Bourne,Janet C. Moore,2004 In the ten years since the inception of the Sloan Consortium the field of online learning has entered the mainstream of higher education making online learning a core ingredient of tomorrow s educational paradigms Now that digital natives are coming of age the blending of on ground and online education is continuous and unstoppable Growing demands for wide choice suggest that the blended agenda presses us rapidly into new realms of inquiry Thus the title of this collection the fifth volume in the Sloan C series on quality is Elements of Quality Online Education Into the Mainstream The 14 peer reviewed studies in this volume provide guidance for effectively responding to the challenges facing higher education The studies on Student Satisfaction recognize that significant populations remain underserved Yet asynchronous learning networks ALNs are widening access by easing some of the constraints of place based synchronous learning so that many more and many more new kinds of learners can achieve satisfaction and success The studies on Learning Effectiveness share an emphasis on the ways that ALN exceeds the no significant difference minimum standard for learning outcomes The studies on blending combining face to face and online

methods for learning offer rich possibilities for what many see as the best of both learning modes The studies on assessment go to the core of the Sloan C quality framework and its emphasis on continuous quality improvement through demonstrating progress towards the overarching goal of affordable access for all in a wide range of disciplines In our time of profound rapid and discontinuous change these studies envision solutions to the challenges of online blended and face to face education in higher education Sponsored by the Alfred P Sloan Foundation the purpose of the Sloan Consortium Sloan C is to help learning organizations continually improve quality scale and breadth according to their own distinctive missions so that education will become a part of everyday life accessible and affordable for anyone anywhere at any time in a wide variety of disciplines **Teaching and Learning at a Distance** Michael Simonson,Susan Zvacek,2024-01-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to design courses evaluate programs and identify issues and trends affecting the field In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book and has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book is the importance of research to the development of effective courses and programs offered at a distance The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of Teaching and Learning at a Distance is derived from Richard Clark s famous quote published in the Review of Educational Research asserting that media are mere vehicles that do not directly influence achievement Clark s controversial work is discussed in the book but is also fundamental to the book s advocacy for distance education in other words we authors do not make the claim that education delivered at a distance is inherently better than other ways people learn Distance delivered instruction is not a magical approach that makes learners achieve more Equivalency theory is the fourth theme of the book Here we present the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It can serve as a stand alone source of information **Theory and Research for Academic Nurse Educators** Rose Utley,2011 Theory

and Research for Academic Nurse Educators Application to Practice is an essential guide to nursing education theory research and it s application in the classroom Designed for the nurse educator this comprehensive guide is focused around the National League for Nursing s eight core competencies for academic nurse educators This textbook contains an overview of the academic nurse educator role core competencies strategies for applying theory and research based knowledge to further professional development This text is an ideal resource for nurses preparing for the Certified Nurse Educator Exam CNE and nursing education students **Dynamic Advancements in Teaching and Learning Based Technologies: New Concepts** Ng, Eugenia M. W.,Karacapilidis, Nikos,Raisinghani, Mahesh,2010-11-30 Dynamic Advancements in Teaching and Learning Based Technologies New Concepts explores the technical social cultural organizational human cognitive and commercial impact of technology This exciting new publication explores the impact of Web based technology on the design implementation and evaluation of the learning and teaching process as well as the development of new activities relationships skills and competencies for the various actors implied in such processes It expands on the overall body of knowledge relating to multi dimensional aspects of Web based technologies in up to date educational contexts

Proceedings of IAC-TLEl 2015 collective of authors,2015-07-05 *Handbook of Research on Inequities in Online Education During Global Crises* Kyei-Blankson, Lydia,Blankson, Joseph,Ntuli, Esther,2021-05-07 In response to the COVID 19 pandemic many educational institutions implemented social distancing interventions such as initiating closure developing plans for employees to work remotely and transitioning teaching and learning from face to face classrooms to online environments The abrupt switch to online teaching and learning for the most part has been a massive change for administration faculty and students at traditional brick and mortar universities and colleges as concerns regarding the pedagogical soundness of this mode of delivery remain among some stakeholders Not only that but the switch has also revealed the inequities in the system when it comes to the types of students universities serve It is important as institutions move forward with online instruction that consideration be made about all students and what policies and strategies need to be put into place to help support and meet the needs of all constituents now or when unprecedented situations arise The only way this can be done is by documenting the experiences through the eyes of faculty who were at the frontline of providing instruction and advising services to students The Handbook of Research on Inequities in Online Education During Global Crises brings to light the struggles faculty and students faced as they were required to switch to online education during the global COVID 19 health crisis This crisis has revealed inequities in the educational system as well as the specific effects of inequities when it comes to learning online and the chapters in this book provide information to help institutions be better prepared for online education or remote learning in the future While highlighting topics such as new educational trends remote instruction diversity in education and teaching and learning in a pandemic this book is ideal for in service and preservice teachers administrators teacher educators practitioners stakeholders researchers academicians and students
