Family Dynamics after Separation Ulrike Zartler,Valerie Heintz-Martin,Oliver Arranz Becker,2015-05-20 In many Western societies there has been a tremendous increase in family diversity over the course of the past few decades resulting in a considerable prevalence of non traditional family forms The increased instability of marital and non marital unions entails new challenges for both parents and children In this special issue family studies scholars from different disciplines examine from a life course perspective how re partnering processes work and how family relationships are rearranged in

order to adapt to the altered needs and requirements of post separation family life *The Juvenile* ,1911 A Generation at Risk Paul R. Amato,Alan Booth,2009-07-01 Just what do we know about the current generation of young Americans So little it seems that we have dubbed them Generation X Coming of age in the 1980s and 90s they hail from families in flux from an intimate landscape changing faster and more profoundly than ever before This book is the first to give us a clear close up picture of these young Americans and to show how they have been affected and formed by the tremendous domestic changes of the last three decades How have members of this generation fared at school and at work as they have moved into the world and formed families of their own Do their struggles or successes reflect the turbulence of their time These are the questions A Generation at Risk answers in comprehensive detail Based on a unique fifteen year study begun in 1980 the book considers parents socioeconomic resources their gender roles and relations and the quality and stability of their marriages It then examines children s relations with their parents their intimate and broader social affiliations and their psychological well being The authors provide rare insight into how both familial and historical contexts affect young people as they make the transition to adulthood Perhaps surprising is the authors finding that in this era of shifting gender roles children who grow up in traditional father breadwinner mother homemaker families and those in more egalitarian role sharing families apparently turn out the same Also striking are the beneficial influence of parental education on children and the troubling long term impact of marital conflict and divorce an outcome that prompts the authors to suggest policy measures that encourage marital quality and stability *Executive Documents of the State of Minnesota for the Year ...* Minnesota,1916
