British Review an article for publication on the Philosophy of Aristotle During 1874 and 1875 Green published his first criticism of English empiricism in his introduction to a new edition of the works of Hume He at this time speaks of his work as an inquiry into the course and philosophical movement which is represented by the names of Locke Berkeley and Hume Green s Introduction of three hundred and eighty pages to Hume s work of five hundred and fifty pages presents destructive criticism of English rationalism and empiricism The spirit in which the criticism is made is expressed on page 5 of the Introduction in these words A process which looks like pulling a great philosopher to pieces may be the true way of showing his greatness This Introduction indicates Green s basic principles in philosophy the central conception of which Nettleship says is that the universe is a single eternal activity or energy of which it is the essence to be self conscious that is to be itself and
