Essays On Skepticism Relativism And Ethics In The Zhuangzi:

Essays on Skepticism, Relativism, and Ethics in the Zhuangzi Paul Kjellberg, P. J. Ivanhoe, Chair Professor of East Asian and Comparative Philosophy and Religion and Director of the Center for East Asian and Comparative Philosophy (Ceacop) Philip J. Ivanhoe, 1996-01-01 The Chinese philosophical text Zhuangzi was written by Zhuangzi in the fourth century BCE. With humor and relentless logic, Zhuangzi attacks claims to knowledge about the world, especially evaluative knowledge of what is good and bad or right and wrong. This book is about the man and the text. **Essays on Skepticism, Relativism, and Ethics in the Zhuangzi** Paul Kjellberg, Philip J. Ivanhoe, 1996-04-11 The Chinese philosophical text Zhuangzi was written by Zhuangzi in the fourth century BCE. With humor and relentless logic, Zhuangzi attacks claims to knowledge about the world, especially evaluative knowledge of what is good and bad or right and wrong. This book is about the man and the text. *Zhuangzi's Critique of the Confucians* Kim-chong Chong, 2016-10-24 Looks at the Daoist Zhuangzi's critique of Confucianism. The Daoist Zhuangzi has often been read as a mystical philosopher. But there is another tradition beginning with the Han dynasty historian Sima Qian which sees him as a critic of the Confucians. Kim-chong Chong analyzes the Inner Chapters of the Zhuangzi, demonstrating how Zhuangzi criticized the pre-Qin Confucians through metaphorical inversion and parody. This is indicated by the subtitle *Blinded by the Human*, which is an inversion of the Confucian philosopher Xunzi's remark that Zhuangzi was blinded by heaven and did not know the human. Chong compares Zhuangzi's Daoist thought to Confucianism as exemplified by Confucius, Mencius, and Xunzi. By analyzing and comparing the different implications of concepts such as heaven, heart, mind, and transformation, Chong shows how Zhuangzi can be said to provide the resources for a more pluralistic and liberal philosophy than the Confucians. **The Routledge Handbook of Philosophy of Well-Being** Guy Fletcher, 2015-07-30 The concept of well-being is one of the oldest and most important topics in philosophy and ethics, going back to ancient Greek philosophy. Following the boom in happiness studies in the last few years, it has moved to centre stage, grabbing media headlines and the attention of scientists, psychologists, and economists. Yet little is actually known about well-being, and it is an idea that is often poorly articulated. The Routledge Handbook of Philosophy of Well-Being provides a comprehensive, outstanding guide and reference source to the key topics and debates in this exciting subject. Comprising over 40 chapters by a team of international contributors, the Handbook is divided into six parts: well-being in the history of philosophy; current theories of well-being, including hedonism and perfectionism; examples of well-being and its opposites, including friendship and virtue, and pain and death; theoretical issues such as well-being and value, harm, identity, and well-being and children; well-being in moral and political philosophy; well-being and related subjects, including law, economics, and medicine. Essential reading for students and researchers in ethics and political philosophy, it is also an invaluable resource for those in related disciplines such as psychology, politics, and sociology. **Nietzsche, Heidegger, and Daoist Thought** Katrin Froese, 2012-02-01 In this book, Katrin Froese juxtaposes the Daoist texts of Laozi and Zhuangzi with the thought of

Nietzsche and Heidegger to argue that there is a need for rethinking the idea of a cosmological whole. By moving away from the quest for certainty, Froese suggests a way of philosophizing that does not seek to capture the whole but rather becomes a means of affirming a connection to it, one that celebrates difference rather than eradicating it. Human beings have a vague awareness of the infinite but they are nevertheless finite beings. Froese maintains that rather than bemoaning the murkiness of knowledge, the thinkers considered here celebrate the creativity and tendency to wander through that space of not knowing or in-betweenness. However, for Nietzsche and the early Heidegger, this in-betweenness can often produce a sense of meaninglessness that sends individuals on a frenetic quest to mark out space that is uniquely their own. Laozi and Zhuangzi, on the other hand, paint a portrait of the self that provides openings for others rather than deliberately forging an identity that it can claim as its own. In this way, human beings can become joyful wanderers that revel in the movements of the Dao and are comfortable with their own finitude. Froese also suggests that Nietzsche and Heidegger are philosophers at a crossroads for they both exemplify the modern emphasis on self-creation and at the same time share the Daoist insight into the perils of excessive egoism that can lead to misguided attempts to master the world.

Dao Companion to Daoist Philosophy Xiaogan Liu, 2014-10-27. This is the first comprehensive companion to the study of Daoism as a philosophical tradition. It provides a general overview of Daoist philosophy in various thinkers and texts from 6th century BCE to 5th century CE and reflects the latest academic developments in the field. The themes include debates on the origin of Daoism, the authorship and dating of the Laozi, the authorship and classification of chapters in the Zhuangzi, the themes and philosophical arguments in the Laozi and Zhuangzi, their transformations and developments in Pre-Qin, Han, and Wei-Jin periods, by Huang-Lao school, Heguanzi, Wenzi, Huainanzi, Wang Bi, Guo Xiang, and Worthies in bamboo grove, among others. Each chapter is written by experts and specialists on the topic discussed.

