nature *The Human Animal* Markus Gabriel,2024-11-13 The climate crisis has forced us to recognize that we are not separate from nature but are part of the natural world on which we depend human beings are animals and we must understand much better our place in nature and our impact on our environment if we are to avoid our own annihilation as a species And yet we feel nevertheless that we do not entirely fit into nature that we stand apart from other animals in some way in what way exactly Markus Gabriel argues that what distinguishes humans from other animals is that humans are minded living beings who seek to understand the world and themselves and who possess ethical insight into moral contexts Mind is the capacity to lead one's life in the light of a conception of who or what one is The undeniable difference between us and other animals defines the human condition and places a special responsibility on us to consider our actions in the context of other living beings and our shared habitat It also calls on us to cultivate an ethics of not knowing to recognize that however much we may seek to understand the world we will never completely master it Our grasp of reality mediated by our animal minds will always be limited much is and will remain alien to us lending itself only to speculation and to remember this is to stand us in better stead for carving out an existence among the environmental crisis that looms before us all

Life Gennadiy Zhegunov, 2005-07-25 Life is a diverse and ubiquitous phenomenon on Earth characterized by fundamental features distinguishing living bodies from nonliving material Yet it is also so complex that it has long defied precise definition This book from a seasoned biologist offers new insights into the nature of life by illuminating a fascinating architecture of dualities inherent in its existence and propagation Life is connected with individual living beings yet it is also a collective and inherently global phenomenon of the material world It embodies a dual existence of cycles of phenotypic life and their unseen driver an uninterrupted march of genetic information whose collective immortality is guaranteed by individual mortality Although evolution propagates and tunes species of organisms the beings produced can be regarded merely as tools for the survival and cloning of genomes written in an unchanging code What are the physical versus informational bases and driving forces of life and how do they unite as an integrated system What does time mean for individuals life on the global scale and the underlying information This accessible examination of principles and evidence shows that a network of dualities lies at the heart of biological puzzles that have engaged the human mind for millennia **Routledge Philosophy GuideBook to Spinoza on Politics** Daniel Frank, Jason Waller, 2015-07-16 Baruch Spinoza is one of the most influential and controversial political philosophers of the early modern period Though best known for his contributions to metaphysics Spinoza's Theological Political Treatise 1670 and his unfinished Political Treatise 1677 were widely debated and helped to shape the political writings of philosophers as diverse as Rousseau Kant Marx Nietzsche and although he publicly denied it even Locke In addition to its enormous historical importance Spinoza's political philosophy is also strikingly contemporary in its advocacy of toleration of unpopular religious and political views and his concern with stabilizing religiously diverse democratic societies The first Guidebook to Spinoza's political writings The Routledge Philosophy Guidebook to Spinoza on Politics covers the following key points Spinoza's life and the background to his philosophy the key themes and arguments of the Theological Political Treatise and Political Treatise the continuing importance of Spinoza's work to philosophy This book is an ideal starting point for anyone new to Spinoza and essential reading for students of political philosophy and seventeenth century philosophy *The Living Church*, 1945 The National Live-stock Journal, 1878 Laika's Window Kurt Caswell, 2018-09-18 Laika began her life as a stray dog on the streets of Moscow and died in 1957 aboard the Soviet satellite Sputnik II Initially the USSR reported that Laika the first animal to orbit the earth had survived in space for seven days providing valuable data that would make future manned space flight possible People believed that Laika died a painless death as her oxygen ran out Only in recent decades has the real story become public Laika died after only a few hours in orbit when her capsule overheated Laika's Window positions Laika as a long overdue hero for leading the way to human space exploration Kurt Caswell examines Laika's life and death and the speculation surrounding both Profiling the scientists behind Sputnik II he studies the political climate driven by the Cold War and the Space Race that expedited the satellite's development Through this intimate portrait of Laika we begin to understand what the dog experienced in the days and hours

before the launch what she likely experienced during her last moments and what her flight means to history and to humanity While a few of the other space dog flights rival Laika's in endurance and technological advancements Caswell argues that Laika's flight serves as a tipping point in space exploration beyond which the dream of exploring nearby and distant planets opened into a kind of fever from which humanity has never recovered Examining the depth of human empathy what we are willing to risk and sacrifice in the name of scientific achievement and our exploration of the cosmos and how politics and marketing can influence it Laika's Window is also about our search to overcome loneliness and the role animals play in our drive to look far beyond the earth for answers
