Symposium of nine prominent historians discussing California's history growth reforms ecology etc over two centuries

**Power and the Pursuit of Peace: Theory and Practice in the History of Relations Between States** F. H. Hinsley, Francis Harry Hinsley, 1967-10 In the last years of the nineteenth century peace proposals were first stimulated by fear of the danger of war rather than in consequence of its outbreak In this study of the nature and history of international relations Mr Hinsley presents his conclusions about the causes of war and the development of men's efforts to avoid it In the first part he examines international theories from the end of the middle ages to the establishment of the League of Nations in their historical setting This enables him to show how far modern peace proposals are merely copies or elaborations of earlier schemes He believes there has been a marked reluctance to test these theories not only against the formidable criticisms of men like Rousseau Kant and Bentham but also against what we have learned about the nature of international relations and the history of the practice of states This leads him to the second part of his study an analysis of the origins of the modern states system and of its evolution between the eighteenth century and the First World War

**California & the Fictions of Capital** George L. Henderson, 1999 Between the frequently recounted events of the Gold Rush and the Great Depression stretches a period of California history that is equally crucial but less often acknowledged In his fresh synthetic consideration of these in between years George L Henderson points specifically to the take off of California's rural juggernaut between the 1880s and middle 1920s the upward spiral of city bids for country dollars and rural bids for urban investments These decades were salve for mining's risky finances yet groundwork for the chaotic 1930s Moreover Henderson argues that much like the two important periods which framed it this era produced a cultural and literary apparatus that attempted to grapple with capital's machinations if only to legitimate them in the end Central to California and the Fictions of Capital is a theory of how the circulation of capital wove itself into agriculture The book asks why it mattered to capital that agriculture was based in Nature and then explores the procedures through which images of Nature became central to capitalism's story of itself What unique possibilities did Nature offer to circuits of capital and what was their role in suturing the urban and rural together How did boom and bust intervene and set the pace for regional change How was capital linked to the racializing of working bodies And why was the capitalist imperative expressed in landscape alterations like irrigation Such are the key questions informing this bold far reaching volume Beyond political economy the book also looks to the rural juggernaut's cultural and literary work which was stamped by celebratory if fretful ruminations In all sorts of texts but especially in novels by Frank Norris Mary Austin Harold Bell Wright and many other writers difficult questions surfaced Capital was seen in terms of its spillage into rural frontiers just as rural frontiers were seen in terms of movements of capital Capital was the new geography of money But for whom did it work Which identities did it favor In mapping the real and imaginary realms that capital

occupied Henderson locates the banker land developer and engineer heroes of California fiction as well as the fictionalized new woman of the capitalist agrarian West He unravels the colliding representations of race gender and class while linking their treatment to the naturalizing rhetoric of capital s agrarian turn In part a tour of California as a virtual laboratory for refining the circulation of capital and in part an investigation of how the state s literati with rare exception reconceived economy in the name of class gender and racial privilege this study will appeal to all students and scholars of California s and the American West s economic environmental and cultural past

California's Spiritual Frontiers Sandra Sizer Frankiel, 2023-04-28 California s Spiritual Frontiers Religious Alternatives in Anglo Protestantism 1850 1910 offers a profound exploration of how Anglo Protestantism evolved and adapted in California during a period of rapid cultural and societal transformation In a region where evangelical Protestantism initially sought to dominate the book reveals how traditional religious norms were challenged by liberal ideologies and metaphysical movements including Christian Science New Thought and Theosophy These alternative spiritual frameworks reshaped the religious landscape emphasizing individual spirituality mysticism and openness to non traditional beliefs The book vividly illustrates how California s unique social dynamics and cultural diversity fostered a distinctive blend of spiritual experimentation and adaptation Focusing on key regions such as the mining districts San Francisco Bay Area and early Los Angeles California s Spiritual Frontiers examines the interplay between traditional denominations emerging liberal thought and new metaphysical religions It details the challenges faced by Protestant leaders to maintain their influence amidst a largely unchurched population and the growing popularity of alternative spiritual paths This meticulously researched work not only provides a window into California s unique religious evolution but also contributes significantly to the broader study of American religious history highlighting the intersection of regional cultural and spiritual identities This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1988