The Poetic Character of Human Activity Wendell John Coats Jr., Chor-yung Cheung, 2012-07-21. The Poetic Character of Human Activity is a collection of essays by two Oakeshott scholars, most of which explore the meaning of Oakeshott's pregnant phrase, the poetic character of human activity, by comparing and contrasting this idea with similar and opposing ones, in particular those of the Taoist thinker Zhuangzi, Chuang Tzu, and his Western interpreter A. C. Graham. Oakeshott's deep appreciation of the poetic and non-instrumental character of human activity led him to develop an interest in the works of Zhuangzi and Confucius. Comparison of shared themes between Oakeshott and these two Chinese thinkers facilitates appreciation of his elegant analytic style and his resort to use of metaphors and story-telling when conveying some of his most profound insights. The collection also contains essays contrasting Oakeshott's idea of the creative in human experience with views of, among others, Plato, Leo Strauss, and Eric Voegelin. Oakeshott used the phrase, the poetic character of human activity, arguably the animating center of his entire thought, to refer to the creative character

of human experiential reality that is to the fact that the form the how and content the what of all human experience and activity arise simultaneously and fluidly and can be separated only at the expense of theoretical coherence and practical skill The various essays in this collection explore the meaning of this claim and its ramifications for the proper role of critical intellect in especially philosophy morality learning and governance There is also some brief contrast of Oakeshott with John Rawls Alasdair MacIntyre Charles Taylor and Quentin Skinner

Human Flourishing in an Age of Gene Editing Erik Parens, Josephine Johnston, 2019-07-29 International uproar followed the recent announcement of the birth of twin girls whose genomes had been edited with a breakthrough DNA editing technology This technology called clustered regularly interspaced short palindrome repeats or CRISPR Cas9 can alter any DNA including DNA in embryos meaning that changes can be passed to the offspring of the person that embryo becomes Should we use gene editing technologies to change ourselves our children and future generations to come The potential uses of CRISPR Cas9 and other gene editing technologies are unprecedented in human history By using these technologies we eradicate certain dreadful diseases Altering human DNA however raises enormously difficult questions Some of these questions are about safety Can these technologies be deployed without posing an unreasonable risk of physical harm to current and future generations Can all physical risks be adequately assessed and responsibly managed But gene editing technologies also raise other moral questions which touch on deeply held personal cultural and societal values Might such technologies redefine what it means to be healthy or normal or cherished Might they undermine relationships between parents and children or exacerbate the gap between the haves and have nots The broadest form of this second kind of question is the focus of this book What might gene editing and related technologies mean for human flourishing In the new essays collected here an interdisciplinary group of scholars asks age old questions about the nature and well being of humans in the context of a revolutionary new biotechnology one that has the potential to change the genetic make up of both existing people and future generations Welcoming readers who study related issues and those not yet familiar with the formal study of bioethics the authors of these essays open up a conversation about the ethics of gene editing It is through this conversation that citizens can influence laws and the distribution of funding for science and medicine that professional leaders can shape understanding and use of gene editing and related technologies by scientists patients and practitioners and that individuals can make decisions about their own lives and the lives of their families

Dewey and Confucian Thought Jim Behuniak, 2019-07-24 In this conclusion to his two volume series Jim Behuniak builds upon the groundbreaking work begun in *John Dewey and Daoist Thought* in arguing that Chinese natural philosophy is the proper hermeneutical context in which to understand early Confucianism First he traces Dewey's late period cultural turn in more detail and then proceeds to assess Dewey's visit to China in 1919-21 as a multifaceted intra cultural episode one that includes not only what Dewey taught his Chinese audiences but also what he learned in China and what we stand to learn from this encounter today Dewey in China provides an opportunity to continue establishing specific philosophical relationships between Dewey and Confucian thought for the purpose of getting ourselves back in gear with contemporary thinking in the social and natural sciences To this end Behuniak critically assesses readings of early Chinese thought reliant on outdated Greek medieval assumptions paying particular attention to readings of early Confucianism that rely heavily on Western virtue ethics such as the Heaven's plan reading Topics covered include education tradition ethics the family human nature and religiousness thus engaging Dewey with themes generally associated with Confucian thought **Ritual and**

