political context as well as the economic and political development represented by Japan Over the course of the chapters Marx is rescued from orientalism evaluated as a socialist thinker revisited as a theorist of capitalist development and heralded as a necessary corrective to modern economics Of particular interest are the major scholarly revisions to the standard historical accounts of Marx's work on the Communist Manifesto his relationship to the contemporary theories of Louis Blanc and P J Proudhon and new information about how he and Engels worked together This landmark work opens up a world of Japanese critical engagement and lively scholarship that will appeal to anyone interested in Marx and Marxism

The Value of Marx Alfredo Saad Filho, 2001-11-29 This book constitutes an overview of recent developments in political economy in general and Marxist value theory in particular The implications of value theory for bank credit inflation and deflation are fully explored

Macroeconomic Policy Regimes in Western Industrial Countries Hansjörg Herr, Milka Kazandziska, 2011-02-15 Macroeconomic Policy Regimes in Western Industrial Countries explains how certain countries have created a more liberal and market based type of capitalism The emphasis throughout is on how understanding macroeconomic policies and the institutional framework in which they operate is vital to understanding the long run dynamics of a capitalist economy

Social Costs Today Wolfram Elsner, Pietro Frigato, Paolo Ramazzotti, 2012-06-25 This book deals with the current crises from a somewhat different the usual perspectives It claims that causes and policy implications of these crises cannot be properly assessed by focusing on allocative efficiency or income growth alone it requires a more general approach based on social costs It does not deal with social costs according to the Pigouvian or the Coasian traditions It draws on the work of Original Institutional Economics OIE such as Thorstein Veblen Karl William Kapp and Karl Polanyi on Post Keynesians such as Hyman Minsky and in general on authors who have provided insights beyond the conventional wisdom of economic thought

Business Ethics and the Austrian Tradition in Economics Hardy Bouillon, 2011-03-06 Stakeholder value corporate social responsibility and sustainability Are these and similar concepts sufficiently clear for fruitful research in business ethics What is the benchmark to prove their utility Business Ethics and the Austrian Tradition in Economics is a treatise on the fundamental questions of business ethics and addresses significant shortcomings in the field It is the result of correlating reflections on phenomena resulting from an intersection of ethics economics methodology and political and social philosophy Sparked by the business ethicists tendency to consider certain areas outside their field and accept others unquestioningly this book provides answers in the tradition of Austrian Economics and in particular of Hayek and Popper Through detailed examination and reflection this book presents the thesis that many themes in business ethics are discussed either unduly intensely unbalanced or rarely measured against what business ethics as a science should deliver It does so by offering an answer to one of the most crucial questions in business ethics namely that of justice in moral economic actions Bouillon develops an original definition of morally just economic action in the course of three chapters and subsequently uses it as yardstick from which in chapter four he reads which of the relevant concepts

and topics in business ethics ask for restatement As a side product Bouillon discloses logical inconsistencies in prominent political philosophies and the consequences of these inconsistencies for maldevelopments in business ethics Business Ethics and the Austrian Tradition in Economics illustrates and analyses the business ethics peculiarities particularly within German literature providing the reader with a focus rarely found elsewhere This book should be of interest to economics postgraduates and researchers looking at business ethics economic theory and social and political philosophy Marx and Living Labour Laurent Baronian, 2013-05-29 From his early economic works on Marx conceived the labour of any kind of society as a set of production activities and analysed the historical modes of production as specific ways of distributing and exchanging these activities Political economy on the contrary considers the labour only under the form of its product and the exchange of products as commodities as the unique form of social labour exchange For Marx insofar as the labour creating value represents a specific mode of exchanging the society's living labour general and abstract labour cannot not only be defined as the substance or measure unit of the commodity as in Smith or Ricardo but foremost as an expense of living labour i.e. of nerves muscles brain etc Hence the twofold nature of living labour as a concrete activity producing a use value and an expense of human labour in general producing exchange value Marx himself claimed that this twofold nature of labour creating value was its main and most important contribution to economic science This book aims at showing how both determines the original categories and economic laws in Capital and constitutes the profound innerspring of Marx's critique of political economy The role and function of living labour is highlighted by dealing with the difference between Marx and Classics theories of labour value money and the problems of its integration in economic analysis especially in Keynes the transition from feudalism to capitalism the theory of capital through a discussion on the Cambridge controversy and the transformation problem the labour process and the principles of labour management unemployment and overpopulation the formulas of capital in the history of economic thought finally an interpretation of the current crisis based on Marx's conception of overaccumulation and speculation after having distinguished it from underconsumption and stagnation theories of crises Neoliberalism: National and Regional Experiments with Global Ideas Ravi K. Roy, Arthur T. Denzau, Thomas D. Willett, 2006-12-13 Critics of globalization often portray neoliberalism as an extremist laissez faire political economic philosophy that rejects government any sort of government intervention in the domestic economy Like most over used terms it is more complicated than this introductory sentence suggests This volume seeks to move beyond these caricature depictions and definitions as well as the emotional rhetoric that has unfortunately dominated both the scholastic and political debate on neoliberalism and global market oriented reform This book emphasizes that there are in fact a variety of neoliberalisms that share a common emphasis on the role of the market Beyond this however its usages and applications appear much more varied according to the cultural economic political and social context in which it is used A host of eminent contributors including Douglass C. North, Arthur T. Denzau, Thomas D. Willett, Mark Blyth, Colin Hay, Craig

