Gunther, 2012-12-06 Worldwide concern in scientific industrial and governmental communities over traces of toxic chemicals in foodstuffs and in both abiotic and biotic environments has justified the present triumvirate of specialized publications in this field comprehensive reviews rapidly published progress reports and archival documentations These three publications are integrated and scheduled to provide in international communication the coherency essential for nonduplicative and current progress in a field as dynamic and complex as environmental contamination and toxicology Until now there has been no journal or other publication series reserved exclusively for the diversified literature on toxic chemicals in our foods our feeds our geographical surroundings our domestic animals our wild life and ourselves Around the world immense efforts and many talents have been mobilized to technical and other evaluations of nature's local magnitudes fates and toxicology of the persisting residues of these chemicals loosed upon the world Among the sequelae of this broad new emphasis has been an inescapable need for an articulated set of authoritative publications where one could expect to find the latest important world literature produced by this emerging area of science together with documentation of pertinent ancillary legislation

Legitimacy Arthur Isak Applbaum, 2019-11-19 At an unsettled time for liberal democracy with global eruptions of authoritarian and arbitrary rule here is one of the first full fledged philosophical accounts of what makes governments legitimate What makes a government legitimate The dominant view is that public officials have the right to rule us even if they are unfair or unfit as long as they gain power through procedures traceable to the consent of the governed In this rigorous and timely study Arthur Isak Applbaum argues that adherence to procedure is not enough even a properly chosen government does not rule legitimately if it fails to protect basic rights to treat its citizens as political equals or to act coherently How are we to reconcile every person's entitlement to freedom with the necessity of coercive law Applbaum's answer is that a government legitimately governs its citizens only if the government is a free group agent constituted by free citizens To be a such a group agent a government must uphold three principles The liberty principle requiring that the basic rights of citizens be secured is necessary to protect against inhumanity a tyranny in practice The equality principle requiring that citizens have equal say in selecting who governs is necessary to protect against despotism a tyranny in title The agency principle requiring that a government's actions reflect its decisions and its decisions reflect its reasons is necessary to protect against wantonism a tyranny of unreason Today Applbaum writes the greatest threat to the established democracies is neither inhumanity nor despotism but wantonism the domination of citizens by incoherent inconstant and incontinent rulers A government that cannot govern itself cannot legitimately govern others **THE WRITER'S MONTHLY**, 1921