Religion in the Xunzi T. C. Kline III, Justin Tiwald, 2014-06-12 Xunzi a founding figure in the Confucian tradition is one of the world's great philosophers and theorists of religion For much of the last century his work has been seen largely as critical of religion particularly the popular beliefs and invocations of supernatural forces that underpin so many religious rituals Contributors to this volume challenge this view and offer a more sophisticated picture of Xunzi He emerges not as critic but rather as an adherent of religion who seeks to give religious practices meaning even though many religious beliefs are mistaken or self serving Each essay offers a powerful illustration of Xunzi as both a religious devotee and as a philosopher of religion drawing on a wide array of disciplines and methodologies *Asian Philosophies* John M. Partial Values Kevin DeLapp, 2018-03-12 When if ever is it permissible to afford special consideration to friends and family How can we strive to be objective in our thinking and is this always a feasible or appropriate aim This book examines the categories of impartiality and objectivity by showing how they frame certain debates in epistemology moral psychology and metaethics arguing that many traditional conceptions of objectivity fail to capture what is important to our identities as knowers social beings and moral agents A new thesis of perspectival realism is offered as a critique of strong objectivity but in a way that avoids radical subjectivism or relativism Locally situated identities can provide their own criteria of epistemic and moral justification and we may aspire to be impartial in a way that need not sacrifice particular perspectives and relationships Arguments throughout the book draw heavily on resources from classical Chinese philosophy and significant attention is given to applications of arguments to concrete issues in applied ethics cross cultural anthropology and political science

Ways with Words Pauline Yu, 2000-09-19 This is an interdisciplinary collection of articles analyzing seven classic premodern Chinese texts that are provided in translation

Different Beasts Sonya N. Özbey, 2024 Different Beasts explores conceptions of animality and humanity as they emerge in the writings of Spinoza and in the ancient Chinese text known as the Zhuangzi The project thus brings together works from distant and different pasts to bear on debates regarding the human animal binary in its many constructions It also investigates what is at stake in the formation of responsible comparison one that is contextually grounded and refined in detail to understand how the complex machinery behind the human animal binary operates in different philosophical systems

The Dao of Madness Alexis McLeod, 2021 Chapter One lays out the dominant views of self agency and moral responsibility in early Chinese Philosophy The reason for this is that these views inform the ways early Chinese thinkers approach mental illness as well as the role they see it playing in self cultivation as a whole whether they view it as problematic or beneficial for example In this chapter I offer a view of a number of dominant conceptions of mind body and agency in early Chinese thought through a number of philosophical and medical texts

The Reception and Rendition of Freud in China Tao Jiang, Philip J. Ivanhoe, 2013-05-07 Although Freud makes only occasional brief references to China and Chinese culture in his works for almost a hundred years many leading Chinese intellectuals have studied and appropriated various Freudian theories However whilst some features of Freud's views have been warmly embraced from the start and appreciated for their various explanatory and therapeutic values other aspects have been vigorously criticized as implausible or inapplicable to the Chinese context This book explores the history reception and use of Freud and his theories in China and makes an original and substantial contribution to our understanding of the Chinese people and their culture as well as to our appreciation of western attempts to understand the people and culture of China The essays are organised around three key areas of research First it examines the historical background concerning

the China Freud connection in the 20th century before going on to use reconstructed Freudian theories in order to provide a modernist critique of Chinese culture Finally the book deploys traditional Chinese thought in order to challenge various aspects of the Freudian project Both Freudianism s universal appeal and its cultural particularity are in full display throughout the book At the same time the allure of Chinese cultural and literary expressions both in terms of their commonality with other cultures and their distinctive characteristics are also scrutinized This collection of essays will be welcomed by those interested in early modern and contemporary China as well as the work and influence of Freud It will also be of great interest to students and scholars of psychology psychoanalysis literature philosophy religion and cultural studies more generally Critique, Subversion, and Chinese Philosophy Hans-Georg Moeller,Andrew K. Whitehead,2020-11-12 Bringing together a number of case studies this book shows how from early on Chinese philosophical discourses unfolded through innovation and the subversion of dominant forms of thinking Narrowing in on the commonplace Chinese motto that the three teachings of Confucianism Daoism and Buddhism are joined into one as if there had never been any substantial differences between or within these schools of thought a team of esteemed contributors challenge established views They explain how the Daoist tradition provided a variety of alternatives to prevailing Confucian master narratives reveal why the long history of Confucianism is itself full of ambiguities disputes and competing ideas and discuss how in Buddhist theory and practice the subversion of unquestioned beliefs and attitudes has been a prime methodological and therapeutic device By drawing attention to unorthodox voices and subversion as a method this exciting collection reveals that for too long the traditional division into three teachings has failed to do justice to the diversity and subtlety found in the numerous discourses constituting the history of Chinese philosophy Critique Subversion and Chinese Philosophy finally makes such innovative disruptions visible *The Oxford Handbook of Happiness* Susan A. David,Ilona Boniwell,Amanda Conley Ayers,2014 A text for researchers and practitioners interested in human happiness Its editors and chapter contributors are world leaders in the investigation of happiness across the fields of psychology education philosophy social policy and economics **The Routledge Companion to Virtue Ethics** Lorraine Besser-Jones,Michael Slote,2015-02-20 Virtue ethics is on the move both in Anglo American philosophy and in the rest of the world This volume uniquely emphasizes non Western varieties of virtue ethics at the same time that it includes work in the many different fields or areas of philosophy where virtue ethics has recently spread its wings Just as significantly several chapters make comparisons between virtue ethics and other ways of approaching ethics or political philosophy or show how virtue ethics can be applied to real world problems
