Espaces Iii Methode De Francais:

RHSH n°9 - L'espace : objet ou méthode des sciences humaines, 2003-10 La portabilité du statut personnel dans l'espace européen Silvia Pfeiff, 2017-03-23 Opposer un refus de reconnaissance au statut personnel d'un individu revient renier une partie de son identité. Le fait que des citoyens européens puissent subir les inconvénients liés par exemple un refus de reconnaissance de leur mariage de leur partenariat ou de leur filiation lors de l'exercice de leur liberté de circulation est incompatible avec les droits et libertés garantis par la Convention européenne des droits de l'homme et les traités européens. Cette question a mené l'auteur à interroger sur l'étendue des droits et libertés européens tels qu'ils découlent de la jurisprudence de la Cour européenne des droits de l'homme et de la Cour de justice de l'Union européenne et explorer les pistes de solutions que recèle aujourd'hui le droit européen en tant que cadre supranational pour l'ensemble des États membres. Sur base de cet acquis européen est élaborée une méthode européenne de la reconnaissance. Celle-ci impose aux autorités nationales d'intégrer la logique européenne dans leur raisonnement lorsqu'elles sont saisies de la question de la reconnaissance d'un élément du statut personnel cristallisé par l'intervention d'une autorité publique d'un État membre. Ce faisant, elle ambitionne de réduire la survenance de statuts personnels boiteux et de contribuer ainsi à faciliter la circulation des citoyens. Cet ouvrage s'inscrit dès lors à la croisée du droit de la famille, du droit international privé, du droit européen et des droits fondamentaux.

XVIIth International Congress of Medicine v.3, 1913 *Methods and Interdisciplinarity* Roger Waldeck, 2019-12-05 Interdisciplinarity research results from a growing need for multi-perspective methods and knowledge on complex and multifaceted objects of study. It is not simply scientific research that involves several disciplines but ultimately the aim is confronting this knowledge and if possible articulating it coherently. Using specific examples, *Methods and Interdisciplinarity* categorizes the different modes of interdisciplinarity and discusses the mechanisms of hybridization between them. On the one hand, the book shows how the same issue can be treated according to various points of view from several disciplines which can give rise to complementary or even contradictory knowledge. On the other hand, it illustrates how methods from some disciplines make it possible to articulate the qualitative or quantitative approaches of others.
