sun Kim, 2017-07-05 This book presents selected papers from the World Engineering Education Forum Global Engineering Deans Council held in November 2016 in Seoul Korea The massive changes currently underway in all areas of society especially in engineering and consequently in engineering education call for new pedagogic qualifications and approaches To face these current real world challenges higher education has to find innovative ways to quickly respond to these new needs The papers gathered here address three essential problems The main approach to engineering in the 21st century is collaboration at many levels within universities or colleges between institutions and on a global scale At the same time we need a new quality of collaboration between academia industry professional and governmental organizations The complexity of engineering projects and solutions is rapidly growing and increasingly includes non technical aspects One of the key tasks for future engineers will be the development of a sustainable society which is essential to keeping the global environment in balance Implications of Information and Digital Technologies for Development Wallace Chigona, Salah Kabanda, Lisa F. Seymour, 2024-07-31 This book constitutes the refereed proceedings of the 18th IFIP WG 9.4 International Conference on Implications of Information and Digital Technologies for Development ICT4D 2024 which was held in Cape Town South Africa during May 20-22 2024 The 49 full papers and 4 short papers presented were carefully reviewed and selected from 107 submissions They are organized in topical sections as follows Part I Artificial Intelligence Inequalities and Human Rights Digital Inclusion through e Government Giving Voice to Marginalised Perspectives in IS Research Human Computer Interaction for Ethical Value Exchange and Social Inclusion ICT Curriculum and Education ICT in Displacement and Conflict Zones Ideas Disconnects

Research in Indigenous African Languages Smart Collaborations Technology Information and Computer Security General Track Philosophical Theoretical and Methodological Approaches to Researching ICT4D **Computer Education for Teachers** Vicki F. Sharp, 2008-11-03 Computer Education for Teachers Integrating Technology into Classroom Teaching is designed to introduce future teachers to computer technology in a meaningful practical fashion It is written for undergraduate and graduate students who want an up to date readable practical concise introduction to computers for teachers Intelligent Adaptation and Personalization Techniques in Computer-Supported Collaborative Learning Thanasis Daradoumis, STAVROS DEMETRIADIS, Fatos Xhafa, 2012-03-14 Adaptation and personalization have been extensively studied in CSCL research community aiming to design intelligent systems that adaptively support eLearning processes and collaboration Yet with the fast development in Internet technologies especially with the emergence of new data technologies and the mobile technologies new opportunities and perspectives are opened for advanced adaptive and personalized systems Adaptation and personalization are posing new research and development challenges to nowadays CSCL systems In particular adaptation should be focused in a multi dimensional way cognitive technological context aware and personal Moreover it should address the particularities of both individual learners and group collaboration As a consequence the aim of this book is twofold On the one hand it discusses the latest advances and findings in the area of intelligent adaptive and personalized learning systems On the other hand it analyzes the new implementation perspectives for intelligent adaptive learning and collaborative systems that are brought by the advances in scripting languages IMS LD educational modeling languages and learning activity management systems Given the variety of learning needs as well as the existence of different technological solutions the book exemplifies the methodologies and best practices through several case studies and adaptive real world collaborative learning scenarios which show the advancement in the field of analysis design and implementation of intelligent adaptive and personalized systems An Analysis of Two Decades of Educational Technology Publications Gloria Natividad, J. Michael Spector, Nicholas Evangelopoulos, 2018-05-11 This book presents a challenging and multi faceted research project that required state of the art methodological approaches The project involved analyzing data collected from 10 000 research articles published in ten leading journals in the area of educational technology over 20 years from January 1994 to December 2014 advanced analytic approaches such as latent semantic analysis and expert insights and interpretations of the subject matter It captures the trends in a number of research streams within the discipline of educational technology and identifies the point in time when a massive change took place This is a significant achievement given that in epistemology and philosophy of science there have always been discussions of paradigm shifts but researchers have always identified them qualitatively This is the first work to identify a paradigm shift using rigorous quantitative methods The analysis procedure involved big data and sophisticated analysis which supported the identification of clusters at several breakpoints from which the richest set was selected in order to provide the most detailed analysis This