Parsons and others provide a rigorous assessment of the significance of neoliberal ideas on economic policy Through their detailed international case studies the contributors to this book show how varied its impact has in fact been and the result is a book that will stimulate further debate in this most controversial of subject matters Ravi K Roy is a Research Scholar at the Claremont Institute for Economic Policy Studies Arthur T Denzau is Professor of Economics at Claremont Graduate University He is also a Research Associate at the Center for American Business at Washington University St Louis Thomas D Willett is Horton Professor of Economics at Claremont Graduate University He is also Director of the Claremont Institute for Economic Policy Studies **Liberal Learning and the Art of Self-Governance** Emily Chamlee-Wright, 2015-11-19

Concerns over affordability and accountability have tended to direct focus away from the central aims of liberal learning such as preparing minds for free inquiry and inculcating the habits of mind practical skills and values necessary for effective participation in civil society The contributors to this volume seek to understand better what it is that can be done on a day to day basis within institutions of liberal learning that shape the habits and practices of civil society The central argument of this volume is that institutions of liberal learning are critical to a developing and flourishing civil society It is within these civil society incubators that the habits of open discourse are practiced and honed that a collaborative often contentious commitment to truth seeking serves as the rules that govern our work together that the rules of personal and widespread social cooperation are established practiced and refined Many have made this argument as it relates to community based learning and we explore that theme here as well But acquiring and practicing the habits of civil society recur within and throughout the college context in the classrooms in college governance structures in professional associations in collaborative research in the residence halls and on the playing field To put it another way when they are at their best institutions of liberal learning are contexts in which students learn how to live in a free society and learn the art of self governance **Robinson Crusoe's Economic Man** Ulla Grapard, Gillian Hewitson, 2012-04-27

In this book economists and literary scholars examine the uses to which the Robinson Crusoe figure has been put by the economics discipline since the publication of Defoe's novel in 1719 The authors critical readings of two centuries of texts that have made use of Robinson Crusoe undermine the pervasive belief of mainstream economics that Robinson Crusoe is a benign representative of economic agency and that he like other economic agents can be understood independently of historical and cultural specificity The book provides a detailed account of the appearance of Robinson Crusoe in the economics literature and in a plethora of modern economics texts in which for example we find Crusoe is portrayed as a schizophrenic consumer producer trying to maximize his personal well being Using poststructuralist feminist postcolonial Marxist and literary criticism approaches the authors of the fourteen chapters in this volume examine and critique some of the deepest fundamental assumptions neoclassical economics hold about human nature the political economy of colonization international trade and the pervasive gendered organization of social relations The contributors to this volume can be seen as engaging in the

emerging conversation between economists and literary scholars known as the New Economic Criticism They offer unique perspectives on how the economy and economic thought can be read through different disciplinary lenses Economists pay attention to rhetoric and metaphor deployed in economics and literary scholars have found new areas to explore and understand by focusing on economic concepts and vocabulary encountered in literary texts