also investigates the building of local political customs habits and institutions as well as the socioeconomic development of the region While momentous changes marked the Far West in the later nineteenth century distinctive local political cultures persisted These were a legacy of the pre Civil War conquest and settlement of the regions but no less a reflection of the struggles for political definition that took place during constitutional conventions in each of the three states At the center of the book are the men who wrote the original constitutions of these states and shaped distinctive political cultures out of the common materials of antebellum American culture Founding the Far West maintains a focus on the individual experience of the constitution writers on their motives and ambitions as pioneers their ideological intentions as authors of constitutions and the successes and failures after statehood of their attempts to give meaning to the constitutions they had produced Founding the Far West is an ambitious and vividly written narrative of the early years of statehood and statesmanship in three pivotal western territories Johnson offers a model example of a new approach to history that is transforming our ideas o     *The Pacific Historical Review* Anna Marie Hager,1976     *Redemptive Dreams* Jason S. Sexton,2023-11-10 An essential piece in California Studies Redemptive Dreams Engaging Kevin Starr s California offers the first critical engagement with the vision of California s most ambitious interpreter While Starr s multifaceted and polymathic vision of California offered a unique gaze synthesizing central features big themes and incredible problems with the propitious golden dream his eight volume California Dream series along with several other books and thousands of published articles and essays often puzzled historians and other scholars Historians in the contemporary school of critical historiography often found Starr s narrative approach seeking to tell the internal drama of the California story to be less attuned to the most important work happening in the field Such a perspective fails to acknowledge key developments in historical subfields like Black and African American Studies Chicana o x Studies Asian Studies Native Studies and others that draw from the narrative in their critical work and how this relates to Starr s contribution But it also neglects Starr as a theological interpreter Along with being a major figure in California institutional life with literary output spanning genres from journalism to critical cultural and political commentary to history and memoir Starr s unique contribution to California Studies as a distinctly Catholic historian has yet to be adequately understood Through his lived experience as a devout Catholic to the particular theological features of this faith tradition that animated his views this critical sociological perspective sheds new light on his project With contributions from sociology history and theology akin to investigations appearing in *Theology and California* Theological Refractions on California s Culture Routledge Redemptive Dreams offers interdisciplinary perspectives that highlight key features inherent in interdisciplinary theological reflection on place and illuminates these diverse disciplinary discourses as they appear in Starr s articulation of the California Dream Such a vision remains important for reckoning with California s place in the world

**The Polar Adventures of a Rich American Dame** Joanna Kafarowski,2017-11-04 Louise Arner Boyd inherited the family millions in her thirties Expected to lead a respectable life she instead fell under the captivating spell of the north Over

**A Golden State** Marlene Smith-Baranzini, 1999 A collection of essays on mining and economic development in California from the Gold Rush through the end of the 19th century This is the second in a series of four volumes commemorating the state's sesquicentennial      **Los Angeles** John Walton Caughey, LaRee Caughey, 1977-10-18 Its intelligent combination of essays reveals much about Los Angeles which does not always find its way into socio historical texts about the area The editors remarks preceding each essay expertly bind the book together I suspect it will wind up as one of the more dog eared volumes on my shelf Mayor Tom Bradley of Los Angeles      *Manifest Destinies* Laura E. Gómez, 2008-09 Watch the Author Interview on KNME In both the historic record and the popular imagination the story of nineteenth century westward expansion in America has been characterized by notions of annexation rather than colonialism of opening rather than conquering and of settling unpopulated lands rather than displacing existing populations Using the territory that is now New Mexico as a case study *Manifest Destinies* traces the origins of Mexican Americans as a racial group in the United States paying particular attention to shifting meanings of race and law in the nineteenth century Laura E Gómez explores the central paradox of Mexican American racial status as entailing the law's designation of Mexican Americans as white and their simultaneous social position as non white in American society She tells a neglected story of conflict conquest cooperation and competition among Mexicans Indians and Euro Americans the region's three main populations who were the key architects and victims of the laws that dictated what one's race was and how people would be treated by the law according to one's race Gómez's path breaking work spanning the disciplines of law history and sociology reveals how the construction of

Mexicans as an American racial group proved central to the larger process of restructuring the American racial order from the Mexican War 1846-48 to the early twentieth century. The emphasis on white over black relations during this period has obscured the significant role played by the doctrine of Manifest Destiny and the colonization of northern Mexico in the racial subordination of black Americans. **California History**, 1991