comprehensive analysis also shows what has been published and by whom in those ten top tier journals This work makes a highly significant contribution to the field of learning technologies and provides the groundwork and a significant data source for other scholars both new and experienced to build on and expand in their work Implementing Computing Supported Cooperative Learning David McConnell, 2014-04-23 This revised edition looks at how computers facilitate learning among groups of individuals Taking account of the impact of the Internet and web based learning the text is aimed at those in the open and distance learning education and training fields **Empathetic Education** Mathew C. Cotton, Ronald S. Laura, 2025-04-25 The health of our global environment is increasingly affected by our technological advance rain rivers lakes forests soil climate all suffer at human hands Laura and Cotton suggest that the society committed to the technological transformation of the natural environment into an artificial one is also paradoxically a society committed to its own destruction Currently one of the major concerns of environmental education is to address this problem more concertedly than hitherto This book represents a radical departure from the traditional approach to environmental education It argues that the knowledge base behind current teaching is flawed and the resulting mind sets and attitudes are often counterproductive to the aims of environmental education *Resources in Education*, 2001-04 Advances in Computers Marvin Zelkowitz, 2004-04-30 *Advances in Computers* covers new developments in computer technology Most chapters present an overview of a current subfield within computers with many citations and often include new developments in the field by the authors of the individual chapters Topics include hardware software theoretical underpinnings of computing and novel applications of computers This current volume emphasizes information security issues and includes topics like certifying computer professionals non invasive attacks cognitive hacking computer files as legal evidence computer forensics and the use of processors on plastic smartcards The book series is a valuable addition to university courses that emphasize the topics under discussion in that particular volume as well as belonging on the bookshelf of industrial practitioners who need to implement many of the technologies that are described In depth surveys and tutorials on new computer technology Well known authors and researchers in the field Extensive bibliographies with most chapters Five out of seven chapters focus on security issues Discussion of computer forensics professional certification and smart cards A chapter on how DNA sequencing is accomplished is important in the growing bioinformatics field **The Knowledge Web** Marc Eisenstadt, Tom Vincent, 2000 First Published in 2000 Routledge is an imprint of Taylor Francis an informa company Information Technology and Educational Management in the Knowledge Society Arthur Tatnall, Javier Osorio, Adrie Visscher, 2006-03-02 *Information Technology and Educational Management in the Knowledge Society* is an essential reference for both academic and professional researchers in the field of information technology and educational management Since the mid 1980 s computer assisted educational information systems have been developing in various parts of the world and the knowledge surrounding the development and implementation of these systems has been growing The papers presented in this volume

are the result of an international call for papers addressing the challenges faced by the information technology and education management ITEM field in a society where knowledge management is becoming a major issue both in educational and business systems This state of the art volume presents the proceedings of the 6th International Working Conference on Information Technology in Educational Management held July 2004 in Spain The collection will be important not only for information technology and education management experts and researchers but also for all teachers and administrators interested in this growing field **Learning Gain in Higher Education** Christina Hughes, Malcolm Tight, 2021-01-29

Responding to the larger amount of students that are bearing an increasing proportion of the costs of their participation in higher education this volume pays attention to the issue of what higher education does for its students What do students gain from engaging in higher education and how might this be accurately measured **Knowledge Science, Engineering and Management** Gang Li, Yong Ge, Zili Zhang, Zhi Jin, Michael Blumenstein, 2017-08-10 This book constitutes the refereed proceedings of the 10th International Conference on Knowledge Science Engineering and Management KSEM 2017 held in Melbourne Australia in August 2017 The 35 revised full papers and 12 short papers presented were carefully reviewed and selected from 134 submissions The papers are organized in the following topical sections text mining and document analysis formal semantics and fuzzy logic knowledge management knowledge integration knowledge retrieval recommendation algorithms and systems knowledge engineering and knowledge representation and reasoning
