History of modern Europe

Hobsbawm divides the ancient historians into two distinct categories in his book; The Age of Empire. He says that quite a number of historians who lived during the 19th century can be classified into two classes while excluding the purely pieces of literature written by them.

These two classes comprise of the forward and backward lookers. According to my opinion, Hobsbawm fits in the category of backward lookers. This is because he focuses his pieces of writing in the ancient eras. He indulges in the excavation of human irrecoverable pasts.

Additionally, he is nostalgic about some historical documents including his own past experiences. He states that he and many other historians like him are still passionately associated with some ancient periods because of their undeniable 'breaks' (Hobsbawm, 6).

The bourgeois capitalism, which is characterized by the perception of dual revolution, championed productive systems that lacked limits. This then led to the take-over of the earth by the capitalist economy. Hobsbawm indicates that the economy of the bourgeois society was literally unproblematic in the 19th century.

This was because their triumph had a deeply rooted positive impact on their economy. The many political hostilities of that period, from which the French revolution had emerged, were suppressed.

To some extent, it seemed like the rebellion was gradually accepting the cultural, economic and organizational domination by the victors. As a result of the Age of Revolution, which occurred in the mid of 19th century, there were only countable socialists in the continent.

Few scholars have provided as much insight into the struggle of leaders ideas and policies as Paul W Schroeder Constantly
challenging conventional views and drawing upon a masterly command of the sources and literature Schroeder provides new
answers to old questions about international history and politics since the age of Napoleon Were European international
relations really driven by balance of power politics or has that traditional view blinded us to an underlying normative
consensus on the rules of the game that frequently contributed to cooperation among the leading states in the system Are
alliances primarily a means of the aggregation of power against stronger states or do states often use alliances as
instruments of influence or control over their allies Was World War I contingent upon a confluence of independent processes
that intersected in 1914 or was it the product of more deeply rooted and interconnected structural forces that pushed
inevitably toward war What is the role of moral judgment in historical investigation Raising new questions and offering
provocative new interpretations Schroeder encourages historians and political scientists alike to reconsider their long
standing beliefs about the evolution and dynamics of modern diplomacy *Themes in Modern European History 1780-1830*
Pamela Pilbeam, 2012-08-21 *Themes in Modern European History 1780 1830* is an authoritative and lively exploration of a
period dominated by events which have shaped modern Europe In a series of articles six leading academics present some
controversial conclusions the east west contrast in Europe today has more to do with responses to the French Revolution of
1789 than the Russian Revolution of 1917 the conservative Europe of 1814 was the product of the Romantic imagination not a

been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and
scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the
validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of
Early Modern European History 1350 1750 provides an account of the development of the subject during the past half
century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions
as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern
