Educación Para Un Nuevo Mundo Educating For A New World:

Education for a New World Maria Montessori, 1963 *Teoría y práctica de la excelencia docente en Educación Infantil* María Elena González Alfaya, Rosario Mérida Serrano, Julia Rodríguez Carrillo, 2021-10-07 Se ha escrito abundantemente sobre las características del profesorado excelente de etapas educativas superiores si bien escasean los textos dedicados a caracterizar a las maestras y los maestros de Educación Infantil como un grupo profesional con identidad propia. Este ha sido el punto de partida para abordar este libro en el cual se propone el modelo MEDEI un marco teórico integrado por cinco dimensiones dependientes entre sí que hacen referencia a las competencias para la excelencia docente en Educación Infantil el cual pretende convertirse en una herramienta que ayude al profesorado en ejercicio o a estudiantes que se están formando para serlo a repensar su propia práctica y en un marco de reflexión que ayude a orientar el diseño de planes formativos que preparen a los y las mejores profesionales de la infancia. Asumiendo que la investigación educativa actúa a modo de puente entre la teoría y la práctica la segunda parte de la obra ofrece una síntesis de los principales hallazgos alcanzados en estudios que incorporan la mirada de la infancia sobre aquellas cuestiones que considera más importantes para garantizar su bienestar en la escuela. Por último y dado que los casos singulares conmueven mucho más que los resultados empíricos presentados de manera impersonal se comparten prácticas excelentes de docentes de Educación Infantil estadounidenses que pretenden convertirse en inspiración y animar a quien las lea a crear en su aula infantil un ambiente de auténtica participación democrática. Se trata de una edición bilingüe en español e inglés acorde con el panorama educativo actual cada vez más global e interconectado.

Ciudadanía global en el siglo XXI Rafael Díaz-Salazar, 2020-10-23 Esta obra colectiva ofrece un acercamiento desde diversas perspectivas al concepto y la práctica de la ciudadanía global a través de la educación y de la movilización social con el fin de facilitar su desarrollo dentro de la comunidad educativa. La educación debe promover la toma de conciencia de que se vive en un mundo interrelacionado cuyo dinamismo no puede aprehenderse de forma local sino como un sistema global de conocimientos aptitudes y valores en cambio constante. El paso de individuo a persona y de esta a ciudadano es un proceso educativo fundamental. La adquisición de ciudadanía más allá de los derechos y deberes se lleva a cabo a través de la acción para construir una sociedad mejor.
